menus and modes

CASINO ENTRANCE SCREEN

The first screen takes you inside the casino where you have the run of the floor and \$5,000 to spend! In addition to the games, there are several options available before beginning play. Use the + Control Pad to navigate through the casino and menu screens, and use START or the A Button to select a game or an option. The different games and menu names will appear at the bottom of the screen.

PLAYER MENU

Selecting this option lets you add or remove players.

ADD PLAYER – Takes you to the Name Entry Screen where you can add players.

EXIT – Takes you back to the casino.

STATISTICS SCREEN

This screen shows how much money each player has won or lost at each game in the casino. Your statistics are cleared when you turn off your Game Boy Color.

“And let me tell you, Mac, there’s nothing sorrier than a long list of losses, so keep at it until we either make a winner out of you or you’re so poor that you don’t have anything left to hock for dough! All it takes is one winning streak and you could be richer than you ever dreamed.”

SINGLE PLAYER MODE

Vegas Games starts off in Single Player Mode with a \$5000 bankroll. You begin the game in the lobby of the Vegas Games casino, home to one of the greatest gambling arenas of all time! From here you can choose from nine classic casino games. Once you have selected the type of game you want to play (using START or the A Button), you can select from multiple variations of the game (i.e. different Slot Machines).

If you wish, you can play your game of choice until you run out of money. To move on to another game, however, press START to return to the Casino Lobby and select another game. Keep in mind, in some games if you leave before finishing the game with money bet you will lose that bet.

MULTI-PLAYER MODE

Vegas Games does not require the use of a Game Link® cable for multiple players – all players play on the same Game Boy Color. Add additional players by entering the Player Menu (described on page 6).

Up to four players may play together in the Vegas Games casino. Each player enters a different name. Multiple players have access to Blackjack, Roulette and Baccarat. (As in real casinos, there can be no more than one player per Video or Slot machine.) Games will advance just as in Single Player Mode, with the exception that once one player is finished betting, the Game Boy Color must be passed to the next player in line. Each player selects READY to finish betting. Play continues after the last player selects READY. In games such as Blackjack, where players have the option to take more cards, each player again takes turns until all players are finished. (Games without intermediate steps will simply have a result and payout for all players simultaneously.)

GAME DESCRIPTIONS

"Whether you're a novice or a veteran gambler, it's always good to get the lay of a table or game before you sit down and join in. And let me tell you, pal, with twenty games to choose from, you can't know all the rules!"

CRAPS

A long-time favorite in Las Vegas, no casino would be complete without Craps. In Vegas Games, this classic game of dice plays just like it does in other casinos - you place the bet that satisfies the odds you want to play, and roll the dice. (The rest is up to Lady Luck.) With all of the possible ways of betting in Craps, it might be best if you just go out and bet conservatively until you figure it out, but here's a few pointers...

To place a bet, move the cursor to the desired box and press the A Button to place a chip down (each time you press the A Button), your wager will increase according to the amount of your QUICK BET. As in other casinos, a bet can be placed before each roll of the dice!

Your best odds at the Craps table are on the Pass Line, Come Bar, Don't Pass Bar and Don't Come Bar.

In the Pass Line, you bet that whatever number you roll on your first roll will come up again before a 7 is rolled. (If you roll a 7 or 11, you automatically win on the first roll and if you roll a 2, 3 or 12, you automatically lose.)

The Come Box is the same as the Pass Line, except that you place the bet before the number rolled for the Pass Line has come up again. You essentially pick a roll to start on and whatever number is rolled, you bet that it will come up again before a 7 is rolled.

The opposite is true for the Don't Pass Bar and the Don't Come Bar. If you bet on Don't Pass, you are betting against the first number rolled – betting that a 7 will be rolled before that number is rolled again (or that the first roll will be a 2 or a 3. A roll of 12 ties, and 7 or 11 loses).

Of course if you have a favorite number (as long as it's 4, 5, 6, 8, 9 or 10), bet on it in the Place Boxes, these are the next best odds. Again, you are betting that your number will come up before a 7 does.

