WARNING: READ BEFORE USING YOUR PLAYSTATION®2 COMPUTER ENTERTAINMENT SYSTEM.

A very small percentage of individuals may experience epileptic seizures when exposed to certain light patterns or flashing lights. Exposure to certain patterns or backgrounds on a television screen or while playing video games, including games played on the PlayStation®2 console, may induce an epileptic seizure in these individuals. Certain conditions may induce previously undetected epileptic symptoms even in persons who have no history of prior seizures or epilepsy. If you, or anyone in your family, has an epileptic condition, consult your physician prior to playing. If you experience any of the following symptoms while playing a video game — dizziness, altered vision, eye or muscle twitches, loss of awareness, disorientation, any involuntary movement, or convulsions — IMMEDIATELY discontinue use and consult your physician before resuming play.

WARNING TO OWNERS OF PROJECTION TELEVISIONS:

Do not connect your PlayStation®2 console to a projection TV without first consulting the user manual for your projection TV, unless it is of the LCD type. Otherwise, it may permanently damage your TV screen.

USE OF UNAUTHORIZED PRODUCT:

The use of software or peripherals not authorized by Sony Computer Entertainment America may damage your console and/or invalidate your warranty. Only official or licensed peripherals should be used in the controller ports or memory card slots.

HANDLING YOUR PLAYSTATION®2 FORMAT DISC:

- This disc is intended for use only with PlayStation®2 consoles with the NTSC U/C designation.
- Do not bend it, crush it or submerge it in liquids.
- Do not leave it in direct sunlight or near a radiator or other source of heat.
- Be sure to take an occasional rest break during extended play.
- Keep this compact disc clean. Always hold the disc by the edges and keep it in its protective case when not in use. Clean the disc with a lint-free, soft, dry cloth, wiping in straight lines from center to outer edge. Never use solvents or abrasive cleaners.

Getting Started

Note: Illustration may not match all PlayStation 2 console types. For owners of SCPH-70000 series PlayStation 2 systems, refer to the setup instructions supplied with your

Set up your PlayStation®2 computer entertainment system according to the instructions in its Instruction Manual. Make sure the MAIN POWER switch (located on the back of the console) is turned ON. Press the RESET button. When the power indicator lights up, press the OPEN button and the disc tray will open. Place the killer7™ disc on the disc tray with the label side facing up. Press the OPEN button again and the disc tray will close. Attach game controllers and other peripherals, as appropriate. Follow on-screen instructions and refer to this manual for information on using the software.

Memory Cards

To save game settings and progress, insert a memory card (8MB) (for PlayStation®2) into MEMORY CARD slot 1 of your PlayStation®2 system. You can load saved game data from the same memory card or any memory card (8MB)(for PlayStation®2) containing previously saved games.

DUALSHOCK[®]2 ANALOG CONTROLLER CONFIGURATIONS

Prologue

1998 All international disputes resolved, July 3rd marked the celebration of the birth of a global community that brought about true peace across the globe.

2000 The great powers began peace-keeping activities on a global scale under the banner of suppressing terrorism, completely shutting down all air transport and getting rid of every network terminal, all in the short span of two years.

2002 A network of intercontinental expressways opened, spanning the oceans and bridging the continents.

Under Harman's Name

2003

An intercontinental delivery system was constructed on a massive scale, nuclear energy was banned, all radioactive material was disposed of, and all intercontinental missiles were eliminated, removing all threats to peace from the world. Then, there was a terrorist attack at the signing ceremony for the UN World Security Treaty, with these "Heaven Smile" terrorists bringing the UN to a complete halt. Terrorism in its truest sense – an act done to instill terror. And the world stood in silence at this new fear. So the great powers enlisted the help of the "Killer7", the only ones capable of wiping out the new threat known as the Heaven Smile.

Characters

Harman Smith

The central character of this story, he stands atop the Killer7, a group of professional assassins.

He may look like an old man that requires the care of a nurse, but don't be fooled... He possess the power of a "God-Killer," and once that power is awoken, he becomes unstoppable.

Harman is the only one capable of wiping out the loathsome "Heaven Smile (HS)". He and his long-time rival, Kun Lan, have been at odds for many years.

Weapon: Armor-Piercing Rifle

Garcian Smith

The only member of the Killer7 that can communicate with Harman, he leads the other Killer7 personalities. Friends and various informants call him the "Cleaner."

