GETTING STARTED

Set up your PlayStation®2 computer entertainment system according to the instructions in its Instruction Manual. Make sure the MAIN POWER switch (located on the back of the console) is turned on. Press the standby/RESET button. When the power indicator lights up, press the OPEN button and the disc tray will open. Place the MICRO MACHINES™ disc on the disc tray with the label side facing up. Press the OPEN button again and the disc tray will close. Attach game controllers and other peripherals, as appropriate. Follow on-screen instructions and refer to this manual for information on using the software.

Insert a memory card (8MB) (for PlayStation®2) in MEMORY CARD slot 1 if you wish to save a game. The MICRO MACHINES™ game requires at least 70 KB of free space on your memory card to save your game progress.

Note: Never remove the memory card or turn the console power OFF when loading or saving a game. It is also advised that you do not insert or remove accessories once the power is ON. Make sure there is enough free space on your memory card before commencing play.

Note: The MICRO MACHINES™ game supports the DUALSHOCK®2 analog controller. Digital controllers are not supported.

MULTITAP

If three or more people are competing in a MICRO MACHINES game, you must have a multitap (for PlayStation®2) connected to the PlayStation®2 game console. Refer to the instructions that came with your multitap for information on how to connect it to the PlayStation®2 game console.

SAVING AND LOADING

The MICRO MACHINES game automatically saves your game progress, provided you have a memory card (8MB) (for PlayStation®2) with at least 70 KB of free space in MEMORY CARD slot 1. During a game — for example, after you get a high score — you are prompted to save your game progress. Press the **X** button to save, or press the **▲** button to cancel.

If you have a memory card (8MB) (for PlayStation®2) with previously saved game data on it in MEMORY CARD slot 1, the MICRO MACHINES game automatically loads that game data when you start the game. It is not possible to load previously saved game data beyond this point.

WELCOME TO MICRO MACHINES™

They're cool, they're fast, they're MICRO MACHINES! Toy cars, motorcycles, boats and more compete on a variety of racetracks in an oversized world where anything (and everything!) can happen. Players choose the character they want to play in single-player or multiplayer games and head out for outrageous racing action. Each track features unique terrain with ramps, tunnels, obstacles and hazards. Hidden weapons and power-ups let drivers use rockets, time warps, mines, giant frying pans and fireballs against each other to take the lead. Race in Time Trials, single Races, Championships or in thrilling Bomb Tag, where drivers try to pass a ticking bomb to each other before it goes off. We've scaled down the cars and scaled up the FUN!

Step 3: Select Drivers

Human Players: Select a driver. If playing a multiplayer game, other competitors also select drivers (each player must use a separate DUALSHOCK®2 analog controller).

COM Players: The game can autoselect COM drivers for you. Or, if you prefer to individually pick COM opponents, choose the Autoselect "No" option.

Step 4: Select a Cup League (Championship play only)
In Championship mode, choose a Trophy level — Bronze, Silver, Gold or Platinum.

Step 5: Select a Course
Choose from available tracks, then... put the pedal to the metal!

Note: At the Select Course screen, the stars below each track signify track difficulty. One star indicates the easiest level; four stars indicate the most difficult.

Note: Depending on the game mode chosen in Step 1, you may have an additional racing option. Some game modes have Time Trial, Single Race and Championship choices.

MICRO GP MODE (1 OR 2 PLAYERS)

Single Race

Select up to three COM opponents, drivers and a course... then go burn rubber!

BOMB TAG MODE (1 OR 2 PLAYERS)

In Bomb Tag, one randomly selected competitor has his or her machine turned into a drivable time bomb at the start of the race. The idea of the game is to get rid of the bomb before it explodes. "Tagging" another vehicle transfers the bomb, and when the onscreen timer screen reaches zero — kaboom! The bomb explodes, taking the machine and its unlucky driver with it. Each player begins with three lives and loses one each time his or her vehicle detonates. The winner is the last player rolling.

To begin, just select players, drivers and a course.

Note: For two-player Bomb Tag, the game screen splits into two separate player views.

MICRO MACHINES MODE (1 TO 4 PLAYERS)

The object of MICRO MACHINES mode is to score points by getting far enough ahead of all the other players to push them off the screen. Fill up your points bar to win each race.

Scoring Points

Score a point each time you are the only competitor left in the race, or all of the other machines have been pushed off the screen.

Losing Points

Lose a point when all of the other competitors are so far ahead that you disappear off the screen.

Winning a Race

The object of each race is to fill up your points bar before any other player. The first player to score six points wins the race.

Tournament

Compete against up to three opponents in a four-race tournament. To begin, select players, drivers and trophy (Bronze Cup, Silver Cup, Gold Cup or Platinum Cup), then take your position on the starting-grid alongside your rivals. The player with the most points at the end of the tournament takes home the cup.

Single Race

Compete against up to three other drivers in a single race. To begin, select players, drivers and a course.

TRAINING MODE (1 PLAYER)

Training is three laps and helps you master vehicles and tracks. With the basics under your belt, you should have what it takes to race with authority. We recommend you learn what you can while you can — because once you get on the road, you're going to run into tough competition.

Note: You can quit Training mode whenever you want, and you don't have to train to be able to play other modes.

THE CHARACTERS

Magenta

Does she come from another planet? Nobody knows, but the outfit sure is convincing. Set your phasers to "stunning" and buckle in!

