Getting Started

Set up your PlayStation®2 computer entertainment system according to the instructions in its Instruction Manual. Make sure the MAIN POWER switch (located on the back of the console) is turned ON. Press the RESET button. When the power indicator lights up, press the OPEN button and the disc tray will open. Place the **One Piece™: Grand Adventure™** disc on the disc tray with the label side facing up. Press the OPEN button again and the disc tray will close. Attach game controllers and other peripherals, as appropriate. Follow on-screen instructions and refer to this manual for information on using the software.

MEMORY CARD (8MB) (FOR PLAYSTATION®2)

To save game settings and progress, insert a memory card (8MB) (for PlayStation®2) into MEMORY CARD slot 1 before powering on the system. At least 89KB of free space on the memory card is required to save **One Piece™: Grand Adventure™** game data. This title saves game data to MEMORY CARD slot 1 only.

You can load saved data from the same memory card or from any memory card containing previously saved **One Piece™: Grand Adventure™** game data (→ page 15).

IMPORTANT NOTE

If a memory card containing **One Piece™: Grand Adventure™** saved game data is properly inserted in MEMORY CARD slot 2 when you start **One Piece™: Grand Adventure™**'s Grand Battle Mode Versus Mode, the game data, such as character levels and stats, will be loaded for use in Versus Mode (→ page 15).

Level up your characters in **One Piece™: Grand Adventure™**'s Grand Adventure Mode and challenge your friends to battle with your characters in Grand Battle Mode Versus Mode!

Controller

DUALSHOCK®2 ANALOG CONTROLLER CONFIGURATIONS

CONNECTING THE CONTROLLER

Connect the DUALSHOCK®2 analog controller to controller port 1 before starting play. For two Player games, connect a second controller to controller port 2. You can reconfigure the controls (→ page 4) and toggle the vibration function On/Off in Options Mode (→ page 15). When the vibration function is On, the controller will vibrate in response to game events.

SAVING AND LOADING GAME DATA

One Piece™: Grand Adventure™ has an Autosave feature that can automatically save **One Piece™: Grand Adventure™** game play data such as play time, unlocked hidden features, and battle statistics.

The Autosave feature does not save Grand Adventure Mode stage clear data, however, so be sure to save your progress frequently from the Pause Menu Options Menu (→ page 15) while playing Grand Adventure Mode!

Command Chart

The controls on page 4 are just the basics to get you started on your way to becoming the **Battle King of the Pirates**. Press the **START** button during the game and select **Command Chart** to view a complete list of attacks, Combos and Skill Gauge attacks for your current fighter.

Skill Gauge Attacks

Note: In the attack controls described in the following sections, **L1** or **L2** + (**△**, **○**, **×**, **□**) buttons = while holding the **L1** or **L2** button, press the indicated buttons one after another.

SKILL GAUGE AND COINS

The Skill Gauge is located below the Stamina Bar. Collect the Coins (→ page 16) that appear by breaking Item Boxes and other objects in each stage to raise the Skill Gauge a maximum of 3 levels. Use this gauge to release stronger than normal attacks!

ACCEL-HEAT

ACCEL-HEAT LV.1

L1 or **L2** + **△** button (cost: Lv.1 Skill Gauge)

This action can be performed while moving, jumping, taking damage and being knocked down, as well as during Combos and Super Attacks. Doing so cancels the current action and allows you to make your next move immediately. Use this to turn the tables on your enemies and string together Combos that weren't possible before!

ACCEL-HEAT LV.2

L1 or **L2** + (**△**, **△**) buttons
(cost: Lv.2 Skill Gauge)

This technique sends enemies into the air, making all attacks unblockable temporarily. Take advantage of this opportunity to string Combos together! Just watch out because you can't block during it either.

ACCEL-HEAT LV.3

L1 or **L2** + (**△**, **△**, **△**) buttons
(cost: Lv.3 Skill Gauge)

In addition to the Lv.2 effect, this technique boosts your speed and lets you charge and stun enemies with Dash. This is your chance to hit them with an awesome Combo!

SUPPORT ATTACK

L1 or **L2** + (**□**, **□**) buttons = Call in selected Support Character (cost: Lv.1 Skill Gauge)

A support character will appear and fight alongside you according to his or her support type. Once the support character's Stamina Bar is fully depleted, he or she will disappear. There are over 50 support characters in all. Set out and find the best combinations!

SUPPORT TYPES

JUMP

Jumps above opponent's head and repeatedly crashes down. Homes in on the enemy regardless of his level, but the attack from mid-air is easy to avoid.

GUN

Fires shots all around without moving from where the character has appeared. Stay within firing range to give yourself an advantage on the battlefield.

DASH

Searches for and rushes to directly attack the enemy. Ineffective against significantly higher-level enemies.

