I BALL MOVES

STREETBALL IS MY JOB
I BALL FOR A LIVING.

AND 1 is known for its outrageous trick moves, and with the I BALL control system, you too can pull off many of the same moves seen on the AND 1 Mix Tapes.

I BALL moves not only look cool, they also earn your player respect and can make your defender "break his ankles."

allowing for a quick opening to the basket. You can preview your unlocked I BALL controls by going to the I BALL Controls screen from the Main Menu or Mix Tape Tour menu.

NOTE: I BALL moves require special timing to pull off. Please check out the in-game tutorial for more information.

How to I BALL

There are two types of I BALL moves you can perform in AND 1 Streetball, depending on whether your baller is moving or not.

Running I BALL Moves

Level 1 Running I BALL: left analog stick + right analog stick

Level 2 Running I BALL: left analog stick + right analog stick + the R1 button

Stationary I BALL Moves

Level 1 Setup Dribble: right analog stick

Level 2 Showboat Move: right analog stick + left analog stick

Level 3 Anklebreaker: right analog stick + left analog stick + the R1 button

Stationary I BALL moves include jabs, juke steps, and fancy crossovers, all organized according to eight different "branches." Use the left analog stick to perform the following:

- **Off Da Head Branch (Up):** Moves that involve the upper body and bonking your opponent in the head.
- **Hot Sauce Branch (Up-Left):** Moves associated with Hot Sauce.
- **Professor Branch (Left):** Moves associated with The Professor.
- **Clownin' Branch (Down-Left):** Silly trickster moves.
- **Hypnotizer Branch (Down):** Fancy dribbling intended to mesmerize your opponent.
- **Showboat Branch (Down-Right):** Flashy show-off moves.
- **Da Bounce Branch (Right):** Moves involving jumping and aerial tricks.
- **Dizzy Branch (Up-Right):** Spinning moves intended to make your opponent dizzy.

At the start of the game, your created baller will have only certain I BALL branches available. Play through the AND 1 Mix Tape Tour to unlock all 128+ moves!

Special note about Off Da Head moves: It is possible to stun your opponent by doing an Off Da Head move. Be careful, though – a wily defender can anticipate this and reverse the move by moving the right analog stick up while defending, catching the ball and making you look foolish.

IN-GAME INTERFACE

Score

Shows how many points have been scored in the current game.

Player/Team Name

Displays the current player or team.

Crowd Meter

Reflects how excited the crowd is based on your performance during the game. The more I BALL moves and anklebreakers you do, the more the crowd meter will go up. Note that you need to "finish" (i.e., score a basket) in order for the crowd meter to stay high. If you perform tricks to build up the crowd meter but get the ball stolen, the crowd meter will revert to its former level.

Once the crowd meter is full, you earn a "Mic Checkα" Mic.

Mics let you do one of two special things:

- **Activate On Fire mode (L1 + L2 buttons):** Pressing the L1 + L2 buttons will activate On Fire mode, causing the ball to glow red and boosting your team's stats considerably. On Fire mode will extinguish when your opponent steals or turbo blocks the ball, or scores a basket.

- **Perform a Breakdown (R1 + R2 buttons):** After earning a Mic, players can perform an AND 1 Breakdown move worth +3 points in half-court games, or +5 points in full-court games. To do this, press and hold the R1 + R2 buttons when your player's indicator icon is pulsating on the court. The name of the Breakdown move to be performed will appear on-screen.
- You can create your own custom Breakdown moves by accessing the Create-a-Move editor from the Main Menu. See page 30.

Time

Displays how much time is left in the current half.

Period

Shows the current game period (1st half, 2nd half, or Overtime).

Mics Earned

Filling the crowd meter earns you a "Mic Check" Mic. The indicator shows how many Mics each side has earned, up to three. Use Mics to do a Breakdown move or go On Fire during the game.

Move Name

Displays the current successfully performed move name and its respect point value.

Duke Tango

Oh Baby! Duke Tango is the voice of AND 1 Streetball and will provide commentary while amusing the crowd with his antics.

Respect Points

Shows the current number of respect points earned. Respect points affect the crowd meter. Earn lots of respect and you will win the crowd over. Earn enough respect points in the AND 1 Mix Tape Tour to advance in each Open and Main Run.

Note that you need to "finish" (i.e., score a basket) in order to keep the respect points earned during a single possession. For example, if you perform tricks and earn 5,000 respect points, but miss a shot and turn the ball over, you will lose the 5,000 points.