Aunt Betty

With the heart of a tiger and a passion for teacakes, Aunt Betty has no fear and is eager to prove it. She is feisty, bold and slightly absent-minded. A true eccentric, but a formidable racer.

Elmo

Too many years away from civilization have taken their toll on this cantankerous fellow. He screams, he shouts, he laughs and he cries — but he should really learn how to hold onto his false teeth. Hillbilly hilarity ensues!

Callaghan

A veteran, boisterous city cop, he has seen it all. So don't even think about trying to bother him or you're going to eat his badge! "Make my day!"

Grizzly Beard

He is an aggressive and hard-bitten safari expert. Fresh from the outback, he shouts commands at anything that will listen to him. He'll also hunt you down just for fun!

Miami Mike

Still stuck in the '80s, his behavior is greasy and his fashion choices embarrassing. Take your hair gel, your fast cars, and that designer stubble and leave, Mike, now!

Frank N Stein

The dumb but endearing Frank is a product of man's mastery over nature... almost. Slow of wit and silent of tongue, this grunting monstrosity has an uncanny knack for piloting just about any kind of machine you can find.

Danger Ranger

By day he works behind the local deli counter, taking numbers and serving up sandwiches — but don't be fooled! By night he's a hero from outer space, Danger Ranger, champion of humankind and savior of the future... or so he thinks.

THE MACHINES

Every MICRO MACHINES character has his or her own Standard Car, Sports Car, Motorbike, Off-Road Vehicle and Aquatic Vehicle. For any type of terrain you race on, your character automatically uses the right type of machine.

Standard Car

Easiest to drive, the Standard Car has good all-around acceleration, top speed, braking and cornering characteristics.

Aquatic Vehicle

The Aquatic Vehicle accelerates quickly and jumps like a Motorbike. Take turns nice and wide, but be prepared to lose speed along the way.

Off-Road Vehicle

The biggest machine of 'em all. Get ready to drive a real beast! The Off-Road Vehicle takes time to hit top speed, but once it's rolling, there's no stopping it. Take those turns as tight as you like, no problem, and don't worry about losing traction. In this four-wheel-drive beauty, there's no need to brake — it corners so well you'll never have to slow down!

Motorbike

Get your adrenaline racing with the speedy Motorbike. This machine has the fastest acceleration off the line and its top speed is second only to the Sports Car. As for braking, one piece of advice: The Motorbike is a tricky vehicle to control when braking, so think before you... arrrgghh! Too late.

Sports Car

Much quicker than the Standard Car, this vehicle has the highest top speed. Cornering requires precision, however. The Sports Car can lose momentum in the turns if you're not careful. For seasoned drivers only.

Note: If you win the Platinum Cup in Championship mode, you unlock bonus machines!

WEAPONS AND POWER-UPS

To pick up a weapon or power-up, just drive over it (if you are already carrying a weapon, you are not able to pick up another until you deploy your current one). To use a weapon or power-up, press the R2 button.

Note: Depending on type, weapons are deployed from either the front or the back of the machine.

Weapons and power-ups surrounded by orange/blue rings are universal — when a player picks one up, everybody gets that weapon or power-up! Universal items are marked in the chart below with an asterisk (*).

Note: If a player already has a weapon, the existing item is not replaced by a universal weapon or power-up.

Weapon	Description
 Bazooka*	An "Up and Over" style missile, the Bazooka travels in an arc until it collides with either a vehicle or a piece of scenery.
 Homing Rocket	This is a front-firing missile that locks on to an opponent's vehicle and attempts to track it down. Some nifty driving is required to avoid one of these!
 Fireball	This weapon turns your vehicle into a drivable ball of fire — your opponents had better watch out!
 Electro Charge	Using this weapon causes electricity to arc from your vehicle — anyone foolish enough to get too close will find his/her machine pushed out of the way.
 Liquid Nitrogen	A cloud of liquid nitrogen is dumped from the back of your vehicle; woe to any player who drives through it — his/her vehicle will freeze solid, making steering rather difficult.
 Magnet*	This adds a powerful electromagnet on an extending arm to the front of your vehicle. Activating it causes the arm to extend and grab any vehicle in front of you, flinging it back — be careful with your aim though! Note: You can use the Magnet up to three times.
 Frying Pan*	Would you like an enormous frying pan attached to your car so you can go through the level destroying any opponent who stands in your way? If you like the sound of this, then pick up this weapon! Note: You can use the Frying Pan up to three times.

Weapon	Description
 Suspended Animation	This weapon is available in Micro GP mode only. Activating it causes time to freeze for several seconds — everything except your vehicle will be frozen. This should give you a chance to make up some valuable seconds!
 Boxing Glove*	Pick up this weapon to attach a boxing glove on a spring to the front of your vehicle. Press the R2 button to make the boxing glove shoot out in front of your vehicle, scattering any other vehicles that get in the way. Note: You can use the Boxing Glove up to three times.
 Flamethrower	Pick up this weapon to attach a flamethrower to the back of your vehicle. Activating it causes a stream of flame to shoot out, affecting anyone unlucky enough to be stuck behind you.
 Rear Mine Drop	This arms you with a mine which, when dropped, will sit on the track until some unfortunate driver crashes into it.... then kaboom!
Power-Up	Description
 Turbo*	Gives your vehicle a brief, temporary speed increase.
 Invincibility	Renders the holder's vehicle temporarily resistant to damage or attack.
