### **PLAY BALL!** **Matchup Screen**

After the Home and Away teams have been determined, you will be brought to the Matchup screen, where Karl Ravech will preview the two starting pitchers. When examining the statistics, compare the Hits, Walks, and Strikeouts to Innings for a broad picture of each pitchers' capabilities.

### **Pitching - Selecting a Pitch**

Each pitcher comes equipped with his real-life assortment of pitches. To select a pitch, press the corresponding button of the desired pitch.

### **Pitching - Pitch Location**

After you have selected your pitch, you now have to select a location in the strike zone (outlined by the white box). Move the **left analog stick** in any direction to aim the pitch cursor to the location where you'd like to pitch the ball. You have a limited amount of time to select your pitch location so choose wisely. After you have confirmed your pitch location, accuracy crosshairs will appear and begin to move.

Try to align the crosshairs as close as possible to accurately pitch to the selected location. The further off the crosshairs are, the farther off the target the actual pitch will be. Be sure to keep an eye on the stamina bar after each pitch. Once the meter begins dropping under the 60% mark, the pitcher's accuracy will become increasingly erratic. If it falls under 25% or so, it might be time to start warming up pitchers in the bullpen.

## Pitching - Fake Target

If you want to conceal the true location of your pitch, use the Fake Target function. This works by moving the **left analog stick** to the desired location, then pressing **R1**.

Once you have used **R1** to select your true pitching location, move the pitch cursor to another location and select your pitch. Align the crosshairs and your ball will be pitched to the location previously selected by using **R1**. This allows you to trick your opponent into looking at the wrong pitch location. Remember, even though your pitch will go to the original target, lining up the crosshairs on the fake target still affects the accuracy of the original pitch.

## Coach's Tip - Don't Throw Meatballs

Although the idea of throwing a fastball with full effort straight down the plate early and often may sound pleasing, doing so will not only tire your pitchers out, but the simplicity of the strategy is easily locked on to by hitters. Therefore, always try to distribute your heaters to different locations, sometimes even outside of the strike zone, to keep a hitter's bat off-balance.

## Coach's Tip - Active Bullpen Management

When you decide to relieve a pitcher, there are some important rules to remember. Always warmup your relief pitcher at least a half inning before you need him or else he'll be cold when you bring him out. Also, be sure not to keep him in the bullpen too long or he will become tired and not have full stamina when he is called to the mound.

## To access the Bullpen screen:

- Press **START** before a pitch to enter the Pause Menu.
- From the Bullpen Menu, choose Substitutions.
- From the Pause Menu, choose Bullpen.

## Defense - Keeping an Eye on Baserunners

Good pitchers know that it's in their best interest to keep baserunners honest. To try a pickoff move, press and hold **L1**, and then press the button corresponding to the base you'd like to throw to. Depending on whether a base is being covered and the size of the lead, you may pickoff the baserunner.

Press and hold **L1** + press  - Pick off 1st base

Press and hold **L1** + press  - Pick off 2nd base

Press and hold **L1** + press  - Pick off 3rd base

If you suspect that a baserunner is on the move during your next pitch, it might be a good time to call for a pitchout. To execute a pitchout press the **right analog stick**.

## Defense - The Hot Zone

When the batter steps up to the plate, you'll notice an on-screen overlay for the pitcher and the batter. Each of these overlays has a Strike Zone graphic. This Strike Zone is divided into nine zones; some of the zones will be in red, some will be in blue, and some will be gray.

These spots represent a batter's strengths and weaknesses in the strike zone. The color gradient, from best to worse hitting ability, is as follows: dark red, gray, and dark blue. When pitching, you'll likely want to avoid the red areas, but on the other hand, you don't want to pitch too often in the blue areas (as a hitter may lock on). You may have to pitch to red zones occasionally, but proceed with caution because pitching over a hitter's hot zone can be costly. When batting, press **R3** to see the hitters 'hot zone' appear over the strike zone.