Conversely, if you have a least favorite number – or if 7 is your favorite – you can place a lay bet above any of the 4, 5, 6, 8, 9 or 10 as well (thus betting that a 7 will be rolled before whichever number you're betting against).

Field bets are pretty neutral as far as risk goes. But remember, Field bets are good for only the next roll! If 3, 4, 9, 10 or 11 comes up on the dice, you are paid even odds. If 2 or 12 comes up, you are paid 2-1. If a 5, 6, 7 or 8 comes up you lose your bet.

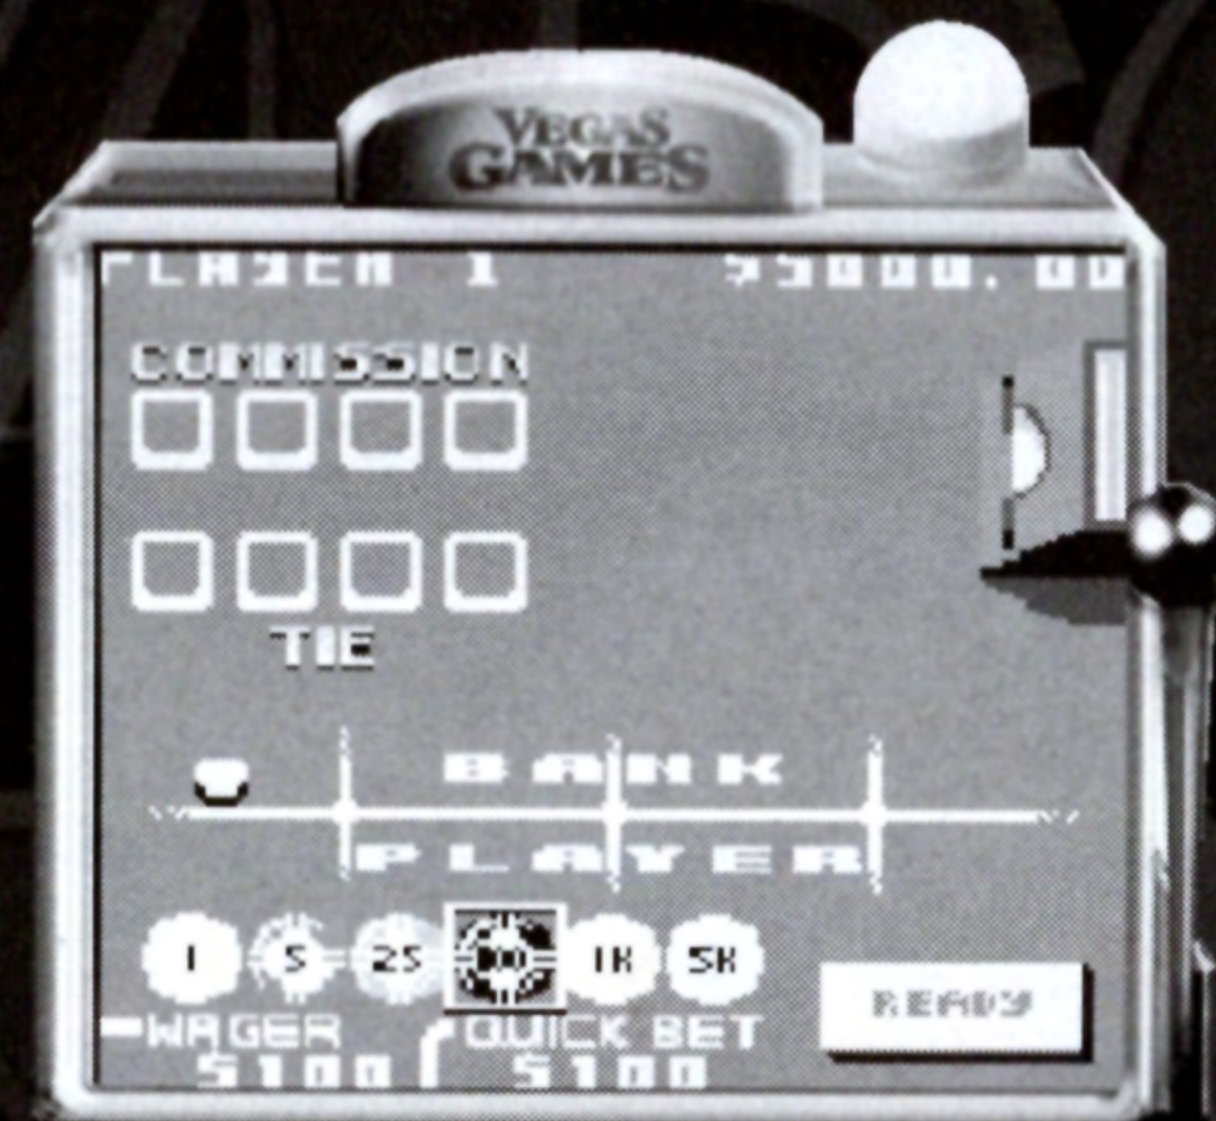

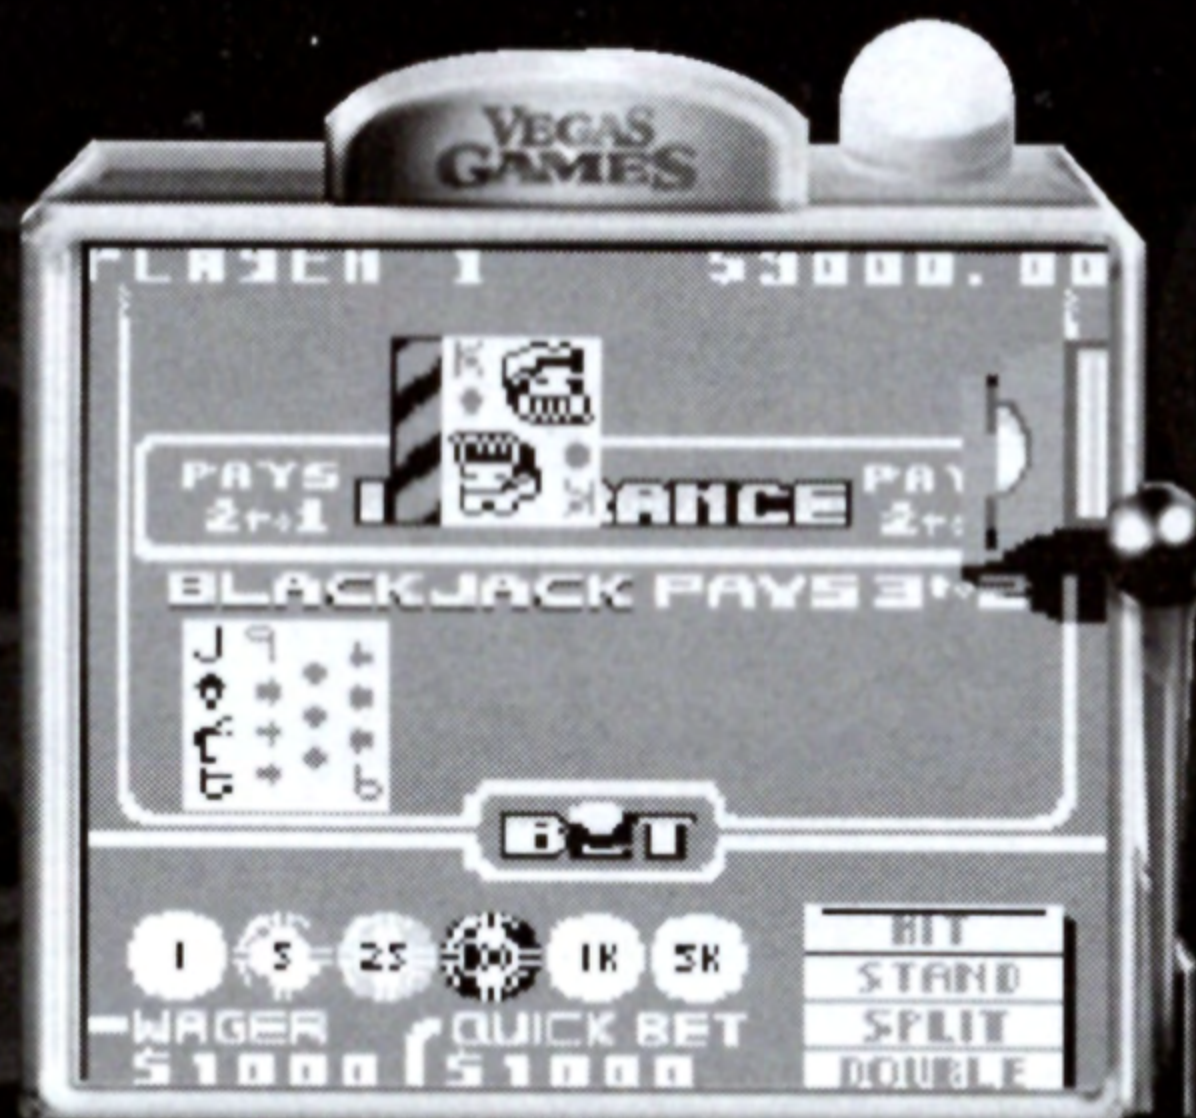

Avoid making bets on other 'one roll' spaces (these include 'Horn,' and 'C & E') unless you're feeling particularly risky or lucky! These have the worst odds in the game for winning, but on the other hand they do have the best paying odds at the Craps table.

BACCARAT

This is your classic "High Rollers" game - plus it has the best odds in Vegas at nearly a 50% chance of winning on every hand! Each player is dealt two cards to which cards may be added from the deck depending on the cards in play (press the A Button to prompt the dealer to either add another card or gain the results of the game). Betting