If you experience any of the following symptoms while playing a video game – dizziness, altered vision, eye or muscle twitches, loss of awareness, disorientation, any involuntary movement, or convulsions – IMMEDIATELY discontinue use and consult your physician before resuming play.

SAVING GAMES

MEMORY CARD

NFL Blitz 20-03 lets you save accumulated data to your Memory Card (8MB) (for PlayStation® 2). We highly recommend using a memory card to enjoy the many features you'll find in this game.

Each time you start NFL Blitz on your PlayStation® 2 computer entertainment system, the game will read your memory card.

On the Main Menu, you'll find the Memory option. It offers several options for maintaining your game data on your memory card.

CLEAR RECORDS

Clear all current player records/players stored in memory.

UPDATE

Update and add to the current player list in memory.

LOAD RECORDS

Load any saved records you have saved on your memory card.

PLAYER RECORDS

It is advised that you do not insert or remove peripherals or memory cards once the power is turned ON. Make sure there is enough free space on your memory card before commencing play.

MAIN MENU

QUICKPLAY

Jump right into the thick of NFL Blitz 20-03's classic "In-Your-Face" style football. Each player(s) will select Home or Away, then select a team (see **Select Teams**, pg. 14). You'll then go straight to the opening kickoff of your game.

PRE-GAME SETUP

Prior to each game, review the following options before you can begin playing:

ENTER NAME

This procedure is available only in Exhibition Mode, so you'll want to enter a Name and Pin Number to save stats and customized options to your memory card under that name. You can select YES, if you want to enter a name, or select NO to move on without entering a name.

NOTE: If you don't have a memory card, your stats and any won't be saved once you power down your game console.

To enter a name, press the Directional button \uparrow , \downarrow , \leftarrow or \rightarrow to highlight a character, then press the \otimes button to select it. Repeat the process until you've spelled out the name you want, then select END. Do the same to enter a Pin Number.

If the game doesn't recognize your name and pin number, you'll be asked if you want to "Create a New Record". Select YES to do so and view your stats at zero. If you already have a record, your up-to-date stats will be displayed.

Once players have entered names and pin numbers, press the \otimes button to go to the Select Controller Screen.

SELECT CONTROLLERS

Press the Directional button \leftarrow or \rightarrow to select the side on which you want to play: Home Team or Away Team. Each person must pick a side and team up as needed.

Controllers are displayed in colors, so each player will know the player he controls on the field during the game (Player 1=Blue, Player 2=Green, Player 3=Red, Player 4=Yellow).

Press the \otimes button to continue to go to the Select Teams Screen.

SELECT TEAMS

Prior to each game, you'll need to select the team you want to use in your single game, season or tournament.

Press the Directional button \leftarrow or \rightarrow to scroll through the NFL teams. Power rankings for Offense, Defense and Special (Teams) will be displayed.

PRE-GAME SETUP

ENTERING CODES

What would an NFL Blitz game be without Power Up Codes? Just before your game starts, the Match Up Screen displays both teams. At the bottom of the screen are up to 4 code windows that contain 3 icons (one for a 1 player game, two for a 2 player game, etc).

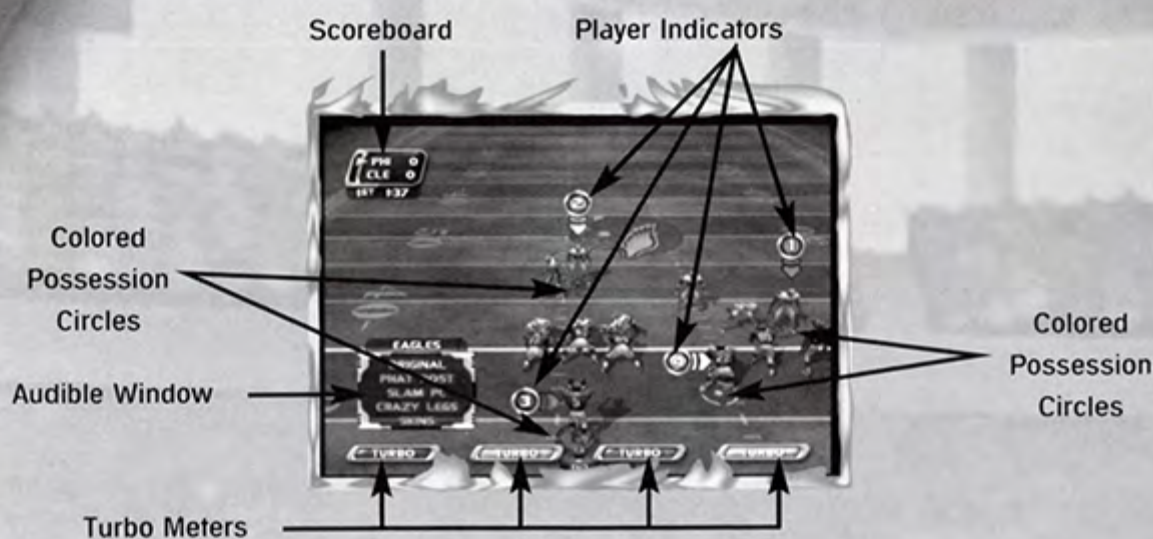

You can enter codes by pressing the **L2** button (first icon), the **R2** button (second icon) or the **X** button (third icon). When the icons you want are displayed, press the Directional button **↑**, **↓**, **←** or **→** to enable the code (not all combinations will enable codes).

