## THE MENU SCREEN

The InfoGenius SPELL CHECKER contains a 60,000 word dictionary, in addition to a fully functional calculator. When you've made your decision, press START to activate the chosen option.

After the Spell Checker mode is selected from the Menu Screen, a keyboard appears. Enter the approximate spelling of the word you wish to check by moving the cursor to the appropriate letters on the keyboard. Lock in each letter by pressing BUTTON A. ### *If a Word Is Spelled Incorrectly*

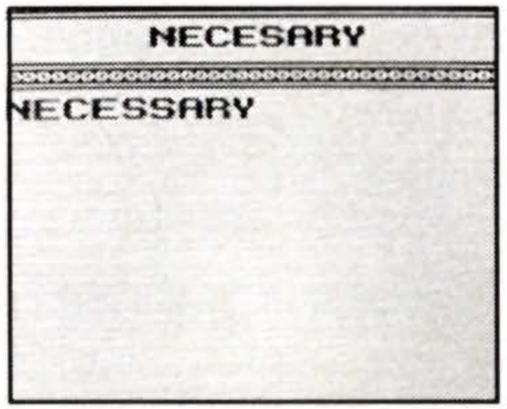
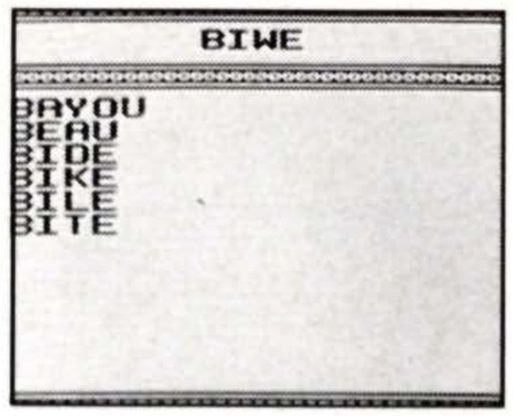
If you have entered the incorrect spelling of a word, there are three possible results:

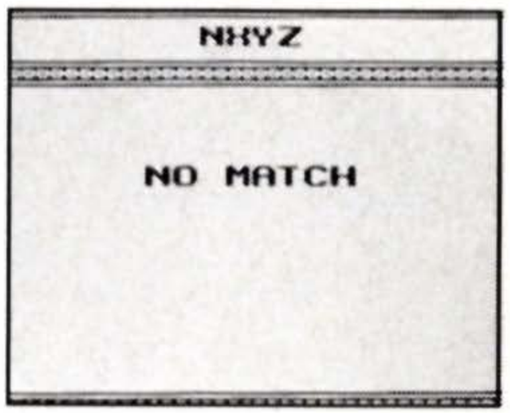
1. The screen will display the message "SEARCHING" as the SPELL CHECKER searches through the dictionary database to find the correct spelling. When the correct spelling is located, it will be displayed below the original incorrect spelling.

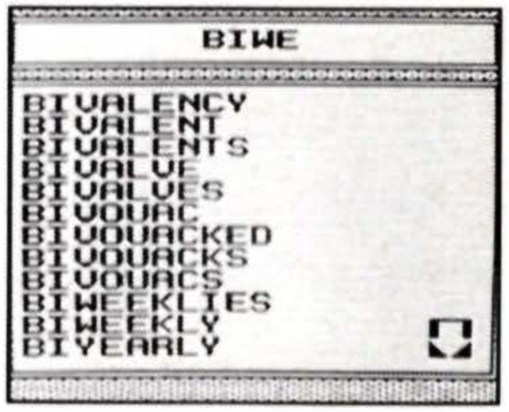


2. The SPELL CHECKER cannot precisely determine the word you desire to spell. If this is the case, a screen will appear displaying a list of words phonetically similar to the word you entered. The incorrect word will appear at the top of the screen
If this list consists of more than 12 words, press either the UP ARROW to scroll ahead, or the DOWN ARROW to scroll back.



3. The screen will display the message "NO MATCH," which indicates the word entered is completetly unknown to the SPELL CHECKER and it cannot even phonetically connect the word to anything in its dictionary database.

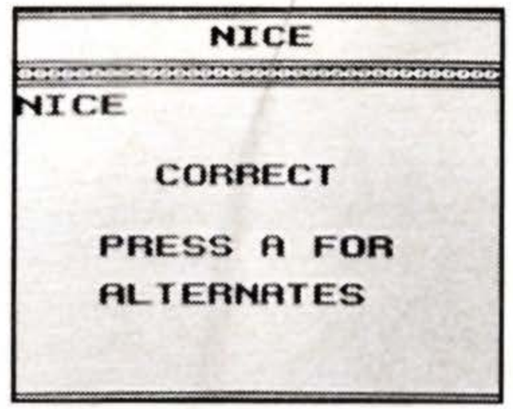




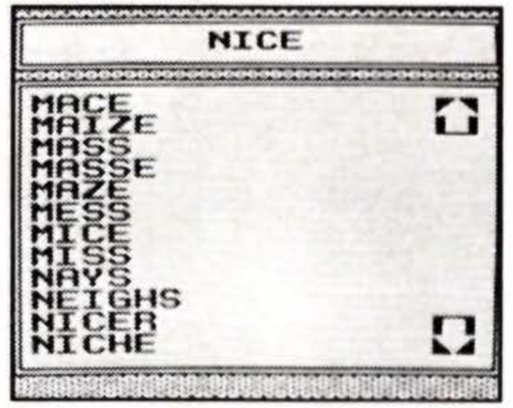
At any point following any of the above three alternatives, you may press BUTTON B, which will display an alphabetical list of words in the dictionary. This list consists of 10 words prior to and 10 words after the incorrect word, if it were to appear in the dictionary. To scroll through this list, press either the UP ARROW to move ahead, or the DOWN ARROW to move back. To return to the keyboard screen, press START. To return to the Menu, PRESS SELECT.

*If a Word Is Spelled Correctly*

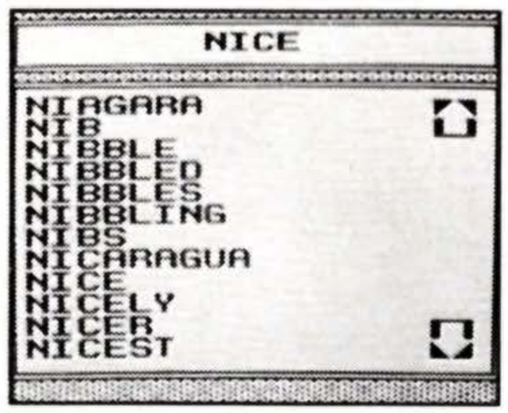
If you have entered the correct spelling of a word, a screen appears displaying the message "CORRECT."
The same screen will also prompt you to press BUTTON A for a list of possible alternate words, which are phonetically related. To scroll through this list, press either the UP ARROW to move ahead, or the DOWN ARROW to move back.



*NOTE: Some words have no list of alternates because they are phonetically unique. If this is the case, the message "NO ALTERNATES" will be displayed on the screen.*



You may at this point press BUTTON B, which will call up an alphabetical list of words from the dictionary. This list contains 10 words prior to and 10 words after the selected word. To scroll through this list, press either the UP ARROW to move ahead, or the DOWN ARROW to move back. To return to the keyboard screen, press START. To return to the Menu Screen, press SELECT.



# THE CALCULATOR

If the Calculator mode is selected from the Menu Screen, a calculator keyboard will be displayed. The SPELL CHECKER calculator works just like any other calculator. Simply use the control pad ARROWS to move the hand icon to the desired number or function and then press BUTTON A.