in Baccarat is considerably easier than in Craps. All you need to decide is whether you will win or the dealer will win (or if you will tie - though the odds of a tie game are very remote).

Move the cursor to the desired betting place and press the A Button to lay down your chip (as in Craps, the wager increases by the increment set in QUICK BET). After the dealer deals the hand, the player closest to 9 wins! (Cards of a value of ten don't count, and if you go over ten points, the ten points are deducted from your point count leaving you with the remaining points. Cards are added until you arrive at a number that is above 5 and under 10.)

BLACKJACK

Standard Blackjack is played at the Vegas Games Casino. Two cards are dealt to each player, the goal being to get closer to 21 than the dealer without going over.

Bets are placed before the cards are dealt (using the A Button as in the games above), and you may only bet on your own hand winning. After the deal, a menu is displayed allowing each player to HIT (draw a card from the deck), STAND (stay with the cards that you have), SPLIT (take two cards of the same face value and 'split' them into separate hands - placing a bet on

the second hand equal to that of the original bet and playing them out as two normal hands), or DOUBLE (double your original bet and receive only one more card - usually played when the first two cards equal 11 points). If doubling down causes your total bet to exceed \$5000, the wager will show as \$0. The total will be figured into your winnings. The house rule for this game is the dealer must stay on a soft 17. If you go over 21 points, you 'bust' and have lost. Each card is worth face value (with J, Q, and K worth 10 points each, and Aces worth either 1 or 11 at the player's discretion).

KENO

Keno is the casino answer to the Lottery. Select one to twelve numbers out of eighty (using the Control Pad and the A Button to select the numbers you wish to play). Winnings are determined by how many numbers match at the end of the number drawing. Ticket prices are \$2 and \$2 special. (Only one to twelve spots are used here with no special rules.) The payoffs on special tickets differ only when three or more numbers are played and will mean higher payoff for hitting a lot of numbers. But, there is no payoff for hitting fewer numbers that would pay on a regular card.

