CONTINUE

Continue a Season or Tournament at the next scheduled game. To use the Continue option, you must have already started a Season or Tournament or loaded a previously saved Season or Tournament from a MEMORY CARD (8MB) (for PlayStation 2). See *Saving Data* on page 3 for more information.

ARCADE

An Arcade game is an Exhibition game that allows you to play at a faster pace with exaggerated special moves. See *Exhibition* on page 7 for more information on setting up a game.

OPTIONS

Use Options to set your game format and its attributes. Options can still be altered after a game is started either from the Pregame Menu or by pausing the game and choosing Options from the Pause Menu.

RULES

HALF LENGTH

Set the half length of the game from 5, 10, or 20 minutes. There are two halves in regulation.

DIFFICULTY

The player difficulty will determine each player's offensive and defensive ability. The Freshman and Sophomore levels should provide an adequate challenge, whereas the Junior or Senior levels provide a much greater test of skill.

INJURIES

Player injuries do occur and they can put your team at risk for losing one of its better players. Keep Injuries OFF to prevent players from getting injured during the game.

FATIGUE

Players naturally get fatigued during the game. To avoid this, turn the Fatigue option to OFF and keep your players fresh throughout the game.

SUBSTITUTION

Choose a setting for player substitutions. MANUAL allows you to make the substitutions during the game. Setting this option to AUTO will allow the CPU to control the player substitutions.

FOULS

Each player gets five fouls before fouling out of the game. To avoid fouls, set this option to OFF.

SHOOTING FOULS

Shooting Fouls occur when a player is fouled while in the act of shooting the ball. Set the rate at which these fouls will be called during the game.

REACH-IN FOULS

Reach-In fouls are called when a defender reaches in the ball handler's mid-section area as he has control of the ball. Set the rate at which these fouls will be called during the game.

CHARGING FOULS

Charging fouls are called when a defensive player has position with his feet set and the offensive player with the ball charges into him on his way to the basket for a shot. Set the rate at which these fouls will be called during the game.

BLOCKED SHOTS

Set the rate at which shots are blocked during the game.

STEALS

Set the rate at which steals occur during the game.

CPU SHOOTING

Increase or decrease the shooting accuracy of the CPU controlled players.

PRESENTATION

SOUND

Turn the sound of the music played during your game setup ON/OFF.

SURROUND

Set the sounds of the game to surround sound by keeping this option ON.

CROWD

Control the excitement of the crowd during the game by adjusting the level of the crowd noise.

PLAY-BY-PLAY

Adjust the volume of the play-by-play commentator.

SFX

Adjust the volume of the special sound effects of the game, such as squeaking sneakers, whistles blowing, and baskets swishing.

MUSIC

Adjust the volume of the in-game and front-end music.

AUTO REPLAYS

Up-close replays will be shown of exciting things that take place on the court. Adjust the frequency in which replays are shown. A high setting will cause exciting plays to automatically be reshown.

INTERACTION

TOUCH SHOOTING

Touch Shooting allows you to control a player's shooting ability. The use of a shot meter will help you to make your player into a successful jump-shooter from anywhere on the court. To give yourself the best chance at making a shot:

- Hold **○** to start the shot.
- Watch the ball rise on the shot meter.
- Release **○** when the ball is centered in the hoop on the meter. If you time it perfectly, you'll hit the shot.

In Senior mode, the ball has to be centered perfectly in the center of the hoop on the meter to ensure a successful shot.

NOTE: If the ball disappears after the shot has been released, your player is out of range for his skill level.

GAME SPEED

Use Game Speed to set the pace or movement of the game. The higher the number, the faster the game action moves.

FOUL SHOTS

Choose the type of free throw meter for your game.

NORMAL

The Normal meter is in the form of a "T". A basketball will appear on the meter moving horizontally. Press **R1** or **○** to stop the ball in the "sweet spot" of the meter. A basketball will then begin to move vertically along the meter. Again, press **R1** or **○** to stop the ball in the "sweet spot" of the meter. The closer you get to stopping both balls in the center of the meter, the better the chance that you'll hit your free throws.

EXPERT

The Expert meter consists of two stationary basketballs located to the left of and above the rim. Move the left analog stick and the right analog stick at the same rate in order to overlap the two basketballs above the rim. If the basketballs come close enough together when you press **R1** or **○** to release the shot, the free throw will go in the hoop.

RANDOM

A random setting will allow the CPU to randomly choose a free throw meter throughout the game.

• **OPTIONS**

Options allow you to customize your game's characteristics and attributes. See *Options* on page 24 for descriptions of this menu's items.

 - Press **⊗** to accept your choice and return to the Pregame Menu.

- From TEAM, press **←** / **→** to choose a team.
- Press **↓** to SET, and then press **←** / **→** to choose your default set.

PICK AND ROLL

A pick and roll uses the center to set a pick for a guard. As the defense switches its matchup, the center rolls off the pick to receive a pass for a shot.

LOW POST

Create a shot for your center down low in the paint.

REVERSE

Pass the ball around the perimeter in one direction, while your forward works himself free to the opposite side of the court. The ball is reversed back to that side where your forward will receive the ball.

ISOLATION

Use the talents of individual players by using an isolation play to clear out the rest of your players and the defenders to one side of the court, leaving a man-on-man situation.

Clearing out the defense for an isolation play

• **DEFENSE**

Like offense, during a game you can make defensive play calls on the fly using the strategies that you have previously set up. Call these plays while on the court by holding **SELECT** and pressing the icon of a defensive strategy.

MAN TO MAN

Man to Man has each player picking up a man to defend.

BOX & 1 / TRIANGLE & 2

These style types are a combination of zone and man to man defenses in which the shape describes the position of the zone players, and the number represents the number of man defenders in that defense.

Triangle & 2 defensive setup

The Box & 1 contains four defenders positioned at the four corners around the lane, and one man-to-man defender protecting the three point line and guarding the ball handler.

The concept is the same for the Triangle & 2. Three zone defenders position themselves in a triangle formation around the lane, and two man-to-man defenders follow the ball, while protecting the three point line.

1-3-1 / 2-1-2 / 2-3

These style types are all types of zone defenses in which each number represents a player and their location on the defensive end of the court. 1-3-1 has a man at the top of the key and underneath the basket as three men spread across the middle of the key. The concept is the same for 2-1-2 and 2-3 defenses.

- Press **↓** to PLAYER, and then press **← / →** to view the shots of each player.

• **TIMEOUT**
