

The cover art features a central scene of a battle with several warriors on horseback. One warrior in the foreground is on a white horse, another on a brown horse, and a third on a dark horse. A woman in a pink and white robe is also visible. The background is a dark, rocky landscape with a bright, glowing light source in the center. Large, stylized portraits of three men with crowns and beards are overlaid on the scene. The title 'Romance VIII of The Three Kingdoms' is written in a large, yellow, stylized font with a red outline at the bottom.

Background

The epic history of China spans more than four centuries, and yet the most admired, the most loved period lasted for barely 100 years. Even though it remains a confusion of intermixed guesswork and historical fact, and even though it highlights the tragedy of war, the hopelessness of life and the inherent dangers of power, still its popularity soars.

"The Three Kingdoms."

Now is your chance to experience this turbulent period, first hand...

GAME BASICS

Take on the life of an officer during the Three Kingdoms era, and try to survive its turmoil. Become a hero uniting the people, a wise advisor employing depthless knowledge, or an unequalled warrior routing your foes in battle, and work to unite China.

Class and Rank

There are eight different officer ranks; Ruler, Viceroy, Prefect, Warlord, Vassal, Captain, Comrade and Free Officer. Captain and Comrade are the classes of officers in wandering armies called Bands (a force that does not rule a city), and Free Officers do not belong to any power. Officers who serve Rulers also have a Rank, from 1st to 9th.

Complete a successful attack/distinguish yourself in battle/complete a job

Deeds increase

Class raises (pay increases)

Increase chance of being selected as a Prefect or Viceroy

Power increases

Skills and Tactics

As well as war and intelligence attributes, officers also have **Skills** and **Tactics**.

*Tactics are more likely to succeed at a higher Level. Your Level can be raised at the city by Training, (up to 4).

Skills: Increase the success rate and effectiveness of commands, and also increase the number of **Ploys** available for use during battle (p.35).

Example - The skill **Taunt** increases the effect of **Riot**. Adds the ploy **Taunt** during battle.

Tactics: Attacks for use during battle, that are either stronger than normal or have some special effect.

Example - The tactic **Spearwall** will cause 2.5 times the normal damage to the enemy, if successful.

Human Relations

You can become friendly with other officers by talking to them, or by holding banquets for them. As you become better acquainted, your **Bond** with that officer will get stronger, and you may even learn skills or tactics from them during conversation. Killing an officer will make you an enemy of the officer's family and sworn brothers.

Rivalry can also develop.

Fame

Your actions and events can lead to greater **Fame**. If your **Fame** rises high enough, you may start to receive items or even get married.

On the other hand, it is possible for your reputation to suffer, depending on your actions. If you start to become unpopular, the people and other officers may act differently toward you. Some may even start to ignore you when you try to talk to them.

Fame Up

Help people in trouble, carry out requests for your Ruler, etc.

Fame Down

Execute officers, pillage, etc.

GAME FLOW

The game is divided into four main parts - **Council**, **City**, **War Council** and **Battle**. Each part is comprised of turns, in which you can give commands to your officers. A **Council** is held once every three months, and if it should lead to war then a **War Council** will take place prior to **Battle**. A Free Officer can only use the Personal Commands under **City**.

Council - Strategy Commands (p.25) & assigning Tasks (p.6)

Occurs in the first, fourth, seventh and tenth months of each year. Decide the strategy for each force, region and city using the Strategy Commands. Press the **△** button to close the Strategy Commands. Next, assign Tasks. The officers to whom Tasks are assigned will work within their city to complete them. Bands do not assign Tasks, and Free Officers have no Council.

City - Personal Commands (p.30)

Personal Commands allow you to perform tasks, work on your tactics and deepen your friendships with other officers. There are numerous locations and facilities in each city, and the commands available at each location are also different. Press the **△** button to end the current officer's turn.

