If you, or anyone in your family, has an epileptic condition, consult your physician prior to playing. If you experience any of the following symptoms while playing a video game — dizziness, altered vision, eye or muscle twitches, loss of awareness, disorientation, any involuntary movement, or convulsions — **IMMEDIATELY** discontinue use and consult your physician before resuming play.

WARNING TO OWNERS OF PROJECTION TELEVISIONS:

Do not connect your PlayStation®2 console to a projection TV without first consulting the user manual for your projection TV, unless it is of the LCD type. Otherwise, it may permanently damage your TV screen.

USE OF UNAUTHORIZED PRODUCT:

The use of software or peripherals not authorized by Sony Computer Entertainment America may damage your console and/or invalidate your warranty. Only official or licensed peripherals should be used in the controller ports or memory card slots.

HANDLING YOUR PLAYSTATION®2 FORMAT DISC:

- Do not bend it, crush it or submerge it in liquids.
- Do not leave it in direct sunlight or near a radiator or other source of heat.
- Be sure to take an occasional rest break during extended play.

HEALTH/PSI POWER

AMMO REMAINING
IN CURRENT WEAPON

power and health

Vattic's health and psi power are shown at the top of the screen...

health

As Vattic gets hurt in combat, his health will reduce. When it runs out Vattic dies – game over.

Restore health by using Vattic's Heal psi power, locating a first aid kit, or seeking aid from a friendly medic.

psi power

When Vattic engages his psi ability, he uses up psi power. If he runs out of psi power, he may experience a mental brown-out and if lack of psi power snaps his mind back to his body (see Projection) a moment's vulnerable disorientation may result.

When psi power is low, switch to weapons or find somewhere quiet to hide to let it recharge.

getting around

3rd person view

Move Vattic in 3rd person view using the left analog stick. Press **↑↓** to move forwards and backwards and **←→** to move left and right.

WALLS AND OBSTACLES FOR STEALTH AND COVER

When Vattic is next to a wall (or other high object), press the left analog stick to face the wall then the **R1** button to turn his back to it. Vattic may be less visible to enemies, or even able to sneak under the view cone of security cameras when hugging the walls and melding with the shadows like this.

When backed up to a wall, press the left analog stick **←→** to sidle left and right. Upon reaching a corner, stop and press the left analog stick **←→** to peek round and take a glimpse of the layout ahead. While peeking, press the left analog stick in the direction of the adjacent wall to edge around the corner without leaving its cover.

If armed with a weapon, Vattic can leap out from behind a corner, pop off a shot and return to cover before taking too much damage from enemy fire. With a weapon equipped, back up to a wall or other large object and sidle up to the end. Peek around using the left analog stick and hold the **L2** button to jump out and lock onto a target (also use the right analog stick to refine Vattic's aim). Press the **R2** button to fire before releasing the **L2** button to dive back to safety.

CROUCHING

Press the **□** button and Vattic crouches down (press the **□** button again to return to standing). While crouching, he can move as above albeit rather more slowly. He can also make use of low level cover such as fences or packing cases to hide from enemy sight and fire.

While crouched and backed up to low cover, Vattic can sidle, peek and fire as above, and can also leap up to fire a round **over** the obstacle before dropping down again.

Crouch and back up to an object, then with a weapon equipped, hold the left analog stick **↑** and hold the **L2** button to stand up and lock on to a target; press the **R2** button to fire before releasing the **L2** button to drop back under cover.

AERIAL MANEUVERS

While on walkways or balconies, Vattic can flip over the edge to hang by his hands.

Move Vattic to the edge and press the **X** button to drop and hang. Press the left analog stick **←→** to swing hand-over-hand left or right; press the **R1** button to climb back up to the platform, or the **X** button to drop down to the ground below.

1st person view

Press the **L3** button (click the left analog stick) to switch between 3rd and 1st person views.

In 1st person view, use the right analog stick to look around. When Vattic needs to peek around a corner or an obstacle, press the left analog stick **←→** to lean in that direction.

information is the key

Keep an eye out for enemy computer systems; they may hold key information or security codes necessary for Vattic's mission. To use a computer, approach it and press the X button. If the machine can be accessed, the computer's monitor will appear on-screen.

Use the left analog stick to move the mouse cursor and press the X button to open a desktop program. When Vattic has finished, be sure to close programs and log off by pressing the Δ button.

stealth and secrecy

Do not underestimate the value of stealth. Avoid getting spotted by enemies or security systems, or raising the alarm with too overt an attack, or Vattic may find that his mission is brought to an abrupt end. Remember to tidy up after Vattic; a corpse in a corridor can often cause concern for the deceased's comrades. TK it out of sight before it gets noticed.

If the alarm is raised, find somewhere to hide until the alert is cancelled. Look for likely places of seclusion as Vattic explores. Solid objects, closed doors or even the odd locker can all conceal him for a time.

attacking and firepower

As Vattic progresses through his mission he will acquire various weapons with many different capabilities.

To choose a weapon, press the **↑↓** directional buttons and press the **X** button to select it.

HAND-TO-HAND ATTACK

When Vattic is unarmed or out of ammo, you may need to take things up close and personal.

Get an enemy within arm's reach and press the **O** button to attack. If Vattic has no weapon equipped, his enemy will fall victim to his pummelling fists, but if Vattic does have a gun in hand – well, a sharp crack at the base of the skull with a rifle stock or pistol grip often does the trick...

THE STEALTHY ATTACK

If Vattic can creep up behind an enemy without alerting them to his presence (Charm), he may be able to immobilize them and put them out in utter silence.

When an oblivious foe is within arm's reach, press the **X** button to slide a strangle hold around their neck, then use the **O** button to render them unconscious or the **X** button to hurl them away.

