Puzzle Mode

Properly insert your *Pokémon Puzzle Challenge* Game Pak into your Game Boy Color system, then turn the power ON. When the Title Screen appears, press START to bring up the Main Menu.

Main Menu

There are six options available on the Main Menu. Move the cursor to any option to get a brief description of it from Professor Oak. (See page 10 for more information about the Main Menu.)

The Pokémon Eggs

As you play through the game, the Pokémon eggs on the Stage Selection Screen of each mode will hatch into Pokémon, allowing you to select new levels.

(For more information about the Stage Selection Screens, see the mode descriptions that begin on page 12.)

Try to hatch as many Pokémon eggs as you can!

This is a puzzle game that's easy to learn and play but difficult to truly master.

Your goal is to clear the blocks off of the screen before they reach the top. You can clear blocks by lining up three or more of the same type side by side, either horizontally (left and right) or vertically (top and bottom). Sounds simple enough, right?

But as you play, new lines of blocks will appear at the bottom of the screen, pushing the other blocks toward the top. When a block hits the top of the screen, your game is over.

Clearing Blocks

- This is the basic technique for clearing blocks.

- 1 Use the + Control Pad to move the cursor around.
- 2 Press the A Button to switch the  and the . When you do this, three  s will line up vertically.
- 3 When the  s clear, the block that was on top of them will fall down.

Switching a Block with an Empty Space

- This is the basic technique for switching a block with an empty space.

- 1 Move the cursor so that half of it is on an empty space.
- 2 Press the A Button to switch the  with the empty space.
- 3 Both the  and the  above it will fall.

NOTE:

Blocks can only be moved left or right. Drop a block into an empty column to move it down.

Pokémon Puzzle Challenge features two advanced block-clearing techniques—chains and combos. You'll need to use both to complete the advanced stages of the game, so be sure to master them. Using these techniques will make playing the game a lot more fun, too!

Chains

You can make a chain by clearing multiple groups of three or more blocks, one right after the other.

- Here's an example of a Three-Chain...

First, switch the  and the .

The s will form a vertical line and clear.

Then the  that was above will fall to form a horizontal line, clearing another group.

Finally, the  will fall to form a vertical line, clearing a third group.

Active Chains

To form an active chain, move blocks to create a chain while other blocks are in the process of clearing.

Switch the  and the  to form a vertical  group. Just before the  falls from above, move the  from the next column on the right into the empty space. This will fall to clear a vertical  group.

Combos

To make a combo, you must move a single block to cause four or more blocks to clear at the same time. It doesn't matter if you clear one type of block or several different types.

The  and  groups will form vertically and clear at the same

- There are many ways to form regular chains, active chains and combos. For more help, choose Training on the Main Menu.

Press START on the Title Screen to bring up the Main Menu. Use the + Control Pad to move the cursor, then press the A Button to make your choice.

Challenge (versus the Gym Leaders)

Travel through the world of Johto, facing trainers and Pokémon found in the Gold and Silver versions of Pokémon®. Attack your opponents by clearing blocks, and knock their life gauges down to zero to win the match. Many opponents await your challenge, so fight your way through the ranks to become the champion!

Choose level settings, just like in Marathon Mode. When the Story Screen appears, press the A Button to scroll through the text messages, then press START to begin the match.

Attacking Opponents

There are three ways to attack your opponents: chains, combos and shock blocks (! blocks). Your opponents will also attack you by dumping garbage on your screen. See page 18 for more info on garbage blocks.

- Your progress in this mode will be saved automatically.

Erasing Data

Choose Erase on the File Selection Screen to delete a saved game. First, confirm that you actually want to erase your game. Next, choose the save file you want to delete, then choose Yes to confirm.

Puzzle

Solve the puzzles using only a limited number of moves.

Choose a file and a stage to play. There are six rounds, which must be cleared in order. Each round has 10 stages. Use the + Control Pad to select a stage, then press the A Button to begin the game.

- Your progress in this mode will be saved automatically.
- Press SELECT on the Stage Selection Screen to get advice from Professor Oak.
- Clear eight stages in a round to move on to the next round.
- Press SELECT to get a hint. Clear all the stages in a round to earn an extra hint.

