ON THE COURT

The following are some useful tips that will help you perform at a higher level during gameplay.

TOUCH SHOOTING

Touch Shooting allows you to control a player's shooting ability. The use of a shot meter will help you to make your player a successful jump-shooter from anywhere on the court. To give yourself the best chance at making a shot:

- Hold **○** to start the shot.
- Watch the white bar rise on the shot meter.
- Release **○** when the white bar reaches the green area of the meter. If you time it perfectly, you'll hit the shot.

NOTE: If a green layer at the top of the shot meter is not visible, your player is out of range for his skill level.

TOUCH SHOOTING

To give yourself the best chance at making a shot, release **○** when the white bar rises to within the green area of the shot meter.

JUMP BALL

To gain control of the Jump Ball, you must first time your jump perfectly. To get the ball to a teammate, press ← / → or ↑ / ↓.

PASSING

Press **X** to pass the ball. The ball will be passed in the direction the passer is facing. Use Icon Passing to gain complete control of your passing game, allowing you to pass the ball to any teammate on the court. Press **L2** to bring up the passing icons. You can also utilize Icon Passing when inbounding the ball.

REBOUNDING

To become a good rebounder, you have to have a knack for reading the angle of the shot that allows you to get in the best position for the rebound. Box other players out and press **△** to time your jump and get the board.

INTENTIONAL FOUL

There are a number of circumstances in which an intentional foul of your opponent is appropriate. One being at the end of a game when your team is behind and you need to stop the clock. Another is when your opponent has a clear lane to the basket and you don't want to give up an easy two points, making him earn it at the stripe.

ICON SWITCHING

Use Icon Switching on defense to control your favorite player. Press **L2** to bring up the switching icons shown above each player. Once the icons are up, press the icon symbol of the defender you would like to switch to.

PAUSE MENU

CAMERA VIEW

Choose the camera angle and zoom that provides you with the best possible angle of the court. The Close-up key is set to ON to zoom in when the ball is in the key.
