**Enemy Indicator Arrows:** These arrows show you the relative location of the competition if they are close behind or to your side. As a rival vehicle approaches you from behind, a transparent yellow arrow marker comes into view at the bottom of the screen. The arrow becomes less transparent and changes to red as the vehicle gets close to you and drives along side of your car. The arrow will disappear from the screen once the competitor passes you, and will reappear if you pass their car.

**Split Times:** These times are shown in relation to the first place car when you do not hold the first place position. When you occupy the first place position, these times are based on the second place position. The splits will show negative numbers when you are behind, and positive numbers when you are ahead.

## GAME MODES

### *championship*

#### **Design Series**

Design, build, and race your own Concept Car as you take it through its paces in the Design Series. Eight challenging courses await you, along with the unique challenge of developing your own Concept Car in the Steve Saleen™ Styling Studio.

#### **Manufacturers Cup**

Select your path from the three available driving styles. Grip offers a more forgiving race experience and is a good place for beginners. Balance is a step up from Grip, and while it presents its own set of challenges, it is still relatively forgiving. Drift is the hardest of the styles to master. Faster than the other cars, but tough to handle through the turns, the Drift Series will push your skills to the limit. Each style offers eight races across three classes of vehicles, and a special prize at the completion of each one.

# **SUPERCAR**

## **STREET CHALLENGE™**

### ***Quick Race***

Compete in a custom race against A.I.-controlled opponents. Select your track, race options, and car, and hit the road.

### ***Time Attack***

In this mode, you can set the number of laps to learn the course and perfect your time.

### ***Head to Head***

Compete head-to-head in split-screen competition using cars unlocked in championship mode. You can also race your own concept cars against each other in this mode.

## **CHAMPIONSHIP DETAILS**

Championship is the main mode of the game. By winning a variety of races, you'll earn new cars and Design Studio parts and increase the number of tracks on which you can compete.

### ***Qualifying Position***

Each class has a minimum position the player can finish in to move on to the next race. This is called the "Qualifying Position."

For example: If the QP is second place, and you finish in fourth place, you must run that race again, trying to finish in second place or above. Check the QP before starting your race on the Race Preparation screen.

### ***Design Series***

When you start the Design Series, you are given access to the Steve Saleen™ Styling Studio. The Steve Saleen™ Styling Studio allows you to not only create your very own racing machine, but also customize it with various accessories, name it, paint it, and upgrade it along the path of the Design Series.

### **Load Car**

By selecting this option, you can load a previously created and saved concept car.

### **Save Car**

By selecting this option, you can save the concept car you created to the memory card. Up to three separate concept cars can be saved.

### ***Adjusting stats***

Upon finishing the visual design of your vehicle, and prior to entering the first C-class race, you are given the chance to allocate points towards making your car a true supercar. The Styling Studio offers you the chance to give your car more or less ability in the following areas:

#### ***Handling***

From springs to struts, the more points that are allocated, the better your car will handle the tight turns out there. If this option is left on a lower setting, your car will have more of a tendency to understeer and slide when taking turns.

#### ***brakes***

Bigger is better, and the more points you put towards your braking ability, the better you'll be able to stop in any situation. If you neglect this setting, you'll find yourself going faster, but needing much more space to slow down. Remember, some races are won or lost in the turns.

#### ***Acceleration***

Off the line, how does your car perform? This option allows you to go from zero to one hundred almost faster than you can blink, it's also great for regaining that lost place if you find yourself in the wall on a turn. Lower acceleration settings might be compensated by higher top speeds, but sometimes that burst of speed at the low end is needed more than sustained high speed.

#### ***top speed***

The need for speed is strong for racers, and you're no exception. Your top speed can be the cause for a last-minute straightaway victory, or the reason why you can't perform on those tight, twisty tracks. If you forget about speed, you better have the skills to outperform the competition in all other areas, or the lack of speed might come back to hurt you.

All of these attributes are equally important, and the upgrade path you take will ultimately mold your racing style. Make wise decisions that match your racing style, and you'll rise to the top of the winners podium in no time.

## STREET CHALLENGE™

### CITIES

#### *Los Angeles*

Playground of millionaires and moviestars—where the downtown skyline pierces a cityscape so dense it has become synonymous with urban sprawl. Speed down Figueroa Street and weave through the towering skyscrapers in the heart of the financial district. This is your chance to hit 200+ mph on freeways normally clogged with commuters and skid past the Staples Center™ beneath a vibrant orange sky that blankets the city as the sun slowly sets over the Pacific.

#### *London*

A city filled with intrigue and life—while difficult to navigate, this city serves as a home to Big Ben, Trafalgar Square and the famous Tower of London. Even the most skilled of racers have a tendency to meet their match in the throes of London's myriad of roads and age-old bridges. The streets are made for driving on the left, but on this rainy afternoon, you'll be lucky to just stay on the road.

#### *Monaco*

Adrenaline for the racer's soul—fans from all over the world focus on Monaco every summer. Its fast and famous harbor straight and dangerous hairpins are just a few of the sights to see as you speed through the seaside course. This town is a playground for the over-indulgent tourist, home for the gloriously rich, and a testing ground for a racer and their skills.

## ***munich***

Darkness embraces the Altstadt tonight. Munich is home to a duo of tracks that will take you through the Marienplatz in the heart of the city. The boarded up fountains are just one of the signs that winter has come to pass and, though no snow lies on the ground, there is certainly a chill in the air.

## ***Paris***

A distinct and challenging city that is ready to test any racer—variety is the spice of life and it shows in the diversity of this city's visuals. From the amazing Eiffel Tower overlooking the quaint and quiet bridges, to the imposing Notre Dame, the city feels like no other city can.

## ***ROME***

A warm city that beckons to new racers—as ancient as the hills, but still has the life and breath of a modern city. Racers on the circuit consider this their stomping grounds. From amateur to professional, with its smooth turns and long straights, it's an easy choice. The Vatican gives this city honor, the ruins give it its history, and the races give it excitement. You will give Rome your respect.

# SUPERCAR

## STREET CHALLENGE™

### *Turin*

A historically rich city in the northwest part of Italy—the city is steeped in a legacy of royalty and sensibility. A storm has emptied the normally bustling streets, and the road has become slick and dangerous to drive on. The sharp right angles of the city roads serve as dangerous turns that will stretch the limits of your car and your skill.

## SAVING/LOADING

### *Load/save*

Save and load your games from the Main menu. Select the Load/Save option and select your function. Follow the on-screen prompts to guide you through the process.

### *deleting cars*

When in the Load/Save menu you will have the option to delete your previously created and saved concept cars.

## OPTIONS

### *sound*

In this menu, the volume levels can be moved left or right to the desired setting. Pressing the  button will mute the music or effects. Press the  button again to un-mute.

Press the X button on the Stereo icon to select Mono or Stereo sound.

### *CONTROLLER*

This menu allows you to toggle the DUALSHOCK™ 2 analog controller vibration on or off (see page 6). This screen also allows you to select what type of control scheme you would like to use.

### *RECORDS*

This is where you can view the recorded times for all of the tracks. Both the best lap times and the best overall race times are recorded here.

## DRIVING TIPS

- Slamming on the brakes will simply lock up your tires. Feather the brakes to stop effectively and smoothly.
- Sometimes the right amount of gas through a turn is no gas at all.
- At the start of the race, keep your RPMs at about 3500 and you'll get a slight speed boost right off the line.
- The smoothest racing is often the fastest.
- Using the handbrake can scrub speed at a higher rate than normal brakes, but at the cost of vehicle control.
- Experiment with using the shortcuts to maximize their effectiveness.