War Council - War Council Commands (p.34)

The War Council Commands allow you to check the status of battles and decide which strategies you will employ in the upcoming battle. The selection of strategies available to you depends on if you are attacking, or on the defensive. Select **Begin** to start fighting.

Battle - Battle Commands (p.35)

Each turn, units act one by one. The battle progresses by giving Battle Commands to each unit in turn. Once the battle is over, you return to the Council.

GAME OVER - THE FOLLOWING CONDITIONS RESULT IN GAME OVER:

1. After dying, you have no one to carry on your legacy (a child/grandchild/sworn brother).
2. It becomes the year 350 A.D.
3. A force achieves unification while you are a Free Officer or in a Band. (Captain, Comrade)

COUNCIL

During the Strategy Commands (p.25) part of a Council, you can only give orders and make proposals as long as you have Strategy Points remaining. The officer who uses Strategy Points in order to make a proposal or give an order is called the **Proposing Officer**. The proposing officer's points will recover the following month. Press the  button to end giving Strategy Commands.

Task	Strategy Points Recovered	Max Strategy Points
Viceroy	5	6
Prefect	4	6
Warlord (for Ruler)	5	6
Warlord (for Viceroy)	4	6
Warlord (for Prefect)	3	6
Vassal	1	1
Captain	3	6
Comrade	1	1

Privilege - (Vassals only)

By completing tasks successfully or by moving up in rank, you may be granted a **Privilege**.

If you use a Privilege, your proposal will always be accepted, so use it wisely.

Assign Tasks

At the end of the Council, you must assign tasks for the coming three months. Vassals and Warlords will propose tasks that they wish to undertake. The Prefect gives tasks out to the officers in his city. Those who are ordered to complete a task will carry it out at the City screen. Their **Deeds** will increase if they complete the task successfully.

Task	Ability	Skill	Description
Cultivate	Charisma	Plow	Aid development and increase income of supplies
Invest	Politics	Trade	Aid investment and increase income of gold
Research	Intelligence	Invent	Aid research, and raise the Research Lv.
Repair	Intelligence	Build	Increase castle defenses
Patrol	War	Patrol	Increase public security, income, and population

Auto

Automatically gives the most fitting orders to every officer. You can also select a specific emphasis for your subordinates' tasks, and thus divide the work quickly between officers. By selecting **Request**, you can let your subordinates carry out the tasks that they have proposed for themselves.

AP

Using a **Strategy Command** (p.25) or a **Personal Command** (p.30) costs AP. Personal Commands can be repeated until you have no AP remaining. AP are recovered on the following turn. The amount recovered depends upon the officer's abilities and health.

AP required to perform action

Current remaining AP

TASKS

If you wish to perform cultivation, for instance, select **Fields** then **Cultivate**. You can repeat a job as many times as you like, so long as you have AP remaining. Use **Observe** to increase the amount of **Trust** people have in you. Jobs will also be more successful if you are trusted. Press the **△** button to end the current officer's turn.

Pressing the **⊙** button on the City screen displays your current task.

Bad work can upset your superiors, and even lead to a reduction in rank.

Goals

As the game progresses, people may present you with specific goals, rather than tasks. Fulfilling these goals will often increase **Fame** and **Deeds** substantially. Some of these goals come with a time limit, such as find a given item within 6 months. You will be rewarded for completing the job within the given period, but should you take any longer, the bond between you and the requesting officer will be weakened.

A description of your current goal can be found under **City Officer - Goals**.

Handling Human Resources

Goals will sometimes be appointed to officers by their Ruler (or Prefect). If an officer completes his appointment, then his **Deeds** will rise substantially.

Free Officers can be found at the **Inn** (p.31). As a Ruler you can use **Talk**, or as with any other officer **Nominate**, to try and get them to join your force. Even if there is no one at the Inn, there may still be Free Officers elsewhere in the city. If you observe at other locations, you might be able to find them.

Also, if you observe at the **Gate** (p.30) you may learn more about the movements of Free Officers.

