THE DNA OF DANGER!

4

The year is 21xx...

Endless turmoil between Humans and Reploids continues to wreak havoc on Earth, and Humankind has placed its hopes of survival on an exodus to space.

A full-fledged evacuation to the satellite moon has begun, thanks to the completion of "Jakob," a giant rail elevator. A large contingent of "new generation" Reploids has already been sent to the moon to construct a base.

However these "new generation" Reploids, capable of transforming into anyone else with the right DNA, pose a secret threat, as they have copied some very dangerous DNA — the DNA of Sigma, thought to have been previously destroyed.

Replid revolts are springing up all over. X, along with Zero and Axl, heads to space on a mission to investigate — and squelch, if possible — this extremely hazardous situation.

Former leader of the 17th Unit. X is the strong-willed Maverick Hunter who put an end to the Maverick rebellion.

At the same time, he has doubts about the stability of peace that can only be obtained through fighting.

X

ZERO

Former leader of the Zero Unit, this highly-skilled Special Class A Hunter has worked together with X to solve many problems. Unlike X, he tackles any mission thrown his way with a clear mind.

CHARACTERS

5

AXL

Prototype new generation Reploid who left the vigilante group Red Alert to become a Maverick Hunter. He has the unique special ability of being able to mimic a person's looks and skills.

SIGNAS

Commander of the Maverick Hunters. He has the most advanced CPU processor of all current Reploids.

LAYER

Operator supporting the Hunter Team. Her strength is battle analysis, and she excels in figuring out the enemy's weak points.

PALLETTE

One of the operators who backs up the Hunter Team. She is skilled in area analysis, providing vital support such as finding hidden routes.

ALIA

One of the operators supporting X and the other Maverick Hunters from behind the scenes. She excels in analysis and assists with battle status, as well as proving to be a great help in solving problems.

REVIVE GAUGE

When a character's Life Energy Gauge is completely drained, the Attack Gauge turns blue. When this happens, if you defeat enemies and fill up the blue gauge all the way, the player that was knocked out will be revived while the Attack Gauge resets to normal.

TAKE ADVANTAGE OF CHANGING CHARACTERS!

There are times when your Life Energy Gauge turns red when you take damage from an enemy, right? This is called your Recovery Gauge and you can fill it back up while on standby. When you have energy in your Recovery Gauge, switch characters to build your health back up.

WHEN YOUR COMBO COUNTER INCREASES...

As you hit enemies multiple times, your Combo Counter increases. Apparently this Combo Counter has a big effect on the amount of Metals you'll find. So if you want to score a lot of Metals, rack up as many Combos as you can.

NAVIGATOR FUNCTIONS

Each of us Navigators has our own specialty. If you get stuck somewhere, try changing Navigators and you just may get some hints to help you get through.

By the way, my personal specialty is finding hidden shortcuts!

USE TAG ASSIST!

I'm sure you know by now that you need to call for rescue if you get trapped by the enemy. It's much faster than trying to break free on your own, and it can also help you defeat the enemy more quickly, making it a great co-op move. The key to finishing missions is figuring out the best way to use both characters!