AREA

Attacks in a set area without moving. Enemies will not be hurt if they stay away, but this support type is very powerful, has lots of stamina and is hard to defeat.

RECOVERY

Restores health to the Player who called him or her when nearby. Rather than run away from this type, opposing Players should try to prevent their opponent's health from being restored.

JUMP

GUN

DASH

AREA

RECOVERY

RIDER

Enables faster movement and attacks by riding on the support character. There are 2 ways to attack enemies: with a charge attack that deals damage just by touching enemies, or with an unblockable attack that can be executed repeatedly with the **X** or **O** button. Press the **△** button to dismount and act independently. You can also jump back on.

SUPERATTACK

L1 or **L2** + (**X**, [character specific]) buttons
(cost: Lv.1 Skill Gauge)

Player characters each have 2 types of Super Attacks (members of Luffy's Pirate Crew have 3)! Break through and let loose a super powerful attack! You can string Super Attacks together with normal moves, or cancel them with Accel-Heat and perform another Super Attack to create a powerful combination of your own.

SECRET ATTACK

L1 or **L2** + (**O**, **O**, [character specific]) buttons
(cost: Lv.3 Skill Gauge when hits)

Input the command to start the technique! When it hits, it consumes the entire Skill Gauge (Lv.3) and unfolds into a spectacular Secret Attack! For the last step, press the **△** button for Wisdom, the **□** button for Strength, or the **O** button for Technique.

ATTACK	DEFEATS	LOSES TO
Wisdom (△ button)	Technique (O button)	Strength (□ button)
Strength (□ button)	Wisdom (△ button)	Technique (O button)
Technique (O button)	Strength (□ button)	Wisdom (△ button)

After the countdown, if you press a button that beats your opponent's button, or if you press the same button as your opponent and tie, your attack will continue and deal even more damage! Also, various bonus actions occur in battle when you win with a character's favorite button. These deal additional damage, so try to figure out what they are. On the other hand, if you lose to your opponent's button, the Secret Attack will end, dealing only minimal damage.

As long as you have the appropriate saved data, you can load a game as any captain. The data and Players you gather are saved collectively, regardless of the captain you are using.

Play through every adventure and try to complete 100 percent of the game! After clearing the game, the amount of loot you obtained will be announced. Clear the game over and over again and collect as much as you can!

SEA MAP AND PORT MOVEMENT

Move the cursor with the **L1** and **R1** buttons, or use the left analog stick to select the Port you want to dock at. Then press the **X** button to view a description of the battle set to take place there. Press the **X** button again to move. (You can only move to points that are connected to your current location by a line.)

INPUTTING/USING PASSWORD DATA IN VERSUS MODE

You can use previously built-up characters for 1P, 2P or CPU even without memory card data by using a password. Select a DATA slot at the bottom of the Character Select screen to proceed to the Input screen. Then input the password corresponding to the data from the Grand Adventure Status screen. By inputting the proper password, you can register up to 4 Guest Player Characters. You can overwrite old Guest Characters by inputting new passwords over old slots.

ARENA MODE

Select from various Status Level Ranker CPU Players and fight until you lose. The higher the Ranker you defeat, the higher your Player Ranking will rise. You can also obtain Cards for Card Collection by defeating certain enemies!

GRAND TOURNEY MODE

Play a Tournament Battle with up to 8 Players. The tournament will begin after you set the number of Players, select characters and set the Player Control (1P/2P/CPU) option. Only the results will appear after a CPU-Player only battle. After the semi-finals, the losers face off for 3rd place. Finally, the Player who wins the final round is named Grand Champion.

TRAINING MODE

Practice as much as you like on a CPU opponent without using up your Health or Skill Gauges. When you land a successful attack, the number of hits, amount of damage and OK will display. Press the **START** button to access the Command Chart (→ page 5) where OK appears next to the attacks you performed successfully. As you train, you unlock new behavior patterns for the CPU. You can change the behavior pattern by pressing the **SELECT** button or by choosing it from the Pause Menu's Set CPU option.

RECORDS

Choose this option to see records and play times for Grand Battle Mode, as well as bonuses to Secret Attacks.

Unlike normal battles, in this game you press the left analog stick **↑** to accelerate, **↓** to decelerate and either the **⊗** or **⊙** button to attack. Take control of your Spotbilled Duck and head for the goal! Just remember: Keep an eye on your health!

BATTLE BOWL (2P battle possible)

Defend your own goal while scoring points on your opponent's. Grab the Gaimon with balls on their heads and throw them into the opponent's goal for a point! Watch out! If you toss a Gaimon into your own goal, you score 3 points against your own team!