Anklebreaker Meter

The anklebreaker meter only appears when you are close enough to a defender to make him fall down. Perform stationary I BALL moves while in this state to build the meter up.

When the meter is full, a siren will sound indicating that the defender is ready to fall.

If you pull off an anklebreaker I BALL move at this time, you will be rewarded with a respect point bonus, a clear path to the basket, and the satisfaction of making your opponent look foolish.

Turbo Meter

Every player has a turbo meter around their player indicator. When using the R1 button to sprint, the meter will deplete. The meter will go down quickly or slowly based on the player's stamina attribute.

Shot Clock

When the shot clock is turned on, players will need to get a shot off in 24 seconds that hits the rim or scores; otherwise the ball will be turned over to the other team.

Note About Backing Down;

A player with the ball can try to muscle his way into the paint and back down a defender by holding the L1 button while moving towards the basket. The defender can try to counter this by holding the L1 button and moving against the player.

Backing down is affected by your baller's power attribute. Only try to back down on big Escalade with the Professor at your own risk!

THE AND 1 MIX TAPE TOUR

Do you have what it takes to challenge AND 1? Step on the bus and play in the AND 1 Mix Tape Tour as it travels across the country looking for the best Streetball talent. You'll need to have the right mix of skill and crowd-pleasing ability to earn a contract with AND 1 and join the ranks of the Streetball elite!

How the Tour Works

Each summer, AND 1 looks for a new baller to join the AND 1 squad. To do this, the team travels across the country playing against teams of the best local talent.

Open Runs

To get this local team together, AND 1 holds an "Open Run" tryout in each city stop for the first 150 ballers who sign up. These local streetball players compete with each other to earn one of three spots on that city's team of best ballers. These competitions are short 5-on-5 "shirts vs. skins" matchups meant to

impress the AND 1 players who are judging and offering commentary on the sidelines.

Main Runs

Once the AND 1 players have given special wristbands to the top three ballers in the Open Run, those ballers are teamed up with two of the best players from the Tour's previous city stops. This opposing squad faces Team AND 1 in the "Main Run," a 5-on-5 uniformed matchup hosted by Duke Tango, the voice of AND 1, with music provided by the Evil Genius, DJ Green Lantern.

Voting

After each Main Run, the AND 1 squad gets together in their locker room and votes on who among the three best ballers in the Main Run to cut from the Tour. The remaining two ballers get to stay on the bus and travel to the next stop, where they must once again play in the new city's Open and Main Runs to avoid elimination.

Awarding the Contract

At the end of the AND 1 Mix Tape Tour, the AND 1 squad votes for a final time and awards a new AND 1 jersey and contract to the best baller who lasted to the end. This lucky baller becomes the newest member of AND 1!

Starting a New Mix Tape Tour

To begin a new Mix Tape Tour, select Game Modes from the Main Menu, then choose AND 1 Mix Tape Tour. Select New to begin the tour.

Once you have saved your progress on the tour, choose the Continue option.

Creating a Baller

Your first step in joining the AND 1 Mix Tape Tour is creating a baller. Want to be a lean and lanky shooter like AO? Or would you rather be an imposing big man like Escalade? Create-a-Baller will allow you to customize your baller's appearance and attributes to suit your needs.

To create a baller from scratch, choose the Create New Baller option and press the button.

If you already have a created baller you would like to use on the Tour, select him by moving up and down through the list and pressing the button to select.

Enter Name

Use the keyboard interface to enter a name for your custom baller.

Body Type

There are three different body types available.

Choose a body type and press the \otimes or R1 button to advance to the next screen. You will then be asked if you would like to use the EYETOY™ USB camera (for PlayStation®2) to create your face. Choose Yes or No and press the \otimes button to continue.

Body and Skin

Choose your baller's height, weight, and skin color:

Note: Your height and weight affect your baller's attributes. A taller, heavier baller will be better at dunking, blocking, and muscling in the paint, while a smaller, thinner baller will be quicker, more

agile, and have a better shooting range.

Press the R1 or \otimes button to advance to the next screen, or the L1 button to return to the previous screen.

Pick Face

Give an appropriate game face to your baller. Choose from 10 premade faces by scrolling through the list. When you have found your selection, press the \otimes or R1 button to advance to the next screen.

Pick Face with the EYETOY™ USB camera (for PlayStation®2)

If you have an EYETOY™ USB camera (for PlayStation®2) and chose to use it to create your own face, you will be given the option to "add your own" face on the Pick Face screen.