Although he is usually the one that takes on the jobs, the other assassins usually take care of the actual dirty work. Even so, he possesses the gift of telegnosis and is able to detect HS through their optical camouflage. **He is also the only one that can collect the bodies of fallen Killer7 personalities and bring them back to life**, which is probably why he is known as the "Cleaner."

Weapon: Silenced Handgun

Please let me introduce the cast of characters!

Dan Smith

Watch out for Dan. He is a real "tyrant." He takes pride and bravado to a whole new level, and his exceptional skills in battle make him a well-balanced assassin.

But being the tyrant that he is, his special ability allows him to shoot "Demon Shells," regular bullets imbued with a vicious destructive power. These Demon Shells can rip their target to absolute shreds.

Although Dan is able to open up to Garcian to a certain extent, he doesn't bother hiding his hostility towards Harman, and is just waiting for the perfect opportunity to take his life.

Weapon: Revolver

Kaede Smith

The only member of the fairer sex in the Killer7, Kaede is very shy and withdrawn. Apparently this is why she secretly enjoys zooming in on HS with her scope and shooting their hearts out from afar.

I'm not sure why, but my ex-wife, Mizaru, is serving her. She uses Kaede's blood to **break barriers** and **absorb blood**, and anyone who witnesses it is guaranteed to be overcome with sadness and disgust.

Weapon: Automatic w/ Scope

Characters

Con Smith

The youngest of the Killer7, Con was born blind but has exceptional hearing ability.

Like normal kids his age, he's into army heroes. But unlike those of his age, when things get dangerous he shows off his simple, brutality with the automatic pistols in his hands, relentlessly filling any enemy full of lead.

Being much shorter than the rest of the Killer7 crew, **he is able to pass through areas too small for everyone else.** He can also **run at super-speed for short bursts**, and his **hearing ability** is so advanced that it is **like a sonar that he uses to see hidden areas.**

Weapon: Dual Automatics

Coyote Smith

I do not know about this guy. I don't think he is deserving of a place on Master's Killer7 team.

Why, you ask? Well, he's nothing but an upstart thug, a petty thief. A raging kleptomaniac, he's the top thief among the Killer7.

He can **pick any lock you throw at him in a matter of minutes**, and with **super-human jumping abilities**, he can easily enter any building he wishes. Also, his **Charge Shot** move from his **Special Modified Magnum** revolver possesses a horrifying destructive force.

Weapon: Modified Revolver

Kevin Smith

Weapon: Knife

I do not have much detailed information on Kevin Smith, but I will tell you what I do know. He is capable of quick and nimble movements that don't seem possible with his large, burly frame. It would be a close contest between him and Con. **And rather than firearms, his weapon of choice is a long-bladed knife.**

When he takes off his trademark sunglasses, he becomes **invisible**. He can pass through and pass by anything, enabling him to pass by enemies unnoticed, as well as slip through alarm sensors, making him perfect for tricky situations when stealth is of the utmost importance.

What's more, seeing his special ability in action would totally blow your mind.

Mask de Smith

Weapon: Double Granade Launchers

Just as with Kevin, it boggles the mind how Mask has secured a place in the Killer7, but I do know that he was formerly a big-time pro wrestler on the local circuit before joining Harman. His wrestling days have made him tough, **and he just laughs off any minor damage.** He just has to remember not to be too overconfident.

His weapon of choice is dual mini **grenade launchers**, with immense destructive power blowing through anything within their blast radius. What he brings to the Killer7 group is the ability to use his grenades or devastating "Smith Special" wrestling move to **break through obstacles.**

Characters

Iwazaru

I guess it's my turn, so let me introduce myself. My real name is Wenzel Diel Boris the VIIth, Iwazarskof, or Iwazaru for short.

I have sworn my allegiance to Master Harman, and do my best to provide information to the assassins of Killer7. There are others just like me who are striving to help the Master and the Killer7, so if you happen to see any of them in your travels, feel free to ask them for information.

Travis

Master Harman's first target, Travis. He seems deeply obsessed with Master Harman, and although he does not try to harm him, he always seems to show up wherever Master goes. Sometimes to **speak ill** of master, and sometimes to **offer advice**. It's as if he always knows where Master is headed...

