The Quest for the Golden Fruit 5

Deep in the heart of Pac-Land lies the small, hidden village of the Pac-People. In the center of the village grows an ancient tree with five Golden Fruit. Legend has it that as long as the Golden Fruit remain undisturbed, Pac-Land will be bountiful and everyone, even the littlest Pac, will be happy.

The adventure begins at night when all the Pac-People are asleep and a silvery moon shines from behind gathering clouds. Several Ghosts sneak into Pac-Village to cause mischief and they unwittingly pick the Golden Fruit. Suddenly, the tree begins to shake and lightning flashes across the sky. The tree begins to rise up and from the darkness beneath, red eyes open and an evil laugh echoes out.

Spooky has been released from his prison! The Ghosts cower as Spooky commands them to hide the Golden Fruit throughout the land. Without the Golden Fruit, Pac-Village will be helpless to resist Spooky and the Ghosts.

Join Pac-Man on his quest to find the Golden Fruit and save Pac-Land.

Welcome to Pac-Land

PAC-VILLAGE

The center of Pac-Life and the starting point of **Pac-Man World™ 2**. Pac-Man can encounter a cast of characters here, both old and new, who can help him out throughout his adventures. At the center of it all rests the revered Golden Fruit Tree that once imprisoned Spooky.

FOREST

A lush meadow forest where Pac-Man must search for the first stolen fruit. Here he encounters a variety of forest enemies, including Pac-Bears, Beetles and even a Ghost carrying a Blunderbuss. Little does Pac-Man know that the Ghosts are expecting him.

TREE TOPS

Don't look down! Far up in the dizzying heights of the rainforest canopy, Pac-Man looks for the Golden Fruit. Pac-Man must be wary and avoid the Saw Blades while he seeks out the B-Doings to help him find his way out.

Welcome to Pac-Land

7

SNOW MOUNTAIN

Got your earmuffs on? Pac-Man heads for the mountain where giant snowballs and a bad case of winter stand in his way. Can he successfully cross an ice river, jump deep crevasses and dangerous avalanches, all while dodging giant snowballs?

LAVA

Hot! Hot! Hot! Pac-Man travels into an active volcano and discovers a host of fire creatures. The only thing that can protect Pac-Man from the heat of the lava is the Steel Ball Power-Up, so he'll have to make sure to use them wisely.

OCEAN

Down to the very depths of the deep, Pac-Man dons a pair of Flippers to swim through two different levels and avoid the terrors of the deep ... sharks, jellyfish and eels! Professor Pac has been up to his experimenting self and has even created a Pac-Sub to help Pac-Man get to Ghost Island in one piece.

GHOST ISLAND

Only legends describe the horrors that exist on Ghost Island ... It is a lonely place of torrential rains and lightning storms where every step and walkway can be treacherous ... and deadly!

Game Description

Pac-Man World™ 2 is an action game in which Pac-Man's adventure consist of clearing various levels and battling formidable Bosses. The basic game contents will be explained below.

Pac-Man is back! The Ghost Gang has snatched the Magical Golden Fruit of Pac-Land. Pac-Man must explore the vast world of Pac-Land in an attempt to retrieve what was stolen, meeting a zany cast of characters along the way. Little does he know, the Ghost Gang has mistakenly unleashed something wicked that will soon threaten Pac-Land!

Pac-Man World™ 2 is a fast, fun and furious linear 3D traversal action platform game.

What are Levels?

The modes in which you control Pac-Man and enjoy the game are called levels. There are two types of levels: one where you defeat enemies and collect items, and another that consists only of Boss Battles.

What is the World Map?

9

Pac-Man can move freely over the World Map and choose which levels to play. You can replay levels over again to achieve 100% completion, beat the high score, or go through Time Trial Mode. You're free to choose the path that appeals to you most.

New to Pac-Man World™ 2

In addition to the regular levels in **Pac-Man World™ 2**, there are levels that take place while on ice skates, in-line skates, swimming with flippers, or in a submarine. These levels allow you to enjoy adventures of a slightly different flavor.

Items

15

There are a variety of different items that can be found in the game. Some are in plain sight, and others are hidden in chests and crates. Some enemies may carry items, but the only way to find out is to defeat them!

Pac-Dot

Health Wedge

Power Pellet

Golden Fruit

Fruit

Token

Power-Up

Extra Life

POWER-UPS

There are a few different Power-Ups in the game that will help Pac-Man travel through the game.