To add your face:

1. Press the \square button to capture your face.
2. Place your face inside the silhouette area.
3. Press the \otimes button to capture.

Note: You will get better results with your EYETOY™ USB camera

(for PlayStation®2) if you use it in a well-lit area.

Once your face has been captured, you will need to adjust the area of your face to be mapped onto the model on the right. Use the left and right analog sticks to make the orange facemap box grow and shrink. Use the controls until your face fits the model.

If your skin tone is different from the model's, press the  button to change the model's skin tone. You can also rotate the model using the L2 and R2 buttons.

Face Options

You can further choose to customize head size, jaw, eyes, eyebrows, cheeks, nose, mouth, and ears. Use the on-screen sliders to adjust the face options. Press the R1 or  button to advance to the next screen, or the L1 button to return to the previous screen.

Hairstyle

Choose from different hairstyles in four different colors. Press the R1 or  button to advance to the next screen, or the L1 button to return to the previous screen.

Player Info

Choose your baller's uniform number, position, voice, and birthday.

There are six different voice types for your created baller. Your choice will reflect how your player sounds (and talks trash) during pickup games and on the Mix Tape Tour.

Press the R1 or  button to advance to the next screen, or the L1 button to return to the previous screen.

- **My Baller:** View your baller's stats, update his attributes, modify his appearance, and update his Breakdowns.
- **Practice:** Practice your moves on the AND 1 Practice court in Paoli, PA.

Open Runs

Before you can play in each city's big game against AND 1, your baller will need to impress the AND 1 judges at the Open Run. These games are short, six-minute scrimmages in two halves, 5-on-5, shirts vs. skins. Be sure to earn enough respect points to earn your wristband, or you could be going home.

Main Runs

This is it, the big game! You will be on the current city's home team of ballers against five members of the AND 1 squad. AND 1 doesn't like to lose, and will be playing a much tougher game than in the Open Runs. Do your best, impress the crowd, and meet your goals in each Main Run to stay on the bus and travel to the next city!

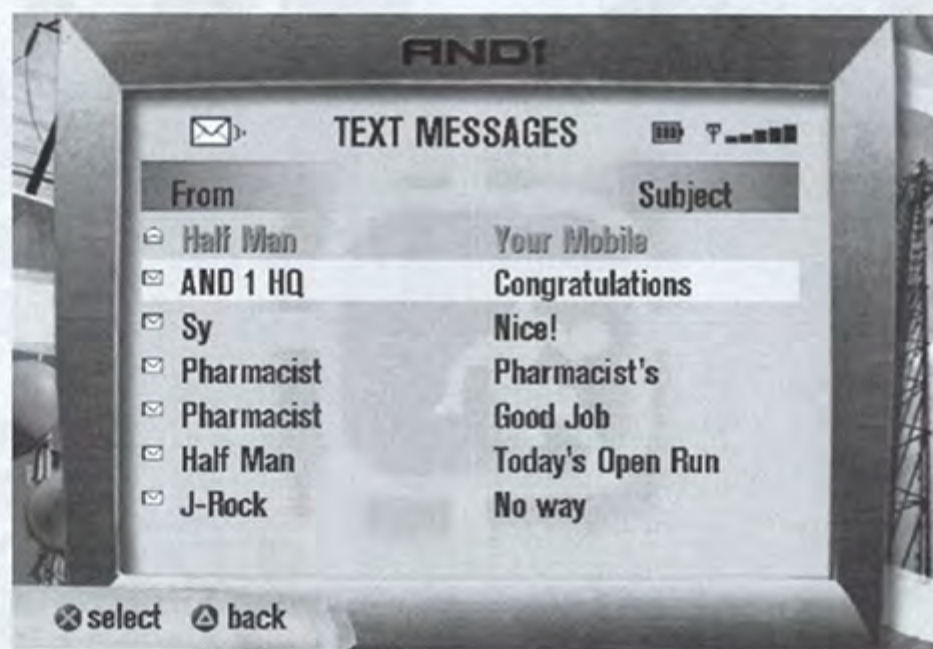

Side Games

Each city on the Mix Tape Tour will have a series of side games with the AND 1 players, usually before and after the Open Runs. These games have different rules than the Open and Main Runs, and require you to face certain goals. Achieve these goals and beat your opponents, and you will be rewarded. Lose, and it's push-up time...