Christopher Mills

Christopher is the only informant able to contact the Killer7. He always has jobs for the Killer7, working through Garcian as a **middleman**...

Meetings between Mills and the Killer7 usually take place on freeway overpasses. He loves cars, and loves to joke around. He also has a serious and careful side, and doesn't seem to like to take big risks.

Kun Lan

The Master's rival, Kun Lan is the **root of all evils**, having created the Heaven Smile terrorists. Apparently Master Harman had killed him once before, 30 years ago, and now he has resurfaced from a long slumber.

And he is back with a vengeance. With his "**God Hand**," embodying the power of the gods, he mass-produces Heaven Smile terrorists and is aiming to bring ruin to the world.

Even so, Master plays chess with him every now and then. For what reason, I cannot even begin to comprehend...

Heaven Smile

These people, touched by Kun Lan's "God Hand," **lose their mind and run wild**. Once they become a "Heaven Smile," they turn into **walking timebombs**, and self-destruct wherever they can find people around.

What's more, they are able to camouflage themselves and disappear into the urban landscape, making them **nearly impossible to see with the naked eye**.

They're **always smiling**. If you hear one of their wicked laughs, watch out, for danger is near.

Game Rules

Beginning a New Game

After you boot up the game, the intro movie will start playing. Press the START button to jump to the Start Menu.

Game Modes

NEW GAME

Begin a new game from the beginning

After selecting from one of two difficulty levels, the intro to the story begins and you will start a new game.

Normal Mode: Normal

Lower difficulty level, with a wealth of hints to help you along the way, as well as lots of blood to absorb. Enemies also have lower hit points. What's especially noteworthy is that the critical points on the enemies are shown automatically during enemy scans. With this mode, even the most inexperienced gunman can become a top hitman.

Hard Mode: Deadly

Higher difficulty level, with limited hints, less blood to absorb, and enemies that are much tougher. Also, when in the heat of battle, critical points don't show up automatically. You'll have to rely on your own skills and prowess. Kill or be killed.

CONTINUE

Continue from a previously saved game

Select a file with a previous save file to load it and continue the game from there.

Game Over

The Heaven Smile suicide bombers will try and self-destruct themselves to kill you. Keep an eye on the "eye" in the top left corner of the screen, as it shows your remaining health. As you take damage, the eye will close gradually. **If it closes all the way while using Garcian, it's all over - GAME OVER.** If you are using a Killer7 personality other than Garcian, that character will simply be rendered temporarily unconscious*.

Actions

The following explains the actions covered in the Tutorial when you begin a new game.

Movement

Hold the  button down to move the character around.

There are also "Junctions" that present different paths you can take to different locations by highlighting it and pressing . Also, when the camera position is changed during cutscenes, you can readjust the camera with the **R2** button.

180 Turn

Press the  button to turn around 180 degrees. Use this to get away from enemies or to turn around and go the way you came. If you press the  button while moving, your turn will become a Quick Turn.

Reload **Right analog stick**

Move the right analog stick in any direction to reload your weapon. While reloading, you will be unable to move, so watch your ammo at all times.

*Each persona has different weapons, meaning that the time required to reload will also differ. And some weapons never need to be reloaded.

Scan R1 → L1

Enemies are **invisible thanks to their optical urban camouflage**, and your attacks do not affect them. So, while holding the **R1** button, press the **L1** button as well to perform a scan and **bring any enemies into view** so you can attack them.

Close-Range Target Acquire R1 → △

While in an attack stance, press the **△** button to lock on to the nearest enemy and automatically set your sights on it.

Attack Stance / Fire Weapon R1 → X

The screen will switch to a first person view while you hold the **R1** button, putting the character into an attack stance and allowing you to aim your weapon(s). While in this attack stance, use the left analog stick to aim, and press the **X** button to fire using the weapon you have equipped.

Target Switch Directional buttons

While in an attack stance, if there are multiple enemies, you can press the directional buttons in the direction of the enemy you wish to lock on to and automatically set your sights on it.