MONEY WHEEL

The Money Wheel is another casino classic. In this game, a large vertical wheel is spun and players bet directly on the odds of a particular space on the wheel coming up. Betting against the odds, players can have anything from a nearly sure thing to a 40-to-1 chance of winning - winnings match the odds played.

To place a bet, move the cursor to the desired odds and press the A Button (incremental chips are placed according to the amount set in QUICK BET).

ROULETTE

Vegas Games runs a standard Roulette table with no variations. You bet on a number, set of numbers, or color, and a large wheel is spun. A marble is counter-spun, and when it stops, if it lands on your number, you win anywhere from even-money to 38 times your bet - depending on where you placed your chips! To place a bet, move the cursor to the desired number, set of numbers, or color and press the A Button to place a chip of the value determined in QUICK BET.

VIDEO KENO

The video form of Keno is much the same as the standard version except for a few key features. The Vegas Games Casino has the standard 25¢, \$1, \$5 and \$10 machines, and each machine can take from 1-8 coins (payouts are adjusted by how many coins are played). Also, where 1-12 spots can be played on standard Keno, Video Keno lets players choose up to 15 spots.

VIDEO POKER

One of the all-time best-known casino games has found its new home in the Video Poker machine! At the Vegas Games Casino, there are five variations of the original 5 card poker game, and each is played as follows (with the exception of special game rules listed below):

A coin increment from 25¢ to \$10 is chosen at the bottom of the screen using the cursor and the A Button. Next, the bet is placed using the A Button to select either BET MIN or BET MAX. Next press DEAL to deal the five cards. Cards are either kept by

pressing the HOLD button under the desired cards, or discarded and replaced. Press DEAL again to replace the undesired cards (you may only draw replacements once in poker). To view the payout for each winning hand, press SELECT. Press SELECT again to return to your game. Don't forget to press the CASH OUT button before leaving the machine!

DEUCES WILD

The Deuces Wild game is played with a standard deck except that all twos are wild. This means that twos can be used in place of any card for any hand - though payout is slightly lower on fours of a kind and royal flushes when a two has been inserted as a wild card. Three of a kind is the minimum hand needed to receive even money payouts for this game.

TENS OR BETTER

This is a standard poker game with a pair of tens as the minimum hand for a payout of even money.

JOKERS WILD DOUBLE DOWN

The same rules apply as for Deuces Wild with the exception that there are only two Jokers in the deck instead of four (as in the case of twos). If you have a winning hand, you get the option of trying to double your bet, high card wins. Under Double Down, jokers are the highest cards, beating even an Ace.

JACKS OR BETTER HIGH ROLLER

In this version, there are no wild cards, and you must have at least a pair of Jacks to pay even money. The High Roller game has higher stakes than the other Video Poker games, offering bets from \$1 to \$25.

JACKS OR BETTER DOUBLE DOWN

This version of Jacks or Better offers the option to double your bet if you have a winning hand – though you still need at least a pair of Jacks to pay even money! This version has the normal betting increments of 25¢ to \$10.

SLOTS

There are eight different slot machines in the Vegas Games Casino, each with a different amount of reels, payoff lines, and number of coins playable per spin. Each has the odds and payouts for each combination listed above the reels (press up on the Control Pad to view the payouts and press down to return to the 'reels' view). After selecting the coin increment you wish to use, you may bet one coin at a time (using the BET MIN button), or you may bet the max (using the BET MAX button). After betting, you press the SPIN Button to spin the reels. The wheels are spun automatically if you bet the maximum number of coins. When you are done playing, press the CASH OUT Button before leaving the Slot Machines to add your winnings back into your bankroll.

ANCIENT TREASURES

This is the first of the two four reel slots. This one has only one payline and 1-3 coins are accepted.

LOVE 2 WIN

This is the other four-reel machine and has three paylines. 1-3 coins are accepted.

DYNAMITE DOLLARS

This is a five-payline machine with three reels. 1-5 coins are accepted.

BUFFET