## Defense - Fielding

Once the ball is put into play, you will automatically be given control of the player that is closest to the ball and is best able to make the play. Look for the player with a name overlay under him to see who you're controlling. Use the **left analog stick** to run toward the ball and make the play. If you need to switch fielders for any reason, press **L1** and you will switch to the next player that is closest to the ball. To execute a speed burst, press and hold **R1**. Note: during a speed burst, the player's boost bar will deplete causing your player to eventually slow down.

- ⊙ - Throw to 1st base
- △ - Throw to 2nd base
- ◻ - Throw to 3rd base
- ⊗ - Throw to Home Plate

Remember that when you throw the ball to any of the bases from the outfield, you can cutoff the throw and redirect it to the base of your liking. Press one of the aforementioned buttons to initiate a throw. Then, while the ball is in the air, press and hold **L1** to have your cutoff man catch and throw the ball to the corresponding base.

One of the most exciting plays in all of Major League Baseball® is robbing a home run. If a ball looks as if it's going to clear the wall, your outfielder may have the opportunity to pull it back in. To have your player scale the wall, use the **left analog stick** to race your outfielder back to the wall, and move the **right analog stick** towards the wall to attempt robbing a home run. Timing is everything. It's probably not a play you'll see everyday, but it IS possible. In addition to robbing a home run, you'll also have the capability to make jumping catches or spear linedrives. To do so, simply move the **right analog stick** in the direction of the ball.

The **right analog stick** is pressure sensitive; thus, the severity of your move is affected by the force used on the **right analog stick**. For example, if you are trying to stop a blazing grounder from going into the outfield, quickly move down on the **right analog stick** and you will execute a dirt eating dive. While these moves may not be as impressive as an over-the-wall home run stealing grab, at least you'll earn coach points for good hustle!

## Hitting - True Aim

To control your batter's aim when at the plate, use the **left analog stick**. As each pitch is thrown to the plate, move the **left analog stick** in the direction where you want to swing the bat, and press either **X** (for a contact swing) or **C** (for a power swing) just as the pitch crosses the strike zone. If you swing too far underneath the ball, you're likely to hit a pop fly. Whereas, if you swing too far on top of the ball, you're likely hit a ground ball.

Aiming in Major League Baseball® 2K5 World Series Edition World Series Editions pressure sensitive; therefore how hard you move the **left analog stick** in one direction will determine how far you swing in that direction. Note: by utilizing a contact swing, you will have a better chance to hit the ball but at the expense of the long ball. Conversely, a power swing greatly improves your chance of hitting the ball a long way, but you have to aim with more precision in order to make solid contact.

## Hitting - The Bunt

Another effective hitting technique is the bunt. To have your batter square up for a sacrifice bunt, press and hold **△** before the pitcher begins his delivery to the plate.

After the pitch has been thrown, you will have to aim with the **left analog stick**. To attempt a bunt, press and hold **△** while aiming with the **left analog stick**. Use **R1** and **L1**, in conjunction with the **left analog stick**, to control the direction of the bunt. If you do not feel that a bunt is right for the pitch, release the **△** button before the pitch crosses the plate.

## Coach's Tip - Broken Bats

Just like a Major League Baseball® batter in real life, you can break a bat if you swing at a fast inside pitch. Upon striking the ball, your bat will shatter and you'll hit a dribbler that's easy to field for the defense. Consider yourself warned and be careful not to get jammed by a pitch.

## Offense - Baserunning

Getting a grasp on the basics of baserunning is essential if you hope to have any success in Major League Baseball® 2K5 World Series Edition. This year, you can take full control of the baserunners using the BaseBurner control scheme.

The basic controls of baserunning are straightforward: to advance all runners, press **L1**; to retreat all runners, press **R1**. To retreat all runners, press **R1**. Pressing **L1** will cause all runners to attempt to reach the next base. Some situations however, will require you to advance an individual baserunner. For example, if there is a base hit to right field with a runner on first, the runner on first might be able to make it to third but the hitter might not be able to make it to second. In this scenario, you will need to select only the first baserunner to advance.

Each runner on base will have a base-specific window displaying the runner in the basepath and a button icon that corresponds to that specific runner. If you want to advance a specific runner press the button that corresponds to him, and then press **L1** to make him advance to the next base. A number will appear in the window that corresponds to the base he is queued to advance. Press **L1** multiple times to queue additional bases that the baserunner will attempt to take.