WAR COUNCIL

If you or your subordinate officers decide to march, then you will be taken to the War Council screen. After preparing your strategy select **Begin** to start the battle.

Marching Orders – Ruler/Prefect/Warlord (when proposed)

1. Select the start and end points of your march.
2. **Organize** your force.
3. Select an **Acting Officer**.
4. Manually organize your force.
5. Select the Commander, Tactician, Troops and Troop Types.
6. Confirm.

Adjust more detailed settings under **Personal Organization**.

The abilities of the Commander and Tactician will decide which **Strategy** (p.34) and **Ploys** (p.35) you can select during the War Council. Loss of the unit with the Commander will result in a large drop in morale. Loss of the unit with the Tactician will render you unable to use any Ploys.

Auto

Efficiently divides troops, troop types and weapons between all acting officers. You can refine the distribution of troops selecting a more specific emphasis.

War Council Points

During the War Council, you spend **War Council Points (PP)** to allow the use of stratagems in the coming battle, or to lay traps on the battlefield. The amount of PP is determined by the **Intelligence** of the Commander and Tactician. The higher the combined **Intelligence** of the Commander and Tactician, the more ploys you will be able to use.

AIM FOR THE OUTPOSTS!

When you are on the attack, first take out all enemy outposts. If you are on the defensive, move swiftly to protect your outposts.

Supplies to your troops are being cut off. Defeat all enemy troops at the outpost and move a unit atop the outpost to destroy it.

This displays the area within which your troops will still receive supplies. If you cross this line without destroying the outpost, morale will fall and your troops will desert.

BATTLE

Each unit takes turns moving. If you are the Commander or Organizer of the march, then you will issue orders to the entire army. Otherwise, you can only issue orders to the unit you are leading.

• Winning Conditions

Attacking Side: Defeat your opponent's Main Defense Army. Reduce the castle defense to 0.

Defending Side: Defeat your opponent's Main Attack Army. The remaining turns reach 0.

The Flow of Battle

1. Movement

First you must **Move** your units. It is also possible to **Wait** and observe the enemy's movements.

Target Point

Move automatically every turn toward this point.

Movement Area

Movement is restricted to this area.

Forced March Area

Entering this area lowers troops morale.

Range of Vision

Encountering enemies outside of visual range can lead to an attack.

2. Actions and Attacking

Actions such as **Ploy** and **Retreat** can only be carried out once a turn. If you wish to advance to the next unit's turn, select **Wait**. If an enemy unit or enemy gate is within the unit's range of vision, then you can also select **Attack**. Select a unit or gate highlighted by the cursor and then select a method of **Attack** (p.37).

The attack cursor.

3. Tactics

Using the correct tactic (p.37) when attacking can lead to massive damage. Using a tactic requires **Tactic Points (TP)**. These are recovered every turn. The rate of recovery depends upon the abilities of the officer in command and the status of the unit. If defending, recovery will be faster if the unit is inside an outpost or castle.

Tactic	Rate	Max	Min	Level	Exp	SP
Lightning	10%	10	1	1	1	10
Shock	15%	15	1	1	1	15
Charge	20%	20	1	1	1	20
March	30%	30	1	1	1	30

The more powerful the tactic, the higher the cost in TP.

CONDITION EFFECTS

Enemy stratagems or ploys can cause your units to suffer from various conditions. After a certain number of turns, or the successful use of **Calm** (p.39), the unit will return to normal.

Panic
Unit cannot perform any actions, and morale decreases every turn.

Confused
Unit cannot perform any actions.

Halted
Unit cannot move.

Taunt
Unit will not obey orders, and moves on its own.

The various functions of the controller are also displayed during the game. Control with a SONY digital controller is exactly the same.

TIPS FOR EACH STATUS

AS A RULER

Q: What should I do when I become a Ruler?

