INTRODUCTION

Prepare to embark on an adventure of epic proportions where witches streak across menacing skies, armored bears fight to defend their kingdom, and evil Gobblers have captured your friend and carried him off to a frozen wasteland. As the spirited Lyra Belacqua and the powerful Iorek, you will plunge into a realm of strange beasts and high adventure when your uncle - the mysterious Lord Asriel - is imprisoned and your best friend Roger is kidnapped.

Leaving the safety of Jordan College at Oxford, you must explore the four corners of this fantastic realm on a journey of exploration, collaboration and discovery...

CHARACTERS

LYRA

Lyra is a spirited tomboy who was brought up in Jordan College, Oxford. She prides herself on her capacity for mischief, as well as her proclivity for adventuring. Lyra is the heroine of the story and the bearer of the Alethiometer, an ancient, mysterious artifact that can see the Truth.

PAN

Pan is Lyra's dearest companion. The embodiment of her soul, Pan is a dæmon that can transform into four different creatures throughout this quest as he helps Lyra reach otherwise inaccessible areas, and helps her solve deadly puzzles.

IOREK

One of the mighty armored bears of Svalbard, Iorek strikes a deal with Lyra when she helps him recover his Sky Iron armor. Iorek agrees to help Lyra and fight by her side with unsurpassed devotion.

USING LYRA

Pan's Current Form.

Pan's Available Forms.

Courage Gauge.

Lyra is the main character of *The Golden Compass*™. She's very agile and clever, and excels at solving puzzles and exploring her surroundings.

In contrast to Iorek, Lyra prefers to use her wits to fool her enemies. When enemies appear, she prefers to avoid them by using Actions to hide behind crates & desks. Sometimes she has a limited amount of time to escape from an area or find a hiding place before being caught. When an enemy spots Lyra, she can try to use objects called Collectibles to escape. There are 16 Collectibles in the game, and only Lyra can gather them. For more information, see Collectibles, pg. 9.

When Lyra gets attacked by enemies, she loses Courage. You will find orbs of Courage scattered throughout most of the stages. Collect three orbs and Lyra will get another unit of Courage; she can hold up to 10 units in all. Lots of Courage helps when you're trying to figure out a difficult jump or puzzle, so collect as many orbs as you can.

Lyra can also gain information and other valuables by interacting with other characters. Sometimes she can play a Deception mini-game to gain rewards and Courage by outwitting characters.

❧ USING LYRA (CONTINUED) ❧

In her journal, Lyra keeps track of your game progress, and other information you've gathered. The most important information she gathers involves Alethiometer Symbols. You will need to use this information during Alethiometer sequences.

Finally, she can use her dæmon Pan's special abilities. Pan helps Lyra explore levels by helping her find objects, or reach areas she couldn't on her own. Pan can change into multiple forms that have different abilities, so it is wise to explore each one.

❧ USING PAN ❧

Pan is Lyra's dæmon, a manifestation of her spirit. Pan can take the shape of four different animals, and each animal grants Lyra a special power that helps her on her journey. You begin with the basic Ermine form, and unlock others as you proceed through the adventure.

PAN'S FORMS

Ermine: This form has the Ermine Insight ability. Using it reveals areas where Lyra can use Actions to solve a puzzle or find objects. While in this form, Pan can also use a special ability to chew through ropes.

Sloth: Pan's Sloth form possesses the Swing ability. Lyra can use Pan's Sloth form to grab ahold of narrow branches and swing from them. The Sloth helps her climb up to difficult areas and reach otherwise inaccessible items.

Hawk: Pan's Hawk form has the Glide ability. With it, Lyra is carried safely across pits and down from high places. Use the Hawk form when traversing high, dangerous areas.

Wildcat: Pan's Wildcat form grants him the Dash ability. Lyra can use this to evade enemies quickly by rolling swiftly away from them. It also lets Lyra climb certain walls and nets, giving her access to more areas. Finally, Lyra can use Pan in his Wildcat form to slide down certain special surfaces.