If you need your baserunner to retreat for any reason, select the baserunner's corresponding button and press **R1**. This will both lower the amount of bases the runner will try for and allow the runner to retreat. If you are trying to retreat the runner, always make sure you press **R1** enough times to remove any queued bases.

While you are at bat, you can order your baserunners to increase their base leads in an effort to get a head start on stealing bases. You can only move baserunners back and forth while the pitcher has possession of the ball, but beware of pickoffs. From the default lead position, you'll have the ability to extend the runner's lead by one or two extra steps.

To do so, press **L1** once for each extra step you'd like the runners to take. Press **R1** to move the runners back a step. Before the pitch, each baserunner will automatically take his default lead. While in this position, your runner is considered to be a safe distance from the bag, meaning he'll automatically return to the bag safely should the pitcher make a pickoff throw. However, once you start extending a runner's lead, he will be in danger of possibly being picked off. If the pitcher spins around and throws back to the base, you'll need to press **R1** quickly to get your baserunner back in time. From one extra step away, you have a little cushion with regard to your reaction time, but if you push your lead to two steps, you will need to be lightning

quick if you want to get back in time to avoid the pickoff attempt.

By default, Auto-Round Bases mode is set to On; therefore, when appropriate, your baserunners will turn the corner on a base, but will not advance to the next base. With Auto-Round Bases mode set to On, the baserunners are in no danger of being thrown out. However, if you would like to extend your lead off of the base, you will have to manually input the advance commands.

## Offense - Stealing

By pitting your fastest baserunner against a mediocre catcher, stealing a base is a quick way to put yourself into scoring position. Other times, you want to steal against your friend for taunting rights. In either event, the basic base stealing commands are straightforward. When you have a baserunner on any base, prior to the pitch, press the **directional button** in the direction of the base you would like to steal.

**directional button UP** - Queue steal of 2nd base

**directional button LEFT** - Queue steal of 3rd base

**directional button DOWN** - Queue steal of Home base

Pressing **R1** will retreat the runner to his previous base as normal.

## Offense - BaseBurner

Imagine being in the runner's shoes as he peers nervously at the pitcher while inching up the baseline, trying to gain as much ground as possible before he takes off to steal a base. In Major League Baseball® 2K5 World Series Edition, you can BE the baserunner and take complete control of this action in BaseBurner mode. To enter BaseBurner Mode, while there is a man on base, move the **right analog stick** in the direction of the runner you want to take control of.

**right analog stick RIGHT** - 1st baserunner

**right analog stick UP** - 2nd baserunner

**right analog stick LEFT** - 3rd baserunner

Once you have a baserunner selected you will control that runner for the duration of the play. The control scheme is as follows:

**R1** - Steal

**L1** - Get back

**left analog stick** - Adjust leadoff

**right analog stick** - Select runner

## Defense - Advanced Gameplay

A key component of great management is knowing where to position your fielders on any given play. As each batter stands at the plate, you can adjust your defensive setup by pressing the **R3** button. Move it **LEFT** or **RIGHT** to cycle through the available infield positions, and move it **UP** or **DOWN** to cycle through the various outfield positions. Here's a list of the different defensive shifts that are available.

### Infield

**Normal:** The default infield position. Normal is a balanced setup, good for many scenarios, but never the optimal choice if you can tip the odds in your favor.

**Fielders In:** Your fielders will shift closer to home plate. Use this formation when you want to cut down a runner at the plate.

**Fielders Back:** Your fielders will play deep to guard against hard hit grounders.

**Fielders Left:** Shift your fielders to cut down the batting average of pull-hitting righties.

**Fielders Right:** Shift your fielders to cut down the batting average of pull-hitting lefties.

**Double Play:** The shortstop and second baseman cheat toward the middle so they'll be in better position to turn two.

**Guard Lines:** Your first and third baseman hug the foul lines.

**Guard Bunt:** Your first and third baseman are brought a few steps closer to guard against the bunt.

## Outfield

**Normal:** The default outfield position. Like a the default infield setup, good for many scenarios, but you'll want to cater your defense to a batter's offensive tendencies.