To input more than one code, repeat the process. The codes you entered first will flash and remain on-screen. At this point, you can enter another code before the game starts. The first code you entered will be stored, as well as the second one. This screen appears only for a short period of time, so you'll have to be quick to input multiple codes.

NOTES

- Each Code window contains 5 different icons, but in many cases, codes you come across will appear in number format (ie, 3-2-3 Up, 1-5-3 Down, etc.). This means, press the first controller button 3 times, the second button 2 times, the third 3 times and the Directional button **↑**.
- Codes for NFL Blitz 20-03 can be found in Strategy Guides, Magazines, on the Internet and with a little experimentation on your part.

On The Field

Read below for a rundown of the information displayed on-screen as you play:

PREGAME TIPS

As the ball is in the air during the opening kickoff, tips are displayed to remind players of some of the game's basic controls. If needed, quickly read them, then all human players must press the **X** button a number of times to get the game rolling.

SCOREBOARD

Displays the game's Score, current Quarter and Time remaining.

COLORED POSSESSION CIRCLES

These circles are fixed below the feet of each controlled player to let you know who is controlling the human-controlled players. These colors match the colors displayed at the Select Controller Screen (see pg. 14).

PLAYER INDICATORS

These colored numbers appear prior to each play, so you can focus on the player you're controlling. They'll disappear a few seconds after players are set.

TURBO METERS

These meters are available for human-controlled players. Before a play starts, the Turbo Meters are fully colored, indicating you have the maximum amount of turbo available. As you use your turbo, the meter diminishes. When your meter is empty, release the Turbo button to allow it to recharge.

AUDIBLES

Press the **L1** button at the line of scrimmage to call up the Audibles Window. Select a new play, then press the **X** button to change the play.

FLIPPING PAGES IN THE PLAYBOOK

Although there are only a certain amount of plays available in each team's playbook, you can change things up by inverting the plays. Press the **■** button or **○** button to invert the plays.

IMPACT PLAYER FUNCTION

The Impact Player option allows you to set player tendencies to each Offensive or Defensive play. This lets you provide an extra wrinkle to each play, making your play calling a little more difficult for your opponent to anticipate. Before you make your play selection, press the **L2** button or **R2** button to scroll through the following options in the Impact Player Window:

OFFENSE

- Protect - Blockers concentrate on protection.
- Dish Off - Player with ball has the option to Dish the Ball Off before being tackled.
- Get Open - Receivers look for open spots in the defense.
- Go Deep - Receivers sprint for the long bomb.
- Block L - Blockers block Left.
- Block R - Blockers block Right.

- Zone L - Defense will play a Zone Left.

After a great play, take another look using the Instant Replay option. Press the **△** button to bring up on-screen controls that display the buttons needed to perform Instant Replay functions.

TRIVIA CHALLENGE

Play the Trivia Challenge following Exhibition games that include your created player.

For every 5 questions you answer correctly, you'll accumulate 2 points toward boosting your created player's attributes (see Create-A-Player, pg. 14-15).

HINTS AND TIPS

ON FIRE

Like many of Midway's over-the-top sports games, you can set your players ablaze with some success on Offense and Defense. Power, speed and success will follow your players once you achieve "On-Fire" mode. You'll catch fire on **Offense** when you successfully complete a pass to the same wide receiver three consecutive times.

On **Defense**, sack the ball carrier twice in a row behind the line of scrimmage to set your team ablaze. While on Defense, you'll remain On-Fire until your opponent makes a first down or scores.

On **Offense**, you'll lose fire when you're stopped for negative yards or miss on a 2 point conversion. Only continuous success will allow you to remain On-Fire.

Single Player On-Fire
(Orange Flames)

THE KICKING GAME

Kickoffs are controlled by the CPU, but Punts and Field Goals are up to you. When you choose to punt or kick a field goal, the Kick Meter appears with a moving pointer. Press the **X** button when the meter reaches the green area to get maximum kick distance and accuracy.

THE ONSIDE KICK

Need the ball back late in the game? Press the **L1**, **L2**, **R1** and **R2** buttons simultaneously to perform an Onside Kick.

HIDE CURSOR

At the Play Select Screen, highlight the top left play, then press the Directional button **↑** twice. This will hide your cursor, so your opponent can't see the play you're calling.

TURBO MAINTENANCE

Pay close attention to your Turbo Meter during a play. It diminishes fast. Don't just hold down the button, because the Turbo can't recharge until you let up on the button.

FUMBLES

You may know all the moves to gain yards, but don't do too many in a row. This will increase your chances of fumbling the ball.

CHANGE PLAYS AT THE LINE OF SCRIMMAGE

Try an audible once in a while to confuse your opponent (see Audibles, pg. 17, to find out how).

TOUCHDOWN CELEBRATIONS

As you streak toward the endzone, ham it up by pressing the Right analog stick **↑**, **↓**, **←** or **→**. Based on the direction you select, you'll do one of four celebrations until you reach the endzone.
