ADVANCED MOVES

Advanced moves truly master the sweet science of boxing.

MOVING YOUR BOXER AROUND THE RING

With a full move of the left analog stick you can move your boxer around the ring during the fight. A full move allows you to attack your opponent or back away when in trouble. You can also cut off the ring to the left or right when fighting aggressively.

Move toward opponent	left analog stick ↑ (Full move)
Back away from opponent	left analog stick ↓ (Full move)
Circle the ring to the left/right	left analog stick ↔ (Full move)
Lunge	left analog stick (double move in any direction)

EA TIP

Muhammad Ali

Keep moving in the ring. Your success on defense depends on dodging, leaning, and knowing when to step away from your opponent.

MOVE BOXER'S UPPER BODY WHEN FIGHTING TOE-TO-TOE

With a slight move of the left analog stick you can adjust your boxer's upper body when fighting toe-to-toe. By slightly moving the left analog stick your boxer keeps his upper body moving—dodging punches and lunging for power—while holding his position in the ring.

Duck/Crouch	left analog stick ↑ (slight move)
Lean back	left analog stick ↓ (slight move)
Bob left/right	left analog stick ↔ (slight move)

EA TIP

Lennox Lewis

On offense, set your opponent up with a stiff jab and then finish him off with a hook, or a nasty uppercut.

INSIDE EA SPORTS: Choose Inside EA SPORTS from the Main menu and "get in the game."

CREDITS: Find out who made *Knockout Kings 2002* the undisputed champion of the world.

SEASON PREVIEW™: Take an inside peek at the all-star lineup from EA SPORTS for 2002.

STARTING AN EXHIBITION FIGHT

Go toe-to-toe against some of boxing's greatest fighters. 45 boxers are available for you to fight in three different weight classes—any one of them can knock you out.

➤ Press the ✕ button to select your opponent.

To start an Exhibition fight:

1. From the Main menu, highlight MODES and press the ✕ button. The Modes menu appears.
 2. Highlight EXHIBITION and press the ✕ button. The Select Boxer screen appears.
 3. Press the D-Button or press the left analog stick ↑↓ to select a weight class (LIGHTWEIGHT, MIDDLEWEIGHT, **HEAVYWEIGHT**).
 4. After you select a weight class, press the D-Button or press the left analog stick ↔ to choose a boxer in that division. Press the ✕ button to select that boxer for the upcoming fight.
- To view a boxer's stats, press and hold the ● button.

EA TIP

Oscar De La Hoya

Try to look for patterns in the way your opponent attacks. If you can figure out his fight plan, you're on your way to a victory. You'll also have to change your tactics against different opponents. Taking the same approach won't work against every fighter.

- Choose an opponent (or Player 2 can choose a boxer for a two player fight by pressing the **START** button) by following steps **3** and **4**, then press the **X** button to advance to the Select Arena screen.
- To select an arena, press the D-Button or press the left analog stick \leftrightarrow and then press the **X** button to select the desired arena. The Controllers screen appears.
- To choose a boxer, press the D-Button or press the left analog stick \leftrightarrow and position the controller icon under the desired boxer's name.

✧ For a one-player fight, leave a controller icon in the middle and the CPU will control the unassigned fighter.

- Press the **X** button to advance to the ring.

EA TIP

Sugar Ray Robinson

Study your opponent's stats before starting the fight. See what his strengths and weaknesses are and use this to your advantage.

INSIDE THE ROPES

Fight with discipline (because swinging wildly won't win you any titles). Connect with the open shots at your opponent's head, pound the body, and back out of trouble if you're feeling the heat.

GAME SCREEN

Stamina Meter: the Stamina Meter shows how much stamina you have left. Avoid low stamina to ensure your fighter's health recovers at its normal rate

Health Meter: This displays the damage your fighter can take before he'll be knocked down

Round Counter/
Clock

NOTE: Health Meters default to **OFF**. To fight with the Health Meters onscreen, you must turn them **ON** from the Pause menu or Options menu.

FIGHT TO THE FINISH

- ◆ **End Of Round:** At the end of each round an intermission plays showing round highlights or ring card girls. To skip the intermissions, press the **X** button between every round.
- To go directly to the next round, press the **X** button.
- ◆ **Knockdown:** When a fighter gets knocked down, the referee begins the 10 count. Your boxer picks himself up off the canvas automatically, if he can manage before the Ref counts him out.

EA TIP

Joe Frazier

The more efficiently you use your punches the better your fighter performs in the fight. In other words, don't waste your stamina on wild punches.

- To pick yourself up off the canvas with Auto KO Recovery OFF (> *Options* on p. 21), tap the ✖ button repeatedly. Fill the knockdown meter before the 10 count and you're back in. If you fail to fill the meter before the 10 count, the fight is stopped.
- ✧ **End Of Fight:** After the judges tally the final scores, the winner is announced. The Final Stats screen then appears, displaying the final punch totals for the bout.

PENALTIES/STOPPAGES

Watch the low blows and other cheap shots. If the referee catches you, he'll warn you at first and then penalize you with each following infraction. Rack up too many penalties and he'll disqualify you.

- ✧ The referee can also stop the fight if a boxer is cut and bleeding too much.

PAUSE MENU

If the action is getting too intense, take a break and pause the game. The Pause menu also allows you to change the fight camera angle, view a replay of the last few blows, or stop the fight.