TRANQUILIZE 'EM

Equipped with the short-range tranquilizer gun, Vattic can remove enemies from the action for an extended period of time, without actually divorcing them from their heartbeat.

Press the **L2** button to lock on to an adversary, then use the right analog stick to refine Vattic's aim. The drugs take effect faster or more slowly depending on where the tranq dart strikes. A headshot or neckshot is likely to drop them in their tracks, but a legshot could take some while to work – unless a larger dose is administered. Press the **R2** button to fire a dart.

TAKE AIM - LET RIP

With a weapon in hand in 3rd person view, hold the **L2** button to lock on to a target and press the **R2** button to fire.

Use the right analog stick to change the target that Vattic locks on to. If a machine gun is equipped, you can use the right analog stick to spray the room with bullets. In 1st person view, use the right analog stick to aim.

When it's time to reload, it may be wise to take cover. It could be fatal to get caught without bullets in the middle of a firefight. Manually reload the equipped weapon by holding the **L2** button and pressing the **X** button.

SNIPING

When a sniper rifle is equipped, the sniper scope comes into play.

In 3rd person view, press the **L2** button to lock on to a target then keep the button held and the scope will zoom in for a tighter shot. Use the right analog stick to refine the shot further before pressing the **R2** button to squeeze off a round.

In 1st person view, press the **L2** button to raise the rifle, then the left analog stick **↑↓** to zoom in and out, while using the right analog stick to aim. Press the **R2** button to place the shot.

the power of psi

Waking disoriented in a hospital bed, Vattic discovers that his mind is not all it used to be. Memories are missing, fundamental information is just ... gone. But in their place, a power is growing, evolving; a power that may push Vattic to the edge of sanity and beyond, unless he can gain control and reclaim his past...

healing

Vattic channels the power of his mind to accelerate his own healing and restore his damaged body. While concentrating on his restoration, Vattic is vulnerable to attack.

Select Healing then hold the **R2** button until Vattic is healthy again. It may be possible to focus Vattic's healing power to the benefit of others. Hold the **L2** button to lock onto another person (press the right analog stick ←→↑↓ to select other people), then hold the **L2** button.

telekinesis

By focusing his thoughts on a single object, Vattic can move it without touching it. As Vattic becomes more experienced with telekinesis, he'll be able to move heavier objects.

Select Telekinesis then hold the **L2** button to lock on to an object. Press the right analog stick ←→↑↓ to lock on to a different object if necessary. Finally hold the **R2** button to bring the chosen object under Vattic's control and use the right analog stick to move it.

psi blast

The psi blast is a highly-destructive concentration of psychic energy that Vattic can hurl at his adversaries. As Vattic becomes more experienced in its use, the psi blast may become an even more intimidating force.

Select Psi Blast then hold the **L2** button to lock on to an object. Press the right analog stick ←→↑↓ to lock on to a different object if necessary, then hold the **R2** button to form the psi blast and release to throw it.

Each blast uses an amount of psychic energy.

charm

When Vattic wraps his psychic energy about himself, he can obliterate his presence from the mind of any nearby human. Physical contact with another person though, is a different matter...

Select Charm then hold the **R2** button to go invisible. The effect will last until the **R2** button is released or Vattic's psychic energy drains completely.

Occasionally, Vattic's charm power can alter or calm the attitude of comrades. With Charm selected, hold the **L2** button to lock on to a target mind (use the right analog stick to change the lock if necessary), then press the **R2** button to coerce that person. Do not attempt to charm enemies – contact with a mind so full of aggression can temporarily wipe out Vattic's psychic energy.

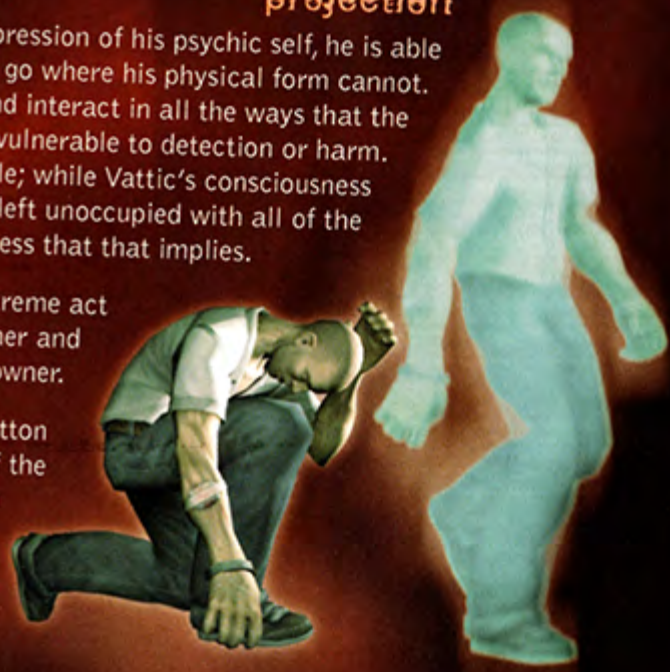

projection

When Vattic invokes this ultimate expression of his psychic self, he is able to force his mind to leave his body and go where his physical form cannot. The ghostly astral self is able to move and interact in all the ways that the physical body can and is invulnerable to detection or harm. However, the flesh is not so durable; while Vattic's consciousness is travelling, his body is left unoccupied with all of the defenselessness that that implies.

It may even be possible, through an extreme act of will, to violate the mind of another and wrest control from its owner.

Select Projection and press the **R2** button to eject Vattic's mind from his body. All of the normal movement controls apply. Approach an unsuspecting human and press the **X** button to suspend their consciousness and take possession of their motor functions for a short time.

Vattic's mind will whiplash back to his body when his psychic energy is exhausted or corporeal pain distracts his concentration.
