SAVING YOUR GAME

There are various points throughout the Open Ocean where you can save your game. A sunken anchor identifies these points. One game save will require 80 KB on your memory card (8 MB) (for PlayStation®2). You can also save your game at the end of every Story Mission.

MISSION TYPES

There are two different mission types in *JAWS Unleashed*—Story Missions and Side Challenges. Each mission has a distinctive map icon that identifies what type of mission it is.

Story Missions

Story Missions consist of 10 individual chapters that advance the **JAWS** plot. A cinematic will introduce the mission once you enter the map area where the next Story Mission is available.

Side Challenges

You can voluntarily choose to play Side Challenges that are scattered throughout Amity Island. To begin a Side Challenge, swim into the glowing buoy. When you enter the area, the objective appears and you are prompted to activate the challenge. To exit the Side Challenge, swim away from it. You can try Side Challenges as often as you like.

All Side Challenges have three levels of difficulty: easy, medium and hard. If you complete a challenge on easy or medium, the next time you enter the same type of Side Challenge it will automatically begin at the next difficulty level.

POINTS SYSTEM

As JAWS, you are awarded points for completing Story Missions and Side Challenges. You also earn points for eating, destroying and picking up collectibles. Destroying or collecting items earns minimal points, but higher totals are awarded when you complete a Story Mission or Side Challenge.

Mayhem Points

Earned mayhem points can be used to upgrade shark abilities. To check your point total, press the  button to bring up the Pause Menu.

Points for Collectibles

You can collect license plates and treasure chests around the island and through Story Mission locations. If you collect all items, you receive bonus points.

NOTE: Bonus points are also awarded for finding rare items. Collect four tin cans within a level to unlock JAWS movies.

COMBAT

There are a range of moves you can connect to create deadly attack combinations as **JAWS**. Initially, you can only use basic attack moves and combos, however, once you gain points and increase **JAWS**' abilities, you learn new devastating moves.

NOTE: All indicated controls are for the default configuration.

BASIC MOVES

Bite

The bite is **JAWS**' most common attack. Move the left analog stick in any direction while pressing the **R1** button to bite in a desired direction.

Charge Attack

Tap the **L1** button to make **JAWS** dart forward at an accelerated speed and head butt whatever is in his way. Hold the **L1** button to charge the Charge Meter. The longer you hold it, the greater the strength of the charge and head butt. **JAWS** will also charge when you hold the **L1** button and then quickly slide the left analog stick down then up.

Tail Whip

Tap the **L2** button to make **JAWS** perform a tail whip. Hold the button to charge up the Tail Whip Meter; the longer you hold it, the greater the strength and velocity of the tail whip. Move the left analog stick left/right in conjunction with the **L2** button to tail whip in a particular direction.

Stealth Surface Attack

Press and hold the **R2** button when a victim is near the surface to make **JAWS** grab and hold it without being seen.

After grabbing the victim, move the left analog stick left/right to drag the victim back and forth across the water. Once you release the **R2** button, **JAWS** pulls its victim down beneath the water's surface. This move can only be used on humans and dogs; it cannot be used on boats or other large objects.

NOTE: If performed correctly, this attack will incite terror amongst nearby humans.

Underwater Dodge

Press the **○** button in conjunction with a direction on the left analog stick to perform an evasive dodge in a particular direction.

Target Lock

Press the **Ⓜ** button to lock onto a target. While locked, use the directional button left/right to switch between targets. While locked, use the directional button up/down to switch between specific parts of a human target.

ADVANCED MOVES

JAWS can also perform more advanced combo moves when basic moves are combined with additional buttons.

Hold

Press and hold the **R1** button to make **JAWS** hold any object he bites for an extended period of time. Use this move to torture enemies and carry objects from one place to another.

Chomping

Tap the **R1** button repeatedly to make **JAWS** tear whatever is in his mouth to shreds. Be advised that certain enemies can escape from a chomping combo between button presses.

Swallowing

While holding a victim in its mouth, **JAWS** can swallow it if you press and hold the **R1** button. Repeat until it is completely eaten. Note that certain enemies can escape from a swallow attempt between button presses.

Shake and Tear

JAWS can shake a victim so violently that it rips apart in its mouth. While holding a victim, move the left analog stick quickly and repeatedly to the left and right until it is torn apart.

Throw

Hold a victim in your mouth and press the **L2** button to throw it. Alternatively, use a Charge Attack with the **L1** button and during the attack release the bite. The more you charge the Charge Meter, the farther you can throw your victim.

MOST ADVANCED MOVES

These are the most deadly and unique combos that **JAWS** can perform. These four moves are unlocked as you purchase ability upgrades.

Corkscrew Attack

Once the Charge Attack and Tail Whip Meters are fully charged, release the **L1** button (charge) first and then the **L2** button (tail whip) to perform a corkscrew attack. If **JAWS** hits an object or enemy, he inflicts severe damage.

Body Bomb

Charge out of the water then quickly move the left analog stick up. **JAWS** will spring out of the water and perform a half rotation leap. If timed correctly, **JAWS** can land on targets above the water and smash them apart.

Surface Throw and Catch

JAWS throws a victim into the air and then charges to catch it again in midair. While dragging a victim with the Stealth Surface Attack, press the **R1** button.

Power Tail Whip

JAWS releases a victim and then smacks it far with its tail. Charge up your Tail Whip Meter to its maximum, grab and hold a victim in your mouth, then release the **R1** and **L2** buttons as you release your victim.