Erasing Data

Choose Erase on the File Selection Screen to delete a saved game. First, confirm that you actually want to erase your game. Next, choose the save file you want to delete, then choose Yes to confirm.

Clearing Garbage Blocks

Garbage blocks are large, solid blocks that you can't move—but if you clear a group of blocks that is touching a garbage block, it will transform into regular blocks. Then you can clear those blocks just like you would any others.

This garbage block fell from above.

Clear a group of adjoining blocks...

...to transform the garbage blocks into regular blocks.

- Garbage blocks of the same type that are stacked on top of each other will all clear together, but different types of garbage blocks will not.
- Garbage blocks that are two or more blocks high will clear one layer at a time.

This garbage block was created by a chain.

This garbage block was created by a combo.

This garbage block was created by shock blocks.

- The longer the chain you create, the taller the garbage block you send will be.

Interrupting Your Game

In single-player games, you can interrupt your game and come back to it later. First, press START during your game to pause it. When you choose Save, the Break Screen will appear. Turn the power OFF to quit your game and take a break. The next time you turn the power ON, the Continue Screen will appear. Choose Continue to continue playing from where you left off.

Choose 2 Players on the Main Menu, then select one of the three different game modes on the 2-Player Screen.

2-Player Vs

Use chains, combos and shock blocks to attack your opponent in this two-player competition. If your opponent's blocks reach the top of the screen before yours do, you win. The first to win two games wins the match.

Choose level settings for each player, then select the stage you want to play. Finally, choose which Pokémon you will use, then the game will begin.

- The game background will change depending on which stage you've selected.

- The Pokémon shown at the top of the screen is your Pokémon. The Pokémon at the bottom belongs to your opponent. (This is the same for all Vs modes.)
- The number of matches won will return to zero if you choose another mode or turn the power OFF.

Time Zone

Get the highest score possible in just two minutes. If your blocks reach the top of the screen, you automatically lose that game. The first player to win two games wins the match.

Choose your level settings, just like in 2-Player Vs Mode, then choose a stage to start playing.

Connecting the Game Link® Cable

This section explains how to connect two Game Boy Color systems using the Game Link cable.

Connecting the Game Link Cable

Before playing any of the two-player modes, you must first connect two Game Boy Color systems with a Game Link cable, as shown on the right.

Items Needed

- Game Boy Color Systems 2
- *Pokémon Puzzle Challenge* Game Paks 2
- Game Link Cables 1

How to Connect the Cable

1. Confirm that the power on each system is OFF, then insert a *Pokémon Puzzle Challenge* Game Pak into each system.
2. Firmly insert one end of the Game Link cable into the EXT. Connector on each system.
3. Turn each system's power ON.
4. See page 20 for instructions on how to begin a two-player game.

Troubleshooting in Linked Play

Be sure that the Game Boy Color systems are connected properly.

The game may not function properly under the following conditions:

- The Game Link cable is not properly inserted.
- The cable becomes disconnected during game play.
- The proper cable is not being used.

Choose Options on the Main Menu to bring up the Options Screen. Press up and down on the + Control Pad, then press the A Button to choose one of the seven options.

Match Point

You can set the number of games per match in two-player games to either 1 or 2. The default setting is 2.

? Sign

The number that appears on the screen when you create a chain is called a "sign." Press left and right on the + Control Pad to turn the sign limit ON or OFF.

Sign

ON If you make an 11-Chain or bigger, a "?" will appear instead of a number.

OFF When you make a chain, a number will appear, no matter how big the chain is.

Semi-Sign

If you turn this option ON, you'll be able to see through the sign that appears on the screen.

Music

Listen to the music played throughout the game. Press left and right on the + Control Pad to select a number on the right side of the screen, then press the A Button to play that track.

Sound

Listen to the sound effects heard during the game. Press left and right on the + Control Pad to select a number on the right side of the screen, then press the A Button to play that sound.

Pokémon

See information about each of your Pokémon. Press left and right on the + Control Pad to select a Pokémon, then press up and down to see its different poses.

Gallery

View the different pictures you've collected for clearing rounds. You can't see pictures from rounds you haven't cleared.
