⚠ WARNING: PHOTSENSITIVITY/EPILEPSY/SEIZURES

READ BEFORE USING YOUR PLAYSTATION®2 COMPUTER ENTERTAINMENT SYSTEM.

A very small percentage of individuals may experience epileptic seizures or blackouts when exposed to certain light patterns or flashing lights. Exposure to certain patterns or backgrounds on a television screen or when playing video games may trigger epileptic seizures or blackouts in these individuals. These conditions may trigger previously undetected epileptic symptoms or seizures in persons who have no history of prior seizures or epilepsy. If you, or anyone in your family, has an epileptic condition or has had seizures of any kind, consult your physician before playing. IMMEDIATELY DISCONTINUE use and consult your physician before resuming gameplay if you or your child experience any of the following health problems or symptoms:

- dizziness
- altered vision
- eye or muscle twitches
- loss of awareness
- disorientation
- seizures
- any involuntary movement or convulsion

RESUME GAMEPLAY ONLY ON APPROVAL OF YOUR PHYSICIAN.

Use and handling of video games to reduce the likelihood of a seizure

- Use in a well-lit area and keep as far away as possible from the television screen.
 - Avoid large screen televisions. Use the smallest television screen available.
 - Avoid prolonged use of the PlayStation®2 system. Take a 15-minute break during each hour of play.
 - Avoid playing when you are tired or need sleep.
-

Stop using the system immediately if you experience any of the following symptoms: lightheadedness, nausea, or a sensation similar to motion sickness; discomfort or pain in the eyes, ears, hands, arms, or any other part of the body. If the condition persists, consult a doctor.

WARNING TO OWNERS OF PROJECTION TELEVISIONS:

Do not connect your PlayStation®2 system to a projection TV without first consulting the user manual for your projection TV, unless it is of the LCD type. Otherwise, it may permanently damage your TV screen.

Cabela's **DANGEROUS HUNTS 2009**

Adrenaline

As you find yourself in dangerous situations, you will build up a store of adrenaline that can be used when needed. It will slow down your perception of time when used, allowing for a perfect shot even against moving targets.

Melee Actions

If you miss your shot, you may find yourself up close and personal with a very angry animal. Follow the prompts that appear on the screen to escape with your life, but be fast because you only have a short window to perform the required input. Note that depending on the control style you are using, these prompts will change.

Baiting

As many dangerous game animals are carnivorous, sometimes the carcasses of other animals can be used to draw your target. If an animal can be picked up as bait, a hand icon will appear when near it, and you can press the action button to pick it up. It will be added to your Gear Menu.

An icon will appear on your screen when you are in a good area to use the bait. Press the SELECT button to go to the Gear Menu and use it. Once it is placed, be patient and your target should appear.

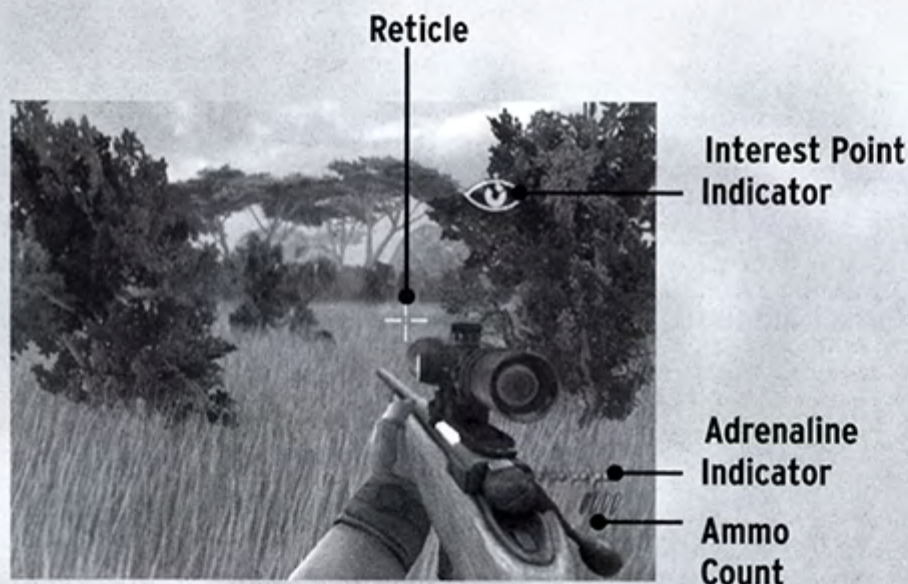

Stealth

To remain quiet when approaching animals, crouch and move slowly, and they will be less likely to see you.

Cabela's DANGEROUS HUNTS 2009
