CONVEYOR BELTS

These wacky new contraptions line the perimeter of your playing field on some puzzle boards. Firing a bubble at the conveyor belt will cause it to ricochet in odd directions. Trial and error is the best way to figure out the new trajectories.

SMALL BUBBLES

These bubbles show up tiny on your launcher and as they fly through the playfield. Since they're small, these mini bubbles can fit in the minutest spaces where larger bubbles would just get stuck. When the small bubble makes contact with another bubble, it blossoms into a full sized bubble. Small bubbles are great, strategically speaking!

BUBBLE CAPTIVES

These poor souls are trapped inside a giant bubble! Liberate them by shooting a bubble of the same color as their prison at them. As they are released, they turn all the remaining bubbles on the playfield to the color of their bubble cell.

GAME MODES

PUZZLE MODE

Puzzle mode offers three different games: Training, Normal and Classic. That's a lot of bubble-busting fun! Select the desired mode by pressing the **UP** or **DOWN DIRECTIONAL BUTTONS** and start the mode by pressing the **X** **BUTTON**.

Training

The object of Training mode is to clear a round by eliminating all the bubbles on the playfield. You'll play with help from the bubble launcher guideline. You can only clear the zone by eliminating all bubbles on the playfield. Training offers you five rounds, which will give you an idea of some of the newest Super BAM features and how they work.

Normal

Choose a character, then select any of several available letters by pressing the **LEFT** or **RIGHT DIRECTIONAL BUTTONS** to move the highlight to a desired letter and confirm by pressing the **X** **BUTTON**. You will then play the five puzzles associated with that letter. Once you have mastered these puzzles, that letter is sealed and you can choose your next letter from a new group. Continue in this way until you have completed a line of letters and reached the back row.

Classic

Classic mode offers a collection of some of the best Bust-A-Move puzzles ever created. The bubbles are always large and none of the Normal mode features are here. This is newfangled nostalgia Bust-A-Move style! Here you also play five rounds per letter as you move through the alphabetical chain to the back row and victory!

CPU BATTLE

CPU Battle mode offers two different levels of difficulty in which you can compete against the CPU-controlled characters: Normal and Expert. Select the desired difficulty by pressing the **UP** or **DOWN DIRECTIONAL BUTTONS** and start the mode by pressing the **X** **BUTTON**.

Choose a character to represent you in battle. As you toggle through the different characters, you'll see that each one has their own "Attack Pattern." If you eliminate more than three bubbles in a single turn, the bubbles that make up your Attack Pattern will drop onto your opponent's playfield. Compete against each CPU-controlled character on a round-by-round basis. Eliminate as many bubbles as possible or drop bubbles into your opponent's playfield. You win when your opponent's bubbles push past the Deadline.

When you win, you proceed to the next round and a new opponent. Remember, the character you select is directly related to the type of bubbles you drop on your opponent.

2P BATTLE

Choose a difficulty (Normal or Expert) or try your hand at Chain Reaction mode where wiping out more than three bubbles on a turn can yield some surprising results! Then, select your player. Press either **UP, DOWN, LEFT** or **RIGHT DIRECTIONAL BUTTONS** to select and confirm your selection with the **X BUTTON**. Then you can select a handicap that will even the playing field if you and your partner's skill levels differ. From here, the rules are the same as CPU Battle but this time it's your buddy (not some CPU opponent) you're dumping bubbles on! Remember, the character you select is directly related to the type of bubbles you drop on your opponent (the character select screen illustrates which bubbles will be dropped on your opponent when you complete each chain reaction).

SPECIAL BUBBLES

The bubbles described below have special properties.

STAR BUBBLE

Contact with a bubble will eliminate all bubbles of the same color.

RAINBOW BUBBLE

When in contact with an eliminated bubble, it will adopt the color of that bubble.

BLOCK BUBBLE

Although blocks can't be eliminated, you can still clear a round whether they're on the playfield or not.

BOWLING BALL BUBBLE

Once launched, it will continue eliminating bubbles and turning them into bowling pins, until it comes in contact with either a wall or Block Bubble.

HINDRANCE BLOCK

Similar to Block Bubbles, a Hindrance Block can be removed by eliminating all the surrounding bubbles in contact with it. However, you cannot clear a round if a Hindrance Block is still on the playfield.

ATTACK STYLE: His attack uses the hindrance block, making him hard to defeat.

FUNGILA

DESCRIPTION: He is Katze's watchdog and a very confusing sort of character.

ATTACK STYLE: His black bubble attack is very strong.

HINTS & TIPS

1. Study the way the puzzle is constructed, and how the bubbles are suspended. Note which bubbles are "linchpin" bubbles (bubbles which have a string of bubbles suspended from them). Often, eliminating a particular strategically placed bubble will cause an entire puzzle to give way!
2. Practice bouncing/angling your shots off the sides. This is the true way to mastering the game. Once you're good at doing this, you'll be able to pull off the tough shots that save the day!
3. Fire rapidly! As soon as you have your shot lined up, don't hesitate, shoot! Fire one right after another when bubbles are the same hue.
4. Watch your indicator to see what the next bubble is. A big part of a successful strategy is aiming the current bubble in anticipation of where you'll shoot the next one!
5. When playing an opponent (Human or CPU), make sure to set up your shots immediately. This means hanging a few bubbles off of two like-colored bubbles so that you'll be able to send "blocking" bubbles over to your opponent after you've dropped your bundle!
