# COMPLETE CONTROLS

You've mastered the basics, now learn the more advanced moves to take full advantage of the incredible depth *Triple Play Baseball* has to offer. With pinpoint pitch location selection, batting cursor, and one-button throwing, you are in complete control from the first pitch to the final out.

**NOTE:** Default options are listed in **bold** in this manual.

<b>ACTION</b>	<b>CONTROL</b>

## ON THE MOUND

It's good to have the sluggers on your side, but you have to have solid pitching if you want to win games. Figure out which pitches your hurlers have more command over and which they tend to struggle with. Get to know the limitations of your starters and your bullpen to make sure you have the right pitcher in for any given situation.

<b>Select</b> pitch (pitch choices vary from pitcher to pitcher)	<b>X</b> , ●, ▲, or ■
<b>Cancel</b> pitch (after selection)	●
Move <b>pitch cursor</b>	left analog stick
<b>Throw</b> pitch	<b>X</b>
<b>Pitchout</b>	D-Button ↓
<b>Pickoff</b> attempt	D-Button to select base
Activate <b>fielder positioning</b> menus	<b>L1</b> (outfield), <b>R1</b> (infield)

- ⊕ View the Pitch Selection bar over the pitcher's head to see the available pitches.
- ⊕ Pitching is pressure-sensitive. The harder you press **X**, the faster the pitch is thrown.

**NOTE:** When Vibration is ON (➤ *Options* on p. 23), your DUALSHOCK™ 2 analog controller vibrates when you move the pitching cursor in and out of the strike zone.

**TIP:** Keep an eye on the pitcher's energy level (➤ *Pause Menu* on p. 12). When the pitcher gets tired, consider bringing in a reliever.

## IN THE FIELD

What good is pitching if you don't have the defense to back it up? Like everything else in baseball, good fielding depends on being aware of the situation. If the other team has a man on first with less than two outs and the pitcher at the plate, get ready for the sacrifice bunt. If they have a man on third and hit a fly to the outfield, look for the runner to tag up and try to gun him down at the plate. In *Triple Play Baseball*, it's up to you to make the big plays.

### FIELDING THE BALL

<b>Move</b> at normal speed	D-Button or left analog stick
<b>Speed burst</b>	D-Button or left analog stick + tap ✕
<b>Switch</b> to fielder nearest ball	▲
<b>Jump</b>	■ (while standing still)
<b>Dive</b>	■ + D-Button or left analog stick toward ball
<b>Climb</b> the wall	■ + D-Button or left analog stick at the wall

### AFTER THE CATCH

<b>Auto Throw</b> to pitcher/cut-off man/base ✕	
<b>Conservative</b> throw	Press ✕ normally + D-Button or left analog stick to select base
<b>Aggressive</b> throw	Press ✕ harder + D-Button or left analog stick to select base
<b>Run to base</b> with ball	● + D-Button or left analog stick to select base

⊕ With Auto Throw, the CPU selects either a base, cutoff man, or the pitcher to throw the ball to, based on which play it thinks is best. You can override Auto Throw by pressing the D-Button + ✕ to select a base to throw to.

- ⊙ Throwing is pressure-sensitive, so the speed/aggressiveness of the throw depends on how hard you press **X**. A throw meter appears at the bottom of the screen to indicate the power of your throw.

**EA TIP:** Aggressive throws are by nature less accurate than normal throws, so save them for when you have to make the big play.

- ⊙ When throwing the ball or running to a specific base, remember that the D-Button and the left analog stick correspond to the diamond. For example, to make an aggressive throw to first base, press **X** hard + D-Button or left analog stick  $\Rightarrow$ .

## AT THE PLATE

Are you ready to stare down the barrel of a 100 mph fastball? Or maybe he'll be throwing you a breaking ball away. Crowd the plate if you want, but be prepared to face the chin music.