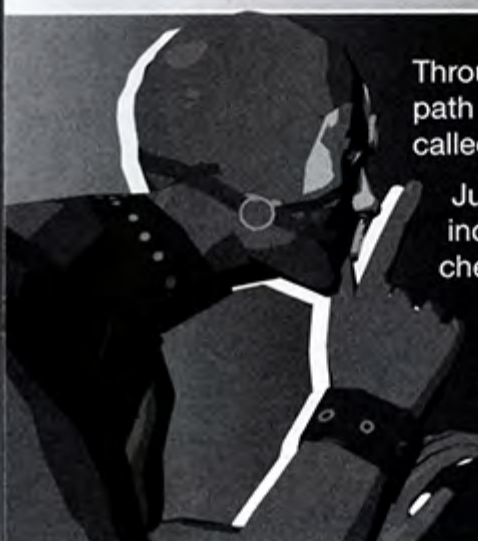

Special Ability □

Each Killer7 persona possesses a unique special ability. Some can be used at any time, and others can only be used in certain situations. There may be times during the story where the special ability of a character is necessary to proceed.

Ex.) This shows Kaede Smith's special ability, which she uses to break barriers.

Junctions

Throughout the game, you will come to places where the path splits and you can go in multiple directions. These are called Junctions.

Junctions let you decide which way to go, but also may include items you can pick up, traps to defuse, and checking certain locations.

To make a selection, move the left analog stick in the direction of your choice. The path you choose will change colors.

There are also new Junctions that open up once you do certain things, so if you're feeling stuck, retrace your steps and search for any new paths or options.

Clear - Path not selected

Blue - Path already selected

Grey - Path not selected, but where you have already been

TIP: Hold down the **X** button the whole time you're moving, and when you come to a Junction, just move the left analog stick in the direction you want to go. That should make it a lot easier.

Harman's Room

There will be a "Harman's Room" in each stage. Here, Master's maid, Samantha, is always waiting to serve you. You can also use the TV in the room to save your progress, convert blood into serum, and change personas. Iwazaru is also in the back of the room, ready to serve you 24/7, with all sorts of information.

TV

Using the TV in the room, you can convert blood you've collected into Serum, use that Serum to power up the Killer7 personas, and switch to any persona, including Garcian, who is normally unselectable from the Sub Menu. (see page 22)

Saving

Upon entering the room, you will find Samantha. You can save your game here, but only when Samantha is in her maid's uniform. To save your game select save from the TV screen.

Iwazaru

By speaking to Iwazaru in the back of the room, you can learn about the game, get info on enemies and allies, view a log of conversations had with Iwazaru during the game, and more.

*memory card (8MB)(for PlayStation®2)(sold separately) with at least 63KB of free space (per file) required to save progress.

*You can save up to 7 save files

Making Serum

When you defeat Heaven Smile enemies, you can absorb their blood, and then convert it into Serum, which can be used to power up characters, using the "Blood Channel" on the TV in Harman's Room. Turn the TV to channel "B," and then press the **X** button to begin making Serum. Serum is measured by dl (deciliters), and it takes 40 dl to make one ampule, which is required to build up personas.

*The amount of Serum that can be produced is limited in each stage.

Character Switching and Leveling Up

In Harman's Room, there are channels other than the Blood Channel dedicated to the different Killer7 personas. Change channels and press the **X** button to bring up the menu.

WAKE UP

Wake up a sleeping persona to switch to*. Note that you must kill a certain number of HS enemies before doing this.

SELECT

Switch your current persona with the selected persona.

*Garcian can only be selected from inside Harman's Room sometimes.

SKILLS

Use Serum ampules to raise the abilities of the different personas.

POWER	Affects how much damage each attack does.
SPEED	Affects attack speed, how fast the weapons fire.
WAVER	Affects aiming and shot accuracy.
CRITICALS	Affects one-hit kills and critical hits.
INVISIBILITY	Affects the amount of time you stay invisible (Kevin only).
RANGE	Affects the blast radius (Mask only).

ABILITIES

Shows abilities available to each persona.

Death & Resurrection

When you are controlling any character other than Garcian, and that character dies, a bag with the head of the dead character appears on the ground of that location, and you return to the last Harman's Room you accessed that has a TV. Here you can change personas and continue the game.

In order to resurrect the character that died, you have to use Garcian to collect the body bag from that location. **Garcian is the only one** that can resurrect fallen personas. Just head to the area and he will do it automatically. However, if you die while playing as Garcian, there will be no one left to recover the body, meaning it's 'game over' for you.