After you complete the side games in the AND 1 Mix Tape Tour mode, you can replay any of them by choosing Side Games from the Game Modes menu.

Text Messages

Half Man Half Amazing will give you a text messaging mobile phone at the end of the first city. If you have a new message, an icon will appear next to the Messages option in the Tour Hub. Be sure to check your messages; the AND 1 players don't like to be ignored!

To read your messages, use the left analog stick or the directional buttons to select a message, and press the **X** button

to read it. When you are finished reading your message, press the Δ button to return to the Text Messages screen.

New messages will have a closed envelope icon next to them, and read messages will be grayed and have an open envelope.

You can engrave your signature into Streetball lore by creating your own custom Breakdown move with the Create-a-Move editor.

Setting up Your Move

Every custom breakdown resides in a list. When you go to the Create-a-Move screen, you will need to create a new move list or select an existing list where the move will go. Once you have chosen a list, you can select a name for your new move or edit an existing move.

You can create up to eight lists with up to eight moves in each, for a total of 64 custom breakdown moves.

Note: You can only have one list of moves activated per game. To activate your list for a quick game or pickup game, go to the Controller Selection screen and move up or down with the left analog stick. To activate your list in Story mode, go to the My Baller screen, highlight Move Lists, and move left or right with the left analog stick.

ONLINE MODE

Wanna prove your Streetball skills to the world? Take your game online and earn your respect by challenging the best ballers out there.

Setting Up for Online Play

AND 1 Streetball online functions only through a broadband (DSL or cable modem) connection. In order to play online, you will need the following items: a Network Adaptor (Ethernet/modem)(for PlayStation®2) installed, an active Internet connection via your own Internet service provider (ISP) account, and a memory card (8MB)(for PlayStation®2) with at least 94 KB free space. Prior to playing online, you will need to set up a Your Network Configuration file. AND 1 Streetball includes a Network Configuration GUI for setting up this file.

Note: When saving and loading Your Network Configuration file, you must use MEMORY CARD slot 1.

Note: After using the included Network Configuration GUI, the RESET button functions differently in AND 1 Streetball. To put the console into standby mode, tap the RESET button until the LED indicates in a red color.

Network Adaptor (Ethernet/modem)(for PlayStation®2)

Install the network adaptor (Ethernet/modem)(for PlayStation®2) in your PlayStation®2 game console according to the instructions in its Instruction Manual.

Your Network Configuration File

Press the left or right directional button to scroll through the available ISP settings, and select one for the upcoming online game. The default displayed is the last ISP setting saved to the memory card (8MB)(for PlayStation®2).

Create/Edit Network Configuration

The Network Configuration GUI allows you to create and edit a Your Network Configuration file. When selected, the game shuts itself down while the Network Configuration GUI is loaded. When complete, the game relaunches itself and goes through its normal loading procedure before returning to the Main Menu screen.

Connect

After selecting a Your Network Configuration file, connect to your ISP. If the connection is successful, the Online Menu screen appears.

Caution: Unplug the AC power cord on your PlayStation®2 console before connecting your network adaptor (Ethernet/modem)(for PlayStation®2).

UDP protocol port 1000 is used by the game. UDP ports 6500, 27900, and 27901 and TCP ports 80, 28910, 29900, 29901, 29910, and 29920 are used during the GameSpy® matchmaking process. Ports 80, 28910, 29900, 29901, 29910, and 29920 are used (in TCP protocol) for the connection to GameSpy®. If you have a firewall, you must open these ports to play online. If you use a router with a unique IP address and you want to create rooms and games (so you can host a server), you must route these ports to your PlayStation®2 system.

This is done by activating "port forwarding" on your router. Port forwarding allows your router to forward traffic from a specific port to your PlayStation®2 system's internal address. Port forwarding should be set up for ports 1000 and 6500 for the game to work properly online. Please refer to your router's manual for more information on how to configure port forwarding.

Troubleshooting

If a connection to the network cannot be established:

- The AC power for the PlayStation®2 console is not fully inserted into the AC IN connector. Check that the AC power cord is fully inserted into the AC IN connector.
- The Network Adaptor (Ethernet/modem)(for PlayStation®2) is not properly installed in the PlayStation®2 console. Check that the Network Adaptor (Ethernet/modem)(for PlayStation®2) is properly installed.
- The network is busy. Wait a few minutes and try to access the network again.
- Check that the network cable is properly connected.