<b>Position batter</b>	<b>R2</b> + D-Button or left analog stick
<b>Turn batter</b> to open/closed stance	<b>L1/R1</b>
Move <b>batting cursor</b>	left analog stick
<b>Swing</b>	<b>X</b>
<b>Bunt</b>	<b>●</b>

- $\Rightarrow$  To **aim a hit**, use your batting cursor. To hit a fly ball, try to get under the ball a bit (hit the bottom half of the ball). To hit a ground ball, hit on top of the ball. To hit a line drive, aim for the meaty center. The timing of your swing determines to which area of the field you hit. Swing earlier to pull the ball (left field for right-handed batters) or later to hit to the opposite field (right field for right-handed batters).

**EA TIP:** The closer you get the center of your batting cursor to the center of the ball, the more power you get out of your swing.

## ON THE BASEPATHS

Running the basepaths is one of those things that people only notice when you do it poorly. One key to good baserunning is knowing your baserunners. A catcher will usually be slower than a center fielder and therefore less likely to be able to stretch a long single into a double. Pay attention to who is on base so you don't run yourself out of an inning.

**NOTE:** The CPU automatically runs the bases for you, but you can override the CPU by performing the following moves.

<b>Steal</b> (before windup)	D-Button to select which base to steal
<b>Speed burst</b>	Tap <b>X</b>
<b>Advance</b> single baserunner	D-Button or left analog stick to select the base to advance to
<b>Retreat</b> single baserunner	Right analog stick to select the base to retreat to
<b>Advance</b> all baserunners	<b>L1</b>
<b>Retreat</b> all baserunners	<b>R1</b>
<b>Slide</b> feet-first	●
<b>Slide</b> head-first	■

⊙ When running, the D-Button corresponds to the diamond. For example, if you want your man on second to steal third, press the D-Button  (for third base).

 **EA TIP:** If you're playing a team that gives up a lot of runs, you can afford to play it conservatively when running the bases. If you're facing a tough pitcher, you'd better get more aggressive.

 **EA TIP:** If it's going to be a close play for your baserunner at the plate, tap **X** repeatedly to barrel into the catcher; the collision may knock the ball loose.

## GAME OPTIONS

Make the game as easy or as hard as you want. Beginners should start out at **ROOKIE** Difficulty level with the Fielding help turned **ON**.

#### DIFFICULTY

Select your skill level:

**ROOKIE:** The best place to start for beginners. Hitting is much easier in this mode, and the CPU plays loose defense.

**PRO:** A moderate challenge in which the CPU takes more chances on the bases and reacts a bit quicker on defense.

**ALL-STAR™:** Here's your chance to really test your skills. The CPU plays very aggressively on offense and has a very tight defense.

#### INNINGS

Choose 1, 3, 5, 7, or **9** innings. The Innings option is not accessible from the Pause menu.

#### ERRORS

When **ON**, there's a chance that fielders will make errors.

#### FIELDING AID

When **ON**, a cursor helps direct you to where the ball is going to land.

#### PITCH POWER METER

When **ON**, a meter appears above the pitcher's head showing the strength behind his pitch.

## OVERLAYS

Select **STATISTICS** to view statistical-based overlays, **HELP** for more on-screen help during the game, **ATTRIBUTES** for your current batter's skill ratings, or **CYCLE** to cycle through both the **STATISTICS** and **ATTRIBUTES** overlays.

## CONTROLLER 1 AND CONTROLLER 2 VIBRATION

Toggle **OFF** to turn off the vibration feedback on your **DUALSHOCK™ 2** analog controller. Default is **ON**.

# SAVING AND LOADING

*Triple Play Baseball* saves user-defined options and all data for a Season, Playoff, or Big League Challenge on a **MEMORY CARD (PS2)**.

---

**NOTE:** For *Triple Play Baseball*, you can only Save or Load files from **MEMORY CARD slot 1**.

---

## SAVE/LOAD SCREEN
