SETTING UP THE GAME

Create a **User Profile** to track and save your settings preferences, stats, and favorite international team. After selecting a favorite team, it becomes the default choice in Play Now and Practice modes.

PLAY NOW

After selecting PLAY NOW from the Main menu (for the first time), you must complete a rugby tutorial to help get you familiar with the basic controls and tactics. Once these exercises are complete, you'll have access to the Game Modes menu.

CONTROLLER SELECT SCREEN/TEAM SELECT SCREEN

From the Controller Select screen press the D-button \leftrightarrow to move the controller icon over to the team you wish to play for. When playing with two players, you can choose to play cooperatively or against each other. You can play as any INTERNATIONAL, SUPER 12, EUROPEAN, or REPRESENTATIVE squad.

Once the teams, location, and match parameters are set, you can edit your lineup and change your default Kicker (K) and Captain (C):

- ❖ To swap players press the D-button \updownarrow to highlight a squad member. Press the \odot button to view his stats; press the \otimes button to select him.
- ❖ Press the D-button \updownarrow to highlight the player to swap with and press the \otimes button. The two players swap positions.

NOTE: Substitutes are numbered 16-22. Reserves, who cannot be used in a match, are shown with the letter R next to their name.

- ❖ To change your Kicker or Captain, highlight the player you wish to take on that role, then press the **R1** button or the **L1** button respectively. Select DONE to continue to the kick-off.

PLAYING THE GAME

Lightning-fast backs, 300-pound forwards, huge hits, and no pads ... this is Rugby in its greatest glory.

THE MOMENTUM METER

The Momentum gauge displays the team currently in the ascendancy in the match. Retain control of the ball to fill the gauge and further increase your chances of keeping it. Constantly recycle possession in order to build team momentum and disrupt your opponent's efforts with big hits and by finding touch.

The gauge is affected by such factors as the participation of a commanding player, home advantage, previous results and the opposition's skill.

THE SCRIMMAGE BAR

During a ruck, maul, or scrum, bars in the colors of both teams appear above the scrum, indicating the amount of control each team possesses at that moment. The amount of control a team can seize is affected by several factors, including which team went into the scrum with the ball in their possession, the ability and number of the players binding in, and general team ability.

SET PLAYS

During scrums and mauls, both the attacking and defending teams can employ set plays when the ball is loose. The Set Play indicator displays the options available to the attacking team.

TO INITIATE A SET PLAY

SCRUMS

1. Before the ball is played out from the scrum, the attacking team (with the feed) selects one of four attacking set-play moves by pressing the D-button. The defending team selects one of the four defensive set-play formations, depending on what he thinks the attacking team will do with the ball once released.
2. If the ball is successfully hooked by the attacking team, the Scrum Half initiates the chosen set play automatically when he passes it out to the backs. The marker above the Scrum Half's head flashes red when his players are not in formation for the set play. Once the marker turns green the set play can be initiated.
3. Four button icons briefly appear over four separate players' heads. Press the corresponding button to select one of these players to control.

EA SPORTS TIP: The Pocket play is a kick-based set play, so no icon appears.

RUCKS

- ❖ Once the ball is won in the ruck and before the ball is released from it, the attacking team can select one of four attacking set-play moves by pressing the D-button. Similar to a scrum situation, the marker flashes red when players are not in formation for the set play. Once the marker turns green the set play can be initiated.
- ❖ Once the ball is lost and, if able, before the attacking team releases it from the ruck, the defending team selects one of the four defensive set-play formations, depending on what they think the attacking team will do with the ball once released.

PENALTY OPTIONS

Upon being awarded a penalty, you have the option to KICK AT GOAL, PUNT up the field or into touch, force a SCRUM with your put-in, or just take a tap-kick penalty (a kick to self) to restart the game with possession and RUN with the ball. Weigh up such factors as the state of the match and how far you may be from the opposition's goal-line.

PAUSE MENU

Press the  button to access the Pause menu. Here you can view instant replays, make substitutions or change your kicker, view match stats, adjust the camera angle, tailor game settings, and resume or quit the current match. If you quit a Tournament mode game you automatically forfeit the match.

NOTE: You may replace up to seven players during a match (but only one during stoppage).

NOTE: When one of your players is injured during play, the Replace Injured Player screen appears, listing all the possible replacements. To replace the injured player (shown at the top of the screen), highlight and select a substitute to come into the game.

NOTE: When changing your kicker, each player's Goal Kicking Rating is displayed to assist you.

TOURNAMENT MENU (WORLD LEAGUE ONLY)

There are additional menu options for this tournament:

- Player Recruitment** Scroll through Free Agents, International, Super 12, and European, and other players' stats, trade point, and maintenance costs. Depending on your choice from the World League Settings screen, you can trade between one and five players per season (and up to 30 during the close season). Trading players requires Trade Points.
- Team Record** Chart your team's match record and final divisional position over the seasons.
- Trade History** Check your team's Incoming and Outgoing player trades since the start of the World League.

TRADE POINTS

In order to buy a player you need to compile the required number of Trade Points (you will not receive anything for a player traded out). Your first season begins with 12 points but you can add to this total with every tie, win, and try scored. Finishing the season at the top of a division rewards you with bonus Trade Points.

MAINTENANCE POINTS

Maintenance Points are similar to wages. Your Maintenance and Trade Point status are displayed after each match. Point balances can also be found on the Squad Information and Player Recruitment screens.

NOTE: You must have enough Maintenance Points at the end of the season to cover the combined point value of all your players.

TO MAKE A PLAYER TRADE:

1. Select PLAYER RECRUITMENT from the World League menu; cycle through available players.
2. Select a player from any available team. His current Trade Point and Maintenance Point value appears beside his name.
3. To trade the highlighted player, press the  button (your club's team sheet appears). Highlight a current squad player you wish to replace and select him. The players are traded.

TOURNAMENT REGULATIONS

INJURIES

Some players remain sidelined longer than others—it all depends on the severity of the injury. The team that has strength in numbers stands the best chance of building momentum through a tournament.

DISCIPLINE

If a player receives a yellow card he is 'sin binned' (removed from play) for ten minutes. If two yellow cards are handed out, or if the player commits a foul that is serious enough to warrant a red card, he is disqualified from the match. His team cannot sub in another player in his absence.

PRACTICE

Hone your skills in the basics of the game. You can practice in the following modes: BASIC TRAINING, FREE PLAY, SCRIMMAGE situations, and GOAL KICKING.

HINTS AND TIPS

THE SCRUM

- ❖ Angle the feed into the scrum to lessen the chances of the opposition hooking the ball away from you. The further you hold the direction, the greater the angle of the feed. Be aware that the referee may penalize you with a Free Kick.
- ❖ Timing your push to perfection significantly increases your chances of winning scrums against the head.
- ❖ Rotating the scrum is a good tactic to use if your team is being driven back by the opposition pack. Collapsing the scrum is an emergency response if your team is being driven back by the opposition pack in a dangerous position.

KICKING

- ❖ The better your kicker's Goal Kicking ability, the longer you have to time the kick with the Kick gauge.

SIDESTEPPING

- ❖ A sudden burst of speed in combination with a sidestep can be more effective than a sidestep alone.

ADVANTAGE

- ❖ When an advantage is being played in your favor, take more risks than usual (with the knowledge that play will be pulled back if it all goes horribly wrong). Advantage is indicated when a notification box appears below the scoreline.
