

ATARI® 7800™ Game Manual

DONKEY KONG JUNIOR®

by Nintendo®

Donkey Kong

Donkey Kong the ape is back. Only this time the vengeful Mario is holding the ape prisoner. Luckily the ape has a son, Donkey Kong Junior, who will try to rescue Papa.

To free his dad, Junior must make his way through a dark and treacherous jungle. Racing against time, the little fellow climbs and swings across vines, while avoiding the terrible Snapjaws.

If he reaches the keys to Papa's cage, Junior must push them to the top of chains while staying clear of Snapjaws and a new flock of nasty Nitpickers. But even then his mission isn't over. Once he reaches Mario's hideout, he must pass yet another test against time.

This kid needs help. Don't just stand there! Help poor Junior save his father!

Getting Started

1. Insert the Donkey Kong Junior cartridge into your Atari 7800 as explained in your Owner's Manual.
2. Plug a controller into the left controller port for one player; plug a second controller into the right controller port for two players.
3. Turn on your television; then press **[Power]** to turn on your Atari console.
4. Move controller forward or backward or press **[Select]** to choose 1 or 2 players.

5. Move controller left or right or press **[Select]** to choose a difficulty level.
6. Press the fire button on your controller to start the game. Junior appears at the bottom of the first vine, ready to begin his rescue mission.
7. Press **[Pause]** to pause during a game, press it again to resume.
8. During a game, Press **[Select]** to return to the title screen. Press **[Reset]** to restart.

Moving Junior

Hold the controller so that the fire button is in the top-left corner. The handle directs Junior's climbing and running, and the button controls his jumping.

Climbing and Sliding Move the controller lever up to help the little ape climb up vines or chains; move it down to help him slide down. Junior can climb up two vines or chains faster than he can climb one. But he'll slide down one vine or chain faster than he'll slide down two. Junior can't climb through platforms.

Swinging Through the Jungle Move the controller directional lever left or right to position the little ape on the side of the vine or chain closest to his destination;

ong's Back!

then move the directional lever again toward the adjoining vine or chain.

Jumping Press the fire button to make Junior jump in place while standing. Press the button while Junior is running to make him jump in the direction he's facing. To move from a vine or a chain onto a platform, move the directional lever in the direction of the platform. Junior must be on an adjoining vine or chain and above the platform before he can move onto it.

Running If Junior is standing on a flat surface, move the directional lever left or right to make him run in that direction.

Playing the Game

The game begins with three Juniors. The first Junior begins "Operation Rescue" by climbing the vine just above him. He can't climb through a platform, so move him around to the left, and then continue climbing. Guide Junior through the jungle and up toward the key.

If you manage to reach the key, Junior's on his way to freeing Papa. But you should avoid the Snapjaws at all costs. When you reach the highest platform, continue to avoid

the Snapjaws, and go for the key.

You'll lose Junior if he falls off a vine or is caught by the Snapjaws. You'll also lose Junior if he jumps off a platform, misses a vine, and falls.

While you're working your way upward, a bonus timer is counting down. If you reach the key, the number in the bonus timer is added to your score. But time can work against you. If you don't capture the key before the timer runs out, Junior is a goner.

If Junior captures the key, he moves on to the springboard screen. He must avoid the pesky birds and the Nitpickers on his way to the top.

Mario's hideout is next, where you must dash across coils and climb more vines to reach the hanging vine at the top. To avoid the globes and sparks, jump over them and keep moving toward Papa.

On the Chains screen, Junior must push six keys into the locks at the top while avoiding Nitpickers and Snapjaws.

As long as there are Juniors remaining, you will return to the jungle and start your mission all over again. The Snapjaws and Nitpickers make things even tougher than they did before. The game is over if you lose the last Junior during the rescue missions.

Scoring

Your score and lives remaining appear at the top of the screen.

Push a key into a lock	200 points
Jump over Nitpicker, spark, or globe . .	100 points
Drop a fruit	400 points
Hit 1st object with fruit	800 points
Hit 2nd object with fruit	1200 points
Hit 3rd object with fruit	1600 points
Extra life at	20,000 points