A: At the Council, assign jobs to each of your subordinates. If you don't know how to assign jobs to your subordinates, use the **Auto** (p.6) Command to automatically issue appropriate jobs for everyone. If a subordinate proposes a job, let him do it. You will obtain better results. If you assign a different job, that subordinate may lose motivation.

Q: What can I do while my subordinates are working?

A: As a Ruler, it is important to maintain strong relationships with your officers. Try increasing **Bonds** with your officers through the **Talk** (p.30) and **Banquet** (p.32) Commands. Build up your reputation. Using the **Observe** command may lead you to events that will gain you fame.

Q: How do I arrange for additional military support during battle?

A: Use the **Reinforcements** (p.27) Command. After reinforcements arrive, your troops' morale will improve.

Q: What should I pay attention to during the War Council (p.5, 8)?

A: During the War Council, you can decide which Strategies and Ploys to use. Subordinate officers will evaluate the battle situation and offer advice. You have the option to accept or reject the advice of your officers.

Q: I don't want to issue orders to all of my troops. Is there a way to avoid this?

A: A good Ruler knows when to delegate control. If you do not want to issue orders, use the **Auto** (p.40) Command, and orders will be given to your troops automatically.

Q: When should I form a new region?

A: You should form a new region once you conquer more than eight cities. If you have Warlords on your side, they will advise the proper time to form a region. Use the **Region** (p.25) Command to do so.

AS A VICEROY OR PREFECT

Q: How can I master Domestic affairs?

A: Always check the target numbers you need to achieve for Domestic affairs. Go to the **City Info Screen** (p.19) and select Status. Also, use the **Observe** (p.32) Command to increase **Trust** (p.7) among your townsmen.

Q: Can I hire officers?

A: Yes, you can **Hire** (p.26) officers, but they will not be your direct subordinates. Be forewarned. If your Ruler issues an **Assign** (p.26) Command, these officers may leave you.

Q: Can I relocate to another city?

A: Yes, you can **Transfer** (p.26) to another city. However, if a transfer is granted, you will become a Vassal. If you don't want to lose your subordinates, execute a **Coup** (p.27). Your subordinates will follow you if you have a high **Bond Level**.

Q: What are some of my responsibilities as a Viceroy?

A: You should always review the City Info of those cities under your control (p.19). It is important to station your troops and defend key interests. You can **Assign** (p.26) and **Transport** (p.26) troops to battle lines and cities. If combat intensifies, you may want to issue a **Reinforcements** (p.27) order.

Q: Are there any other things I should be careful of as a Viceroy?

A: If your region becomes too large, some of your cities may be assigned to a different region. You should always keep your favorite officers at hand.

AS A WARLORD

Q: How do I raise my Deeds (P.4) Level?

A: Try raising your Deeds Level by suggesting a **Tactic** (P.29) to your Ruler. If the tactic succeeds, your Deeds Level will increase. However, if it fails, your Ruler could admonish you. Use the **Spy** (p.29) Command to gather information on enemies. You will be able to recommend better tactics. If you have a high **Intelligence** Level, the tactics you choose are more likely to succeed.

Q: Can I go to battle at any time?

A: You can go to battle at any time by proposing a **March** (p.27). If you propose a March and a battle ensues, you will have control over all troops. It is likely that you will become the **Tactician** (p.8) for that battle, so pay close attention to any **Strategy** (p.34) or **Ploys** (p.35) suggested during the **War Council** (p.8). Be careful. If a Tactician is captured during battle, troops will not be able to execute a **Ploy** (p.35).

AS A VASSAL

Q: How can I elevate my status from a Vassal?

A: With the right approach you can become a Prefect or a Viceroy. First, know yourself, and play up your strengths. Use **Train** (p.32) to develop your abilities. For example, if you have a high **Politics** (p.33) Level, use **Observe** frequently and work hard at domestic affairs. If your **Intelligence** Level is greater than 70 points, you can become a Warlord. Do what you can to raise your **Deeds** (p.4) Level.

