PLAYING THE GAME

Press **Up** or **Down** on the left analog stick or directional buttons to view the unlocked missions. When you are ready to accept a mission, press the **X** button. Mission data will be displayed showing you the objectives you must accomplish to complete the mission as well as data on your vehicle's weaponry and enemy vehicles.

PLAYING THE GAME

MISSION OBJECTIVES

Before beginning a mission, you will be presented with that mission's objectives. There are two types of mission objectives, Primary and Secondary, that you must follow and complete in order to access further missions. When you complete a set number of objectives during your missions, other missions will be unlocked. Although you are able to unlock other missions by completing objectives, you **MUST** complete a mission's Primary Objectives in order to begin your next mission. In other words, even if you unlock a new mission, you won't be able to perform that mission if any previous mission's Primary Objectives are not accomplished first.

USING WEAPONS

The G-6155 Interceptor is equipped with the latest in high-tech weaponry, both offensive and defensive. As your missions continue, your vehicle will be upgraded with the latest in IES weapons technology. These upgrades are available for both offensive and defensive weaponry.

If you are being followed by NOSTRA agents, use the Interceptor's defensive weapons. These weapons include an Oil Slick, Smoke Screen and Flamethrower. Proper use of defensive weapons is vital for any agent if they are to complete their missions successfully.

The Interceptor is also fully equipped with a powerful arsenal of offensive weapons. Your stock machine guns will upgrade to become even more deadly. New IES technology allows for precise deployment of missiles as well as EMP (electromagnetic pulse) blasts. Perhaps the most significant improvement in offensive weapons is the Rail Gun. The Rail Gun is the pinnacle of IES weapons technology and is the most powerful weapon yet to date.

G-6155 INTERCEPTOR

The G-6155 Interceptor is a prototype of the most advanced counterintelligence vehicle ever developed. It incorporates the latest high-tech systems and includes many experimental weapons and features. The most significant advancement it possesses is the ability to transform itself into a number of alternative forms quickly and without stopping, allowing it to operate on both land and water. It also includes a state-of-the-art computer system that controls or semi-automates many of its capabilities.

INTERCEPTOR MORPHING

The G-6155 Interceptor has the remarkable ability to transform itself from a land-based vehicle to a water vehicle depending on the current terrain. This incredible feature is what makes the Interceptor so dangerous to NOSTRA. New IES technology allows for the Interceptor, if damaged badly, to jettison its outer frame and become a small (but just as deadly) one-man vehicle. Being lighter and faster than the Interceptor, this vehicle unfortunately doesn't allow for the Interceptor's full arsenal of weapons, but it still is heavily armed and a force to be reckoned with.

PLAYING THE GAME

SATCOMS

Throughout some missions, you will be required to find and activate IES tracking units called SATCOMs. These global-tracking units allow for IES forces to monitor your activity and provide necessary replenishments via a Weapons Van or Weapons Boat per mission.

WEAPONS VAN / WEAPONS BOAT

Located in every mission you will find a weapons vehicle. These are either in the form of a van or boat. When a weapons vehicle is in close proximity to the Interceptor, you will be notified. Find the van or boat and proceed towards the rear of the vehicle. When you are within range of the vehicle, you will be automatically taken aboard it. After a brief period, your Interceptor will emerge, fully armed (weapons replenished), fully repaired (full health) and the Interceptor's turbo chargers will be full as well.

GPS TRACKERS

The Interceptor is equipped with GPS (Global Positioning System) Tracker units. These units when deployed, will attach themselves to any vehicle which IES wants to track. These vehicles usually are cargo trucks or ships. When approaching one of these vehicles, simply fire a GPS Tracker towards it. Only a direct hit will activate the tracking unit. Do not, under any circumstances, destroy the targeted vehicle. This will result in mission failure and could have disastrous consequences.

TWO-PLAYER GAMES

SPYHUNTER's Two-Player game mode allows two players to compete against each other in three unique mini-games. Each mini-game will end when a player reaches the end of the level. Be sure to check out the loading screen before you begin to play. This screen will tell you what you need to do in order to win the game.

During your game, each player can use their Interceptor's arsenal of weapons to slow down or annihilate their opponent. Kills are kept track of, but these points will not declare you a winner at the end of the race. All Two-Player games will be played on one of the mission locations. Please note that your Interceptor will only be equipped with weapons that are available in those locations.

SPY2 HEAD TO HEAD

The object of this game is to reach the finish line first. Use whatever weapons you can to leave your opponent in the dust.

GLOBE TROTTER

It's not the fastest player who wins, it's whomever can collect the most SATCOMs during the game.

CHICKEN HUNTER

Why did the chicken cross the road? To give you points, that's why. Eliminate as many chickens as you can to earn the most kill points and win the game.