Once Garcian collects the body, you will be taken back to the same Harman's Room as before, and on the TV screen will be the body bag of that character on the character's own channel. Press the **X** button and select "RESURRECT". Then **tap the X button repeatedly** to fill the gauge and bring the persona back to life.

Sub Menu (START button)

Press START button during the game to open the Sub Menu. Here you can change personas, check how much blood you have collected, restore your health, view items you have collected, and read the Pigeon Notes you have found.

Smiths/Personalities

To switch personas, highlight the one you want to switch to and press the **X** button.

*If a persona is shown in grey, you must wake that persona up from Harman's Room to switch to it.

*You must be in Harman's Room to switch to Garcian, and when you are playing as Garcian, you cannot switch to anyone else.

Items

View items acquired in that stage, and put different rings on.

Highlight an item and press the **○** button to check it out or switch to that ring.

To select a section of the menu, move the left analog stick in that direction, and then press the **X** button. Press the **△** button to back out.

Memos

During the game you will find Pigeon Memos at various Junctions, which provide a lot of useful information.

Here you can go back and read all of the Pigeon Memos you have collected so far by highlighting one and pressing the **X** button.

Dear Emir,

It is a pleasure to make your acquaintance, and many thanks for choosing me for the job. My name is Johnny Gagnon, the twice known Speedster.

XT

Blood

Check to see how much blood you have collected from enemies. There are two types of blood in the game, each with its own use.

Thick Blood:

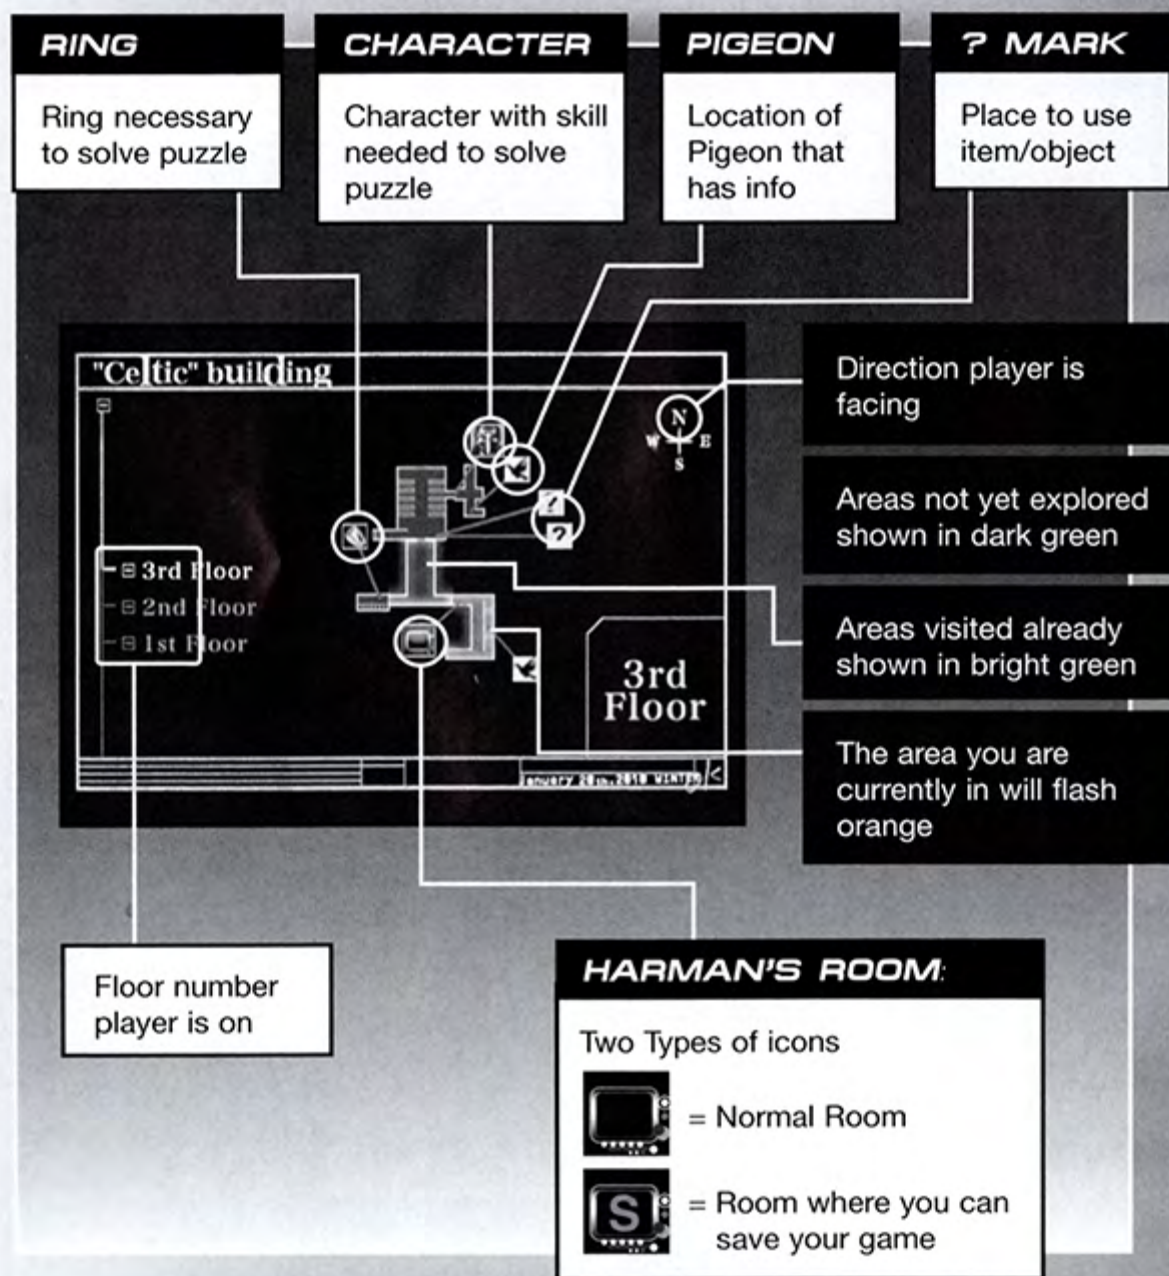

Collected in the left tank, Thick Blood is used in **Serum** needed for leveling up the characters, or to **trade for hints** and info during the game.

Thin Blood:

Collected in the test tube on the right, it can **restore your health** (press the **X** button to use it), or allow you to use **special abilities**.

Map

Press the  button during the game to bring up the Map Screen. Depending on the difficulty level, the information listed on the map will differ slightly.

Gameplay Hints

These hints may help you along the way. If you get stuck, read through these again to get some new ideas on what to do.

Q1: How do I collect more blood from enemies?

A1: You cannot collect any blood when it comes out white. To get the most blood, aim for their **critical points**. If your aim is good, you can **kill them in one shot**, and also collect a ton of blood. Critical points will glow on the enemies' bodies when you have your sights near them. You can also shoot their heads or limbs for blood, so try shooting limbs first, then go for the critical points.

Q2: I can't seem to get any further.

A2: You may have forgotten to solve a puzzle or pick up a necessary item. Try using the **Map**  to see if there are any areas you haven't visited or items you haven't collected yet. There are also other spots where you will have to use one of the Killer7 persona's **special ability** to proceed. Listen for the sound in certain areas, as it may provide a clue.

Q3: I can't seem to defeat this enemy.

A3: Some enemies cannot be defeated through normal attacks. In such situations, you can get **hints** from conversations with **Iwazaru** or other characters. You can view past conversations with Iwazaru inside Harman's Room.

Q4: I don't know where the enemies are coming from.

A4: The enemies use **optical camouflage** to blend in with their surroundings, making them very difficult to spot. But you will always hear a **high-pitched laugh** when they are near. If you hear the laugh, **press the R1 button** and **quickly scan the area for enemies with the L1 button**.

Gameplay Hints

Q5: The enemy always gets so close, I can't keep up.

A5: Of course there are a lot of rabid enemies stalking you, and if you don't keep them at bay, they can get in your face and really spoil your day. So try these **secret moves** if you find yourself in a pinch. Once you level up far enough, you'll learn some cool moves, including the Down Attack and the Counter Attack. The **Down Attack** lets you take a deadly pot shot at an enemy crawling towards you if he gets too close for comfort. The **Counter Attack** lets you press the **○** button the moment an enemy jumps at you and you see the flash. That move's sure to teach 'em to know better.