Q: What if I'm not assigned a task?

A: Be persistent about suggesting tasks at the Council. For example, with an average **War** ability, you might work on **Safety**. Suggest it at the Council. If you don't have any outstanding abilities, go to the **Barracks** (p.31) and choose **Train** (p.31) to improve your **Skill** (p.33) Levels. Also, some items can augment abilities. Use the **Buy** (p.32) Command to purchase **Items** (p.41)

Q: I am still at 8th Class (p.4). How can I earn a promotion?

A: Use the **Hire** (p.26) Command to appoint Free Officers. This will help increase your **Deeds** (p.4) Level quickly. If your **Deeds** increase, you could be promoted.

Q: How do I choose the right Tactics?

A: Choose Tactics based on the battlefield terrain. If Tactics don't match the battlefield terrain, even high-level Tactics become ineffective. Try using **Charge** (p.37) for flatlands and roads, and **Ambush** (p.37) for forests.

AS A CAPTAIN OR COMRADE

Q: My city is under siege and is facing ruin. What should I do?

A: Always make sure you have enough income to hire more soldiers. Otherwise your **Band** could face defeat. If your city is surrounded, **Draft** (p.27, 31) soldiers and strengthen your troops. It might be a good idea to use the **Move** (p.27, 36) Command to move to another city and find vacant land to **Claim** (p.27).

AS A FREE OFFICER

Q: What should I do first?

A: Use the **Relocate** (p.30) Command to move to other cities and **Apply** (p.30) to join a ruling Force. If successful, you will become a Vassal. Before applying for a ruling force, use the **Observe** Command in the city where you are planning to move. It will help improve your Domestic ability.

Q: How do I become a Captain?

A: **Form** (p.32) a **Band** to become a Captain. You will achieve more success as a Captain if you have a **Sworn Brother**.

WAR COUNCIL COMMANDS

Once you decide to March in a Council, War Council will be held. War Councils are only held for main forces, not for Reinforcements. During the War Council you can check the status of the armies, prepare your strategy, and ready Traps and Stratagems to use during battle. Selecting Traps and Stratagems takes War Council Points (PP). The number of PP you have depends upon the **Intelligence** of your Commander. You can only use stratagems when you have a Tactician present.

CONDITIONS

Check overall conditions before the battle begins, especially the details of reinforcements.

COMMAND	RANK	EXPLANATION
	All ranks	<p>The Tactician will report various information on the enemy. You can see more detailed information if you have spied on the target city. COMMAND	RANK	EXPLANATION

The type of trap will be determined automatically by the type of ground on which it is placed. It takes 30 PP to lay a trap. COMMAND	RANK	EXPLANATION

The acting officer will be selected automatically. Can only be selected when a Riot (p.29) has been successful during the Council. If the acting officer has high Intelligence and the skill to Persuade , then this ploy is more likely to be successful.

COMMAND	RANK	EXPLANATION
Draft	Commander (when defending)	Draft people from within the castle and increase the number of defenders. The number of troops that may be drafted is proportional to the city's Population .
Repair	Commander (when defending)	Increase the castle's Defense . For a couple of turns, it will become harder to lower the castle's Defense . The fewer enemies within visual range of the castle (p.9), the more successful Repair is like to be.

Escape	Commander (when defending)	Return all allies within sight of an outpost to the castle. May fail if enemies occupy the outpost.

Rally	Commander	Raise the morale of all friendly units. The higher the Commander's Fame , the more successful Rally is likely to be.
Wind	Commander	Change the direction of the wind. If your Tactician's Intelligence is high, he is more likely to be able to change the wind direction.

Mirage	Commander	Confuse enemy units with mirages. May only be used when conditions are cloudy. The higher your Tactician's Intelligence , the more successful Mirage is likely to be.

MOVE

Move carefully within your range of sight until you find your footing.

COMMAND	RANK	EXPLANATION

EFFECTS OF WEATHER ON BATTLE
