DESCRIPTION OF SYSTEMS

All commands introduced in the following description are in their initial settings for characters moving from the left to the right of the screen.

THE 3 COMMAND MODES YOU'RE FREE TO CHOOSE FROM

In "The King of Fighters '98 Ultimate Match" you can choose any of 3 different Command Modes with varying move actions, evasion actions, and power gauge types. The way you battle in matches changes dramatically based not only on your player but the Command Mode you choose.

MAIN CHARACTERISTICS OF ADVANCED MODE

Advanced Mode (ADVANCED) is ideal for players who prefer aggressive combat, boasting a system in which move and evasion actions are active and the power gauge automatically increases by continuing attacks.

DASH

Move as you run forward.

EMERGENCY EVASION (FORWARD/BACKWARD)

Move forward or backward while rolling.

ADVANCED GAUGE

The power gauge increases with each attack to automatically stock a Power Stock when it reaches MAX. You can stock up to 5 of these. Using these Power Stocks enable various attacks and moves.

MAX POWER ACTIVATION

Using 1 Power Stock puts your character in a MAX Power state for a limited time only.

CONDITIONS FOR ACTIVATING SUPER SPECIAL MOVES

Using up 1 Power Stock lets you use Super Special Moves that surpass Special Moves in power.

CONDITIONS FOR ACTIVATING MAX SUPER SPECIAL MOVES

Enter a Super Special Move command when the character is in the Power MAX condition and you have Power Stocks. Or you can also activate this by using up 3 Power Stocks and entering a Super Special Move command while pressing the punch button simultaneously ($\square + \triangle$ in the initial settings) or the kick button simultaneously ($\times + \circ$ in the initial settings).

MAIN CHARACTERISTICS OF EXTRA MODE

Extra Mode (EXTRA) has tight move actions and evasion actions to let you plot counter-attacks. It also lets you increase the Power Gauge at will and is suited to players who prefer defensive battles.

STEP

Lets you smoothly move (step in) toward opponents to instantaneously decrease your distance.

ATTACK EVASION

Lets you evade and dodge attacks on the spot. Furthermore, pressing an attack button (□, ×, △ or ○ in the initial settings) while evading an attack lets you use counterattacks.

EXTRA GAUGE

Increase the Power Gauge level to MAX by taking attacks or with Power Build (□+×+○ pressed down simultaneously in the initial settings) to produce a Stock. You can only store one and use it to enable various attacks and actions.

MAX POWER ACTIVATION

Using 1 Power Stock puts your character in a MAX Power state for a limited time only.

CONDITIONS FOR ACTIVATING SUPER SPECIAL MOVES

Using up 1 Power Stock lets you use Super Special Moves that surpass Special Moves in power.

CONDITIONS FOR ACTIVATING MAX SUPER SPECIAL MOVES

This can be activated when your power reaches MAX and your life energy gauge flashes simultaneously.

MAIN CHARACTERISTICS OF ULTIMATE MODE

Ultimate Mode (ULTIMATE) lets you combine the elements of Advanced and Extra Modes any way you like as far as the move actions, evasion actions, and power gauges go. This is just right for the player who likes doing things his own way.

SELECTION OF MOVE ACTIONS

You can choose either the Dash or Step action.

SELECTION OF EVASION ACTIONS

Select either the Emergency Evasion or Attack Evasion.

SELECTION OF POWER GAUGE TYPES

Select either the ADVANCED Gauge or the EXTRA Gauge.

MAX POWER ACTIVATION

Using 1 Power Stock puts your character in a MAX Power state for a limited time only.

CONDITIONS FOR ACTIVATING SUPER SPECIAL MOVES (MAX SUPER SPECIAL MOVES)

Selecting the ADVANCED Gauge makes conditions the same as the Advanced Mode. Select the EXTRA Gauge to follow the same conditions as Extra Mode.

BACK-UP ATTACKS

In team battles you can have another team member make a back-up attack by using a specific command (□+×+△ in the initial state) when you meet the conditions in team battles described below. There are instances when the affinity between members, though, influences the probability of receiving back-up.

Your character is knocked out or grabbed by your opponent.

All of your characters waiting to fight have not yet been eliminated.

You can see the character waiting to fight on the same screen.