**Shallow:** Bring your outfielders in against a poor hitter, or give them a better shot at a play at the plate in the late innings of a game.

**Deep:** Against big hitters, like Sammy Sosa, use this formation.

**Left:** Swing your outfielders to the left.

**Right:** Swing your outfielders to the right.

**Deep Left:** Position your outfielders deep and to the left.

**Deep Right:** Position your outfielders deep and to the right.

**Shallow Left:** Pull your outfielders in and to the left.

**Shallow Right:** Pull your outfielders in and to the right.

### Coach's Tip - Team Momentum & Confidence

Depending on a player's or his team's in-game performance, his confidence increase or decrease, which in turn will affect his ratings. High amounts of confidence will give you a slight edge when you need it most harder hitting, faster throws, biting curves, etc. Confidence will slightly carry over between game modes (GM, Career or Franchise).

## The Quick Key Menu

There are many off the field facets of the game that are also readily available. The Quick Key menu gives you access to these functions. Before selecting a pitch, press **R2** to access game functions such as bullpen and substitutions. The following is a list of options available and there corresponding buttons.

**L1** - Lineups: Adjust your team's fielding and batting lineup.

**R1** - Pitcher Status: Displays both team's current pitchers, number of pitches, bullpen status, and relevant statistics.

 - Challenges: Brings you to the Challenges screen.

 - Confidence: Displays the confidence level for all players on both teams.

 - Substitutions: Substitute a player in.

 - Back: Cancels Quick Key menu and returns you to the action.

**R2** - Mound Visit: Have a talk with the pitcher to slightly increase his confidence.

**L2** - Bullpen: Warm up new pitchers to take the mound.

This Software uses "DNAS" (Dynamic Network Authentication System), a proprietary authentication system created by Sony Computer Entertainment, Inc. ("SCEI"). "DNAS" retrieves information about a user's hardware and software for authentication, copy protection, account blocking, system rules, or game management and other purposes. The information collected does not identify the user personally and will not be shared with any non-SCE company. A PUBLISHER CAN COMBINE THIS INFORMATION WITH PERSONALLY IDENTIFYING INFORMATION FROM PUBLISHER'S RECORDS IF THE USER PROVIDES THE PERSONALLY IDENTIFYING INFORMATION. BEFORE PROVIDING ANY PERSONAL INFORMATION TO A PUBLISHER, PLEASE BE SURE TO REVIEW THE PUBLISHER'S PRIVACY POLICY AND TERMS AND CONDITIONS OF USE. DO NOT PROVIDE PERSONALLY IDENTIFYING INFORMATION TO A PUBLISHER UNLESS YOU ACCEPT THE CONDITIONS OF USE AND TERMS OF THEIR PRIVACY POLICY. SCEI, Sony Computer Entertainment America ("SCEA") and their affiliates cannot guarantee the continuous operation of the "DNAS" servers. SCEA shall not be liable for any delay or failure of the "DNAS" servers to perform. If you receive a message during login identifying a "DNAS" authentication error, please contact SCEA Consumer Services at 1-866-466-5333. For additional information concerning "DNAS", visit [www.us.playstation.com/DNAS](http://www.us.playstation.com/DNAS). In the event of a systems incompatibility or inoperability with DNAS, the sole liability of SCEI, SCEA and their affiliates shall be limited to the repair or replacement of the user's affected game software, console, or peripherals at the option of SCEA. SCEA, its parents, affiliates, or licensed Publishers shall not be liable for any delays, system failures, authentication failures, or system outages, which may, from time to time, affect online game play or access thereto.

**LIMITED WARRANTY:** LICENSOR warrants to you (if you are the initial and original purchaser of the Software) that the original storage medium holding the Software is free from defects in material and workmanship under normal use and service for 90 days from the date of purchase. If for any reason you find a defect in the storage medium during the warranty period, LICENSOR agrees to replace, free of charge, any Software discovered to be defective within the warranty period as long as the Software is currently being manufactured by LICENSOR.
