A very small percentage of individuals may experience epileptic seizures when exposed to certain light patterns or flashing lights. Exposure to certain patterns or backgrounds on a television screen or while playing video games, including games played on the PlayStation 2 console, may induce an epileptic seizure in these individuals. If you, or anyone in your family, has an epileptic condition, consult your physician prior to playing. If you experience any of the following symptoms while playing a video game — dizziness, altered vision, eye or muscle twitches, loss of awareness, disorientation, any involuntary movement, or convulsions — IMMEDIATELY discontinue use and consult your physician before resuming play.

AWAKENING SYSTEM

Dealing damage to enemies and taking hits fills up your Awakening gauge! When it hits MAX, you can Awaken! Use the Awakening system to call up amazing powers!

During Cooperative Play, both players need to simultaneously double tap **L1** to Awaken! When the first player presses it, the "Let's go!" window will call for the Awakening. When the second player is called, double tap **L1**. Choose from three types of Awakenings:

Assaulting

With this Awakening, your attack damage will increase by a significant margin, and you won't stumble when you take damage! This Awakening will result in a short-term, decisive battle, so don't let the right timing slip away! You and your allies' mobile suits will get a huge increase in Attack Power! Smash your enemies all at once!

AWAKENING SYSTEM

Recover

No matter how many times you or your companions are shot down, you can come back to life! Immediately following the resurrection, your defense power will go up, so use that time wisely!

* After being revived, parts of your mobile suit will be damaged, and there will be some limits to specific maneuvers you can perform. This is invoked automatically. Recover immediately after being shot down; don't give up until the very end!

Mobility

This Awakening type gives you a continuous speed-up so that you can attack and defend more easily. This Awakening sticks around for a long time, so use it to seize the initiative during the battle! This gives a big maneuverability boost to you and your allies' mobile suits. Run circles around them with your overwhelming speed!

Battle Power Gauge

One Battle Power Gauge represents a Cost of 600. The CPU army's gauge total will be 400 (500 during cooperative play).

In a 2 on 1 battle, the 1 person's gauge total is 750. A CPU-controlled machine's Cost counts as half of normal.

Mobile Suit Cost

Pay close attention to the Mobile Suit Cost! Every mobile suit has a designated cost, and the better the mobile suit's performance, the higher the cost. When riding in a high-cost mobile suit like a Gundam, be prudent in battle; take advantage of its capabilities so as not to get shot down. Conversely, if you have a low-cost mobile suit like a Zaku, you'll have to attack boldly and not worry about taking damage or being shot down in order to compete with the higher-cost mobile suits!

IT BEGINS NOW.