Game Items

ITEM BOXES

Item Boxes yield items when broken. They appear as Wooden Boxes, Barrels and Treasure Chests. Different types of Item Boxes contain set types of items. Knowing which boxes contain which item type can give you a big advantage. Throw Item Boxes at opponents to send them reeling backwards or swing them at enemies to knock them unconscious.

Treasure Chests
Break these for Effect Items and Coins.

Barrels & Wooden Boxes
Break these for Attack Items and Coins.

EFFECT ITEMS

Just touching these items has various effects!

Meat

Restores a small bit of Health.

Sword

Temporarily raises Attack Power and turns all techniques into unblockable attacks. However, you can't Guard while holding a Sword.

Small & Large Coins

Restore the Skill Gauge in small and large amounts.

Shield

Temporarily increases defense and enables you to stand your ground, even when hit. However, you can't move quickly while holding a Shield.

Transponder Snail

Automatically summons a support character without depleting the Skill Gauge.

Shoes

Temporarily increase speed. Run into an enemy during a high-speed Dash to knock him off his feet!

ATTACK ITEMS

These items are used to attack enemies directly. Grab, throw and swing them at your foes. Keep on the lookout for even more items that can help you win!

Bomb

Explodes on impact, dealing damage within a set area. You can also roll a bomb by setting it on an incline.

Gaimon

Fires the rifle in his hands.

Poisonous Mushroom

Sends out poisonous spores that poison enemies. A poisoned enemy's health decreases with each action that enemy takes.

4 T Bat

Swing this item at opponents to knock them high into the air.

Oil Can

Coats an opponent in oil. When covered, the character slips and slides all over, making movement troublesome. If the character touches fire, extreme damage ensues!

Burn Blade

This flaming sword is a powerful weapon, but you can only use it 3 times.

Bonfire

Lights an opponent on fire, and that character rapidly loses Health.

Shell
Emits barbed wire made of mist.

Gold Nugget

Pile up and smash down 3 Gold Nuggets, sending them in 3 different directions. Any character unlucky enough to be hit by a Nugget suffers extreme damage.

Beehive

A horde of bees emerges from within and confuses those it engulfs, preventing them from running in the direction they want to.

Stages

These are the 8 stages you can choose to explore at the beginning of a Grand Battle Mode game. Play through Grand Adventure Mode to unlock tons more hidden stages, gimmicks and situations and play completely different adventures!

FUSHA VILLAGE

Windmills line the home port of Luffy and Trace. The great pirate Shanks and his crew also once hung out here. Cows will go on a rampage and act as a third enemy if attacked, but grab and throw some grass at them and watch what happens. If you can make good use of the rotating blades, you may be able to lift yourself out of sticky situations.

BARATIE SEA RESTAURANT

The restaurant Baratie is owned by Zeff, who once helped out Sanji. However, it was destroyed mercilessly in the struggle between Luffy's Pirate Crew and Don Krieg. The remains of the pirate fleet destroyed by Hawk Eye Mihawk form an unsettling graveyard at sea. Also, the Panda-tailed shark will smash through the floor in search of prey. Falling into the water causes lots of damage, making this a very dangerous stage.

ARLONG PARK

This nerve-wracking stage brings back memories of the struggle with the Mermen led by Arlong. If the sea cow in the central pool sinks, not only will it turn the stage into a watery hell, it will also wash away everything around it. Be careful of these waves.

ROGUE TOWN

This town is known as "The Beginning and The End" because the king of the pirates, Gold Roger, was executed here. As if to predict the coming of a new pirate king, Luffy was suddenly saved from execution by lightning. However, the Navy, refusing to let such a pirate run loose, is set on catching him. They've given the order and are in hot pursuit!

DRUM CASTLE

Drum Castle was shooed away by the unjust King Wapol. The invention of Tony Tony Chopper's teacher has frozen the hearts of the people. The pink snow looks as if it is dusted with cherry blossoms. Throw it at enemies to freeze them where they stand. Wapol and his followers are out for revenge!

ALABASTA KINGDOM

This is the oasis kingdom of Alabasta. Led by Sir Crocodile, the Baroque Works secret society incited a chaotic revolution to turn the oasis into a desert. On the eve before the battle, the royal knights readied oil and canons to prepare for battle. What will be the fate of Princess Vivi and the Straw Hat Pirates?!

EDEN ROCK

The world government's headquarters is here at Eden Rock. The leaders of the government and Navy sit at the seat of justice within the palace. They say that the Seven Warlords of the Sea can be summoned to this sacred land. It seems like gimmicks have no place in this land of justice.

PIRATE SHIP

Stake your pride as a pirate in the battle game Davy Back Fight! Even a giant could ride on one of these ships. Who will the crowd cheer for? But wait, pirates aren't supposed to fight fair! Canon and objects thrown by spectators make this a deadly and desperate chaotic battle!