- Press the **START** button during the bout to access the Pause menu.
- To change an option from the Pause menu, press the D-Button.
- To select an item from the Pause menu press the ✖ button.

RESUME FIGHT

Get back in the ring and continue fighting.

CAMERA

Select a camera angle from which to view the fight. **Close Up Camera** is the default.

INSTANT REPLAY

View the past 10 seconds of the fight and see the action from every angle and at different speeds.

EA TIP

Sugar Ray Leonard

Go for the knockout punch after delivering a low blow or cheap shot. Your opponent may fall to the canvas.

Instant Replay Screen

- Press the **START** button to return to the Pause menu.

REVIEW STATS

Check out the current fight stats.

CPU/PLAYER SELECT

Toggle Player/CPU control for each fighter (except in Career and Tournament modes).

HEALTH METERS

When set ON, the health and stamina meters of both fighters appear on screen during the fight. The default is set to **OFF**.

THROW IN THE TOWEL

Stop the fight at any point of the match and return to the Main menu. If you decide to throw in the towel, you are automatically disqualified (the disqualification effects your win-loss record in Career mode).

- Press the **START** button (or highlight Resume Fight and press the **X** button) to continue the bout.

EA TIP

Felix Trinidad

Back away from trouble if your Health Meters are getting low, especially near the end of the round. Try to survive the round and regroup during the break.

OTHER GAME MODES

Once you have a few Exhibition bouts under your belt, take part in a Tournament or build a champion in Career mode.

5. At the Player Setup screen the boxer listed at the top of the tournament bracket is controlled by a user (human-controlled fighter). You must select a three-letter name for the user before moving on. Press the D-Button or press the left analog stick \leftrightarrow to select a letter and then press the **X** button to accept.

EA TIP

Ruben

EA TIP

Roberto Duran

When your health meter gets below 50%, you'll feel your fighter's heart beating in the controller. The faster and harder it beats, the closer you are to taking a seat.

 - To load a previously saved boxer, highlight LOAD BOXER and press the **X** button.
4. From the Name Boxer screen, press the D-Button or press the left analog stick **↔** to highlight a letter and then press the **X** button to select. Press the **●** button to finish naming your boxer.
5. To create a name for your boxer's hometown, follow the directions listed in Step 4. When you're done, the Create Boxer screen appears.

EA TIP

Evander Holyfield

9. Next, put on the finishing touches by selecting a face, overall look, fighting stance, special punch, and more. Press the \times button to begin your career.

EA TIP

Fernando Vargas

You can fight your opponents in any order on each tier of the Career Pyramid. If you are having trouble getting past an opponent, try skipping him and coming back to him later when you have improved as a fighter.

ATTRIBUTES

POWER

The greater your rating, the harder your boxer punches.

SPEED

Boost your rating to improve your boxer's quickness.

STAMINA

High Stamina increases your chance of going the distance.

CHIN

Increase your chin rating so your boxer can take the hard punches.

HEART

Give your fighter that "never say die" attitude with a high heart rating.

CUTS

The lower your Cuts rating, the easier your boxer bleeds.

CAREER MODE FIGHTS

Fighter Pyramid

Press the ● button to view a boxer's stats and record

◇ An "X" appears over a boxer you have defeated.

EA TIP

Butterbean

To get an idea on how to create a competitive boxer, press the L1 button during the Create Boxer setup process and study how the CPU randomly set the attributes.

To fight in Career mode:

1. From the Career Main menu, highlight FIGHT and press the **X** button. The Select Fight menu appears.
2. Highlight an opponent and press the **X** button. After a brief pep talk from your manager, the fight begins.

FIGHTING IN CAREER MODE

- ❖ **The Fighter Pyramid:** In the early stages of Career mode, you must start off by fighting one of the six boxers located at the bottom of the Fighter Pyramid. Defeat four of the six, and you can move up a level. At Level 2, defeat four of the five fighters before moving on to Level 3. Defeat all Level 3 boxers, and you get your shot at the title against the champion of the division.
- ❖ **End Of Fight:** If you're good enough to win a fight, an "X" goes over that boxer's mug shot in the Fighter Pyramid indicating that you have defeated him.
- ❖ **Points Reserve:** After every victory, your fighter gets extra points added to his "Points Reserve." Be sure to use these points to increase your boxer's attributes before taking on another fighter. Keep in mind that the closer an attribute gets to 100, the more Reserve Points it costs you to increase it.
- ❖ **End of a Career:** Lose three fights in Career mode before you win the championship belt and your days as a boxer are over with. However, once you become champion your previous losses will be overlooked. Lose three fights while you're defending your championship and you'll be forced into early retirement. Successfully defend your title five times and you will retire as champ.

EA TIP

Bernard Hopkins

Be careful not to punch yourself out. Punches that miss cost more stamina than punches that connect. Also, don't let your stamina drop too much during the fight. Low stamina affects how quickly you recover your lost health and how much damage you do to your opponent.

To save a Created Boxer:

1. After you create a fighter, highlight SAVE BOXER from the Career Main menu and press the **X** button.
2. Press the D-Button or press the left analog stick \updownarrow to save your created boxer to MEMORY CARD slot 1 or MEMORY CARD slot 2 and press the **X** button. Your boxer is saved on your memory card.
