If you, or anyone in your family, has an epileptic condition, consult your physician prior to playing. If you experience any of the following symptoms while playing a video game—dizziness, altered vision, eye or muscle twitches, loss of awareness, disorientation, any involuntary movement, or convulsions—IMMEDIATELY discontinue use and consult your physician before resuming play.

## **WARNING TO OWNERS OF PROJECTION TELEVISIONS:**

Do not connect your PlayStation 2 console to a projection TV without first consulting the user manual for your projection TV, unless it is of the LCD type. Otherwise, it may permanently damage your TV screen.

## **USE OF UNAUTHORIZED PRODUCT:**

The use of software or peripherals not authorized by Sony Computer Entertainment America may damage your console and/or invalidate your warranty. Only official or licensed peripherals should be used in the controller ports or MEMORY CARD slots.

# FLAGS

## GREEN

The green flag indicates the start of the race. When the green flag drops it is time to step on the gas. The green flag may also appear after a yellow caution flag in the middle of the race.

## YELLOW

The yellow flag cautions drivers to slow down and hold their positions because an unsafe condition exists on the racetrack. Cars may pit under yellow.

---

**NOTE:** When the yellow flag comes out, all the cars are computer controlled. Get ready to resume control when the green flag appears.

---

## WHITE

The white flag indicates that the lead driver is in his final lap of the race. This is your last chance to catch the leader. If you're in front, hold the lead because the pack will be making a last-ditch effort to hunt you down.

## CHECKERED

The checkered flag indicates that the lead driver has crossed the finish line and won the race.

- ◇ Following the race and after the race highlights, the Race Results screen displays each driver's finishing position.

# PIT STOPS

There are four situations that warrant a visit to pit road: low fuel, worn tires, poor handling, and damage. Your crew chief notifies you audibly when it's time to refuel, change the tires, or repair damage.

## To make a successful pit stop:

1. Decide which services you want before entering the pits.
2. Enter pit road. The computer takes control of your car and the Pit Service menu appears.
3. Select services before your car comes to a stop.
4. When the pit services are complete, your car pulls out of its stall. Hit accelerate as you exit pit road to get back on the track.

## CAR SETUP

- ◇ When you choose CAR Setup from the Race Weekend menu, the Car Setup menu appears.
- ◇ Not all car setup options are available in Arcade Mode. To access all options, choose Simulation from the Nascar Options menu.

**SPOILER ANGLE** Increasing down force provides better grip to the rear tires. Adding more down force reduces top speed due to aerodynamic drag.

**SUSPENSION** Set the stiffness of your car's shocks. Soft shocks allow your car to roll into the turns. Stiffen just the front shocks for understeer or just the rear shocks for oversteer.

**WEDGE** Wedge lets you distribute weight to different corners of the car. Increasing wedge adds weight to the left rear corner and tightens up the car. Decrease to transfer weight to the right front for a loose-running car.

**GEARING** Adjust your gearing. The lower the gearing number, the faster you get to the top of the gear, but your top speed is slower. Higher gearing numbers provide greater top speed, but they take longer to climb.

**TIRE PRESSURE** Set the amount of pressure in your tires. Lower pressure increases contact with the track, improving handling and increasing tire wear. The higher the pressure, the faster the car travels.

**TRANSMISSION** An **AUTOMATIC** transmission provides a smooth, no-hassle race, but a **MANUAL** transmission lets you squeeze more out of each gear.

**DEFAULT** Reset all options to their original settings.

**LOAD/SAVE SETUP** Access a previously saved setup or save the current settings. You can save 2 car setups for each track.