STEEL BALL POWER-UP

There aren't many things that can hurt Pac-Man when he's using the Steel Ball Power-Up. This Power-Up makes him heavy enough to walk around underwater and bust open underwater chests or crates with a Butt-Bounce or Rev Roll. Wait until it wears off to jump out of deep water.

POWER PELLETT

Ghosts can no longer harm Pac-Man when he gains the power of the Power Pellet. In fact, the Ghosts turn blue and run! After munching a Power Pellet, quickly chase down all the Ghosts you can. The more Ghosts you chomp with a single Power Pellet, the more points you are awarded.

SHRINK POWER-UP

There are areas of the game that Pac-Man cannot enter due to his size. Pac-Man shrinks down to a miniscule size when he touches the Shrink Power-Up. Be careful when using a Shrink Power-Up, because Pac-Man can easily be squashed like a bug!

MORE ITEMS THAT CAN BE PICKED UP

CHECKPOINT

Make it to one of these and Pac-Man will start again from this position if he loses a life. Galaxians also count as checkpoints.

EXTRA LIFE

You can always use an Extra Life. The more lives you have, the longer you can play.

FRUIT

Fruit allows you to open Fruit Chests and is also counted at the end of the level to determine how much of the level was completed.

TOKENS

Tokens are used to activate the arcade games in Pac-Village. Collect as many tokens as you can to activate each of the arcade games.

HEALTH WEDGES

During each level, pie-shaped wedges will appear which replenish Pac-Man's Health Meter. Each wedge picked up adds one Health Wedge to the Health Meter.

Take advantage of various mechanics to get Pac-Man through his adventure, but keep in mind that each mechanic has unique properties.

SWITCHES

Butt-Bounce on switches to activate them.

- Green - Used only once, these usually start moving platforms or make items appear.
- Orange - Used multiple times, these timed switches activate Power-Ups or mechanics.
- Blue - These switches are toggles. At one point, they may activate something obvious, but what does the second switch do?

MOVING PLATFORMS AND HELIVATORS

Jump on these platforms to move across areas that you normally might not be able to cross. There is a slight difference between the two. Moving platforms move on their own, but Pac-Man must power the Helivator. Just jump on the Helivator and Rev Roll (hold the  Button) to ride it. The Helivator will stop moving when it reaches its destination.

B-DOINGS

Butt-Bounce on these for a quick launch into the air. It's like jumping on a trampoline. There are three different types of B-Doings.

- B-Doing - This B-Doing will launch Pac-Man straight up in the air to a short distance.
- Super B-Doing - This B-Doing launches Pac-Man into orbit!
- Angled B-Doing - The Angled B-Doing launches Pac-Man in the direction that the arrow points.

CHESTS AND CRATES

Break open every one of these you can find. They may contain Extra Lives, Fruit, Power-Ups and other useful items ... or enemies! Crates can be opened by Flip Kicking, Butt-Bouncing on or Rev Rolling into them, but Chests cannot be opened until you have the Fruit type that is displayed on it.

PAC-DOT CHAINS

Sometimes switches will unlock Pac-Dot Chains that allow Pac-Man to fly to areas normally inaccessible. Eat the first red Pac-Dot and the Chain will automatically carry Pac-Man to his final destination.

People of Pac-Land

Professor Pac

Pac-Ranger

Handy-Pac

Sue

Pac-Land is populated with a variety of different creatures, both hostile and friendly. Finding a way to defeat the enemies is your challenge.

BAT

The Bat is the most common flying predator in Pac-Land ... at night. They are very territorial creatures that will attack anything that enters their domain. Bats aren't very smart, but will fight to the end.

BEETLE

Beetles are predators that live in various regions of Pac-Land. When an enemy enters the area where a Beetle lives, it will try to attack with its massive pincers.

EEL

The Eel is a predator that lurks in the dark caves of the Coral Reefs. Be careful, because the Eel gives off an electrical charge in a small radius around it.

GHOSTS

There are a variety of different Ghosts that can be found in Pac-Land and can carry a variety of different weapons. Just make sure to avoid their touch!!!

JELLYFISH

The Jellyfish simply floats in the water, but beware of its stinging tentacles.

JUMPING FISH

The Jumping Fish is native to the cold waters of the Snow Mountain region. The Jumping Fish jump out of the water in an attempt to catch low flying birds and other small morsels that come across their water habitat.

NEANDER-PAC

Ever wonder what the Pac-People evolved from? This club-carrying enemy is definitely a block-head!