USING IOREK

The other hero of our adventure is the powerful Ice Bear warrior, Iorek. He's a very strong fighter, able to send most enemies reeling with a few blows. He's not invincible though, so it's important to keep an eye on this Health. When he takes damage, he loses Health. If he loses all of his Health, it's Game Over. You can improve Iorek's defenses against enemy attacks by gathering Sky Armor and filling up his Armor Gauge. Special Bloodmoss, found in tucked away places, can refill Iorek's Health.

Iorek has a variety of physical attack abilities and combos including grabbing enemies and tossing them at each other. In addition, Iorek collects Rage orbs which can be found by destroying objects and opponents. When Iorek's Rage Meter is full, he can use a powerful super attack that damages everything around him by pressing the **○** button.

LYRA'S JOURNAL

You can bring up Lyra's Journal with the **SELECT** button at any time, or from the Pause Menu.

You'll find it's an important tool for making progress, and good for reminding yourself of your tasks in a given mission. When you've beaten the game, you can read it like a book and remind yourself of everything you did and learned, just like a real journal.

LYRA'S JOURNAL (CONTINUED)

The information in Lyra's Journal is split between four "tabs". You can see which one you're currently reading by checking the top of your screen, where your current tab is highlighted. You can select which tab you want to read by using the **L1** and **R1** buttons, and then flip through the pages by pressing the left analog stick or directional buttons.

Tasks: The Journal is a handy place to be reminded of what you need to do next in the game. Go to this part of the journal if you ever find yourself lost.

Information: As you progress, Lyra fills in more information entries here. The information tab also contains pictures of key locations you've been through. After you've completed the game, it will record the entire story of *The Golden Compass*™, and you can read it whenever you like.

Questions: Go to this tab when you need to ask the Alethiometer a question. Click on a question to begin an Alethiometer sequence. See the Alethiometer section below for details.

Symbols: This tab is absolutely essential for using the Alethiometer. It lists all of the Alethiometer's Symbols that you've unlocked in the course of your game, along with all of the information about their meanings. You'll need to use this information to correctly ask the Alethiometer questions, and doing so is required in certain parts of the game.

THE ALETHIOMETER

First hand: Points to symbol that appears in upper-left corner of the screen.

Second hand: Points to symbol that appears in upper-right window.

Third hand: Points to symbol that appears in lower-left window.

Fourth hand: Divining hand.

The Alethiometer is a helpful tool, and using it is like solving a puzzle. Each of the three windows displays a meaning. To get the correct answer from the Alethiometer, you must point the hand to the window that corresponds to the correct symbol.

Note that the "third hand" (bottom Symbol / Meaning) will always point to the correct symbol automatically if you've discovered it in the game. This will give you an added advantage.

To figure out how the Alethiometer is answering your question, you have to play the Divining Game. Depending on how many symbols you matched correctly, the Divining Game may be easier or harder. The goal of this part of the game is to keep your “focus” (the circle of light) centered on the Alethiometer. When the fourth hand stops spinning, you will be prompted to press a face button within a given time. If you press it on time, the hand spins again. Perform this step successfully two more times, and you get an accurate reading from the Alethiometer. If you cannot complete all three Divining sessions, or your “focus” veers off-screen, you will fail the objective and must repeat it. If you input the correct symbols, controlling the focus is fairly easy. If you miss one or two symbols, controlling it can become very difficult.

Throughout your game, you can find new information on the meaning of the symbols by interacting with characters and objects. This information is stored in Lyra’s Journal, and it will be useful when trying to solve Alethiometer puzzles. See if you can discover them all!

PICKUPS AND COLLECTIBLES

Both Lyra and Iorek can collect objects in the environment to replenish lost Courage / Health (for Iorek, this also includes Armor, and Rage), or aid them in their progress through the adventure. In addition, these items may contain information, such as the meanings of Alethiometer Symbols, details on enemy behavior, or other helpful knowledge.