PAC-ASITES

Pac-asites are a strange combination of a Velociraptor and a Pit-Bull. They have the pack hunting instincts of Velociraptors, with the size and ferocity of a Pit-Bull. Watch out for the fiery Pac-asite deep in the lava tubes!

PAC-BEAR

The Pac-Bear is one of the largest natural creatures in Pac-Land and has little to fear. Pac-Bears are large enough to eat any of the Pac-People, but prefer to play with their food before eating it. Pac-Bears can be found in various climates.

PAC-CUB

Pac-Cub is a baby of the Pac-Bear. They are easier to deal with, but still have a whallop of a punch!

POOKA

Pooka's are the underground version of a Pigeon: they bounce around, bumping into each other and objects in the environment. Pookas never stray far from their burrows (hole in the ground), and they are often prey to the Pooka Plants. Be careful not to touch them or come too close!

POOKA PLANT

The Pooka Plant is a plant creature that eats Pookas to survive. The Pooka Plant is nearly blind and has been known to attack and devour any other creatures that enter its path.

REV ROLL RAM

High in the Snow Mountains is where the Rev Roll Ram can be found. Be wary of its rolling attacks or you'll be knocked off the side of the mountain.

Enemies

RGB'S

At first glance, these creatures look rather dumb, but get too close and they'll show you why they are ferocious.

SHARK

The Shark is a huge predator of the deep ocean. Feared by all creatures in the water, the Shark feeds upon the fear of its prey to attack with stealth and vigor.

SKELETON

Think Skeletons are scary in real life? Try these ones on for size. They don't have anything to fear, because they don't have a brain!

SPIDER

Arachnophobia? These spiders will give you nightmares for weeks!

STONY

Stony is a magical rock creature that shoots fireballs out of its mouth. Stony is a great guardian for the ancient races and never moves from the area that it blocks. Stony matches the terrain that surrounds it, and can be difficult to distinguish from the surrounding terrain.

Time Trial Mode

25

Stopwatch

Bonus Time Clock

Current Time

Time Trial Mode is a race against the clock to earn Bonus Tokens at the end of a level. Each level in the game, with the exception of the Boss Levels and Pac-Village, has a Time Trial Mode.

Time Trial Mode can only be accessed in a level that has been previously completed. At the start of the completed level, a Stopwatch will appear floating on the ground. Here, you have the choice of touching the Stopwatch to start the Time Trial Mode or bypassing it to re-traverse the level to obtain additional Fruit, lives or find hidden items. If you bypass the Stopwatch and walk into the level, the Stopwatch disappears. To start Time Trial Mode on the level, Pac-Man just needs to touch the Stopwatch. At that point, a Timer appears in the lower right corner of the screen.

Throughout the level in Time Trial Mode, you will find various Bonus Time Clocks. These clocks are used to freeze the Timer for a period of time. There are 2- and 4- second Bonus Time Clocks. Gobbling Ghosts also freezes the timer. Each Ghost gobbled freezes the Timer for 4 seconds. The items that freeze the Timer are not cumulative.

Time Trial Mode

During Time Trial Mode Pac-Man cannot lose a life. If Pac-Man dies in the level from falling into a chasm or taking damage from enemies, he automatically starts at the beginning of the level. Once back at the beginning of the level, you have a few different choices: you can choose to enter Time Trial Mode again, go through the level normally, or exit back to the World Map.

If you reach the end of the level with a better time than the Best Time Trial time, you are rewarded with a Token.

See if you can beat all of the best Time Trial times!

Maze Mode

CONTROLS

LEFT ANALOG STICK or **Directional Buttons** = Move Pac-Man
or Menu Selection

R1 Button = Changes Camera View

START Button = Options

As you play through the levels of the game, you will find Galaxians that will transport you into Maze Mode. In Maze Mode, your goal is to complete the maze with the highest score possible. Run through the maze chomping Pac-Dots while avoiding the Ghosts. Game play is the same as the original Pac-Man Arcade game, but with a few differences.

Maze Mode

27

The rules are slightly different than the original arcade game:

1. You have three chances to complete the level.
2. You do not lose any lives from game play.
3. Pac-Dots and Fruit collected add to the Level Score and Grand Scores, but not toward 100% completion.

Arcade Games

As you collect Tokens in the game levels, the machines in the arcade become active. There are four arcade games and the game music juke box that can be opened for free play, and all of the **Pac-Man World™ 2** game play mazes that you've found will also be available for replay in the arcade.

To play any one of the arcade games that are opened up, enter the arcade in Pac-Village, walk up to the arcade machine you want to play, and press the **△** Button.
