⚠ WARNING: PHOTOSENSITIVITY/EPILEPSY/SEIZURES

READ BEFORE USING YOUR PLAYSTATION®2 COMPUTER ENTERTAINMENT SYSTEM.

A very small percentage of individuals may experience epileptic seizures or blackouts when exposed to certain light patterns or flashing lights. Exposure to certain patterns or backgrounds on a television screen or when playing video games may trigger epileptic seizures or blackouts in these individuals. These conditions may trigger previously undetected epileptic symptoms or seizures in persons who have no history of prior seizures or epilepsy. If you, or anyone in your family, has an epileptic condition or has had seizures of any kind, consult your physician before playing. IMMEDIATELY DISCONTINUE use and consult your physician before resuming gameplay if you or your child experience any of the following health problems or symptoms:

- dizziness
- altered vision
- eye or muscle twitches
- loss of awareness
- disorientation
- seizures
- any involuntary movement or convulsion

RESUME GAMEPLAY ONLY ON APPROVAL OF YOUR PHYSICIAN.

Use and handling of video games to reduce the likelihood of a seizure

- Use in a well-lit area and keep as far away as possible from the television screen.
 - Avoid large screen televisions. Use the smallest television screen available.
 - Avoid prolonged use of the PlayStation 2 system.
Take a 15-minute break during each hour of play.
 - Avoid playing when you are tired or need sleep.
-

Stop using the system immediately if you experience any of the following symptoms: lightheadedness, nausea, or a sensation similar to motion sickness; discomfort or pain in the eyes, ears, hands, arms, or any other part of the body. If the condition persists, consult a doctor.

WARNING TO OWNERS OF PROJECTION TELEVISIONS:

Do not connect your PlayStation 2 system to a projection TV without first consulting the user manual for your projection TV, unless it is of the LCD type. Otherwise, it may permanently damage your TV screen.

CONTROLLER CONFIGURATION

Before starting your match, you will be prompted to choose a Controller Configuration. There are six different options: CLASSIC ANALOG DRIBBLE, CLASSIC ANALOG DRIBBLE 2, NEW ANALOG DRIBBLE, CLASSIC DIGITAL DRIBBLE, CLASSIC DIGITAL DRIBBLE 2, and NEW DIGITAL DRIBBLE. Make sure you select the configuration that you're most comfortable with, because it can affect how well you play the match.

USER PROFILE

Before taking the pitch, you must create a user profile in order to track and save game stats and player development throughout *UEFA EURO 2008*.

ON THE PITCH

EXPERIENCE LEVEL

At the beginning of the match you will be asked to select your Experience Level. Here are the three options:

Beginner

This level is for the first-time player who has limited experience with soccer games. The game defaults to the Amateur Difficulty Level with Auto-Switching ON and Manual Through-Ball/Crossing OFF.

Intermediate

This level is for the casual player who has played soccer games before. The game defaults to the Semi-Pro Level with Auto-Switching halfway ON and Manual Through-Ball/Crossing OFF.

Experienced

This level is for the experienced player who has played numerous soccer games. The game defaults to the Professional Difficulty Level with Auto-Switching OFF and Manual Through-Ball/Crossing ON.

NOTE: For the ultimate challenge, you can increase the difficulty level further by selecting the World Class setting via the Game Settings screen.

PLAYER STATUS BAR

During a match, the Player Status Bar appears at the bottom of the screen, displaying the highlighted player's current level of fitness and stamina.

FITNESS

The overall stamina of a player is represented by a green bar which decreases the more you exhaust a player. As the match goes on a tired player sprints less and less, and his green bar will gradually change to red.

PERFORMANCE METER

Keep one eye on the match and the other on the performance meter to check that the momentum stays with your team. The Performance meter increases as team gains momentum.

KICK STICK

Place your kick exactly where you want with the all-new Kick Stick. Press the left analog stick to aim the kick, then press the right analog stick ↓ to begin the player's run up to the ball. Once the player reaches the ball, move the right analog stick ↑ to kick the ball. It's as easy as that.

To add curve to the ball when kicking, press the right analog stick in a circular motion.

NOTE: The left analog stick is the default setting used for aiming the Kick Stick, however the D-button can be used if you choose a different controller configuration.

PASS PULSE

When playing with one or more friends on your team, you can call for a pass from a teammate any time you don't have the ball by clicking the **L3** button. As soon as you do so, your on-screen player will raise his arm and the player with the ball will feel a vibration on their controller to alert them that you're calling for the pass.

CRITICAL MOMENT AI

The all-new Critical Moment AI lets you find the players on your team that have a reputation for scoring the clutch last-minute goals that are synonymous with big tournaments like UEFA EURO 2008.

If the score of your match is separated by one goal (or drawn) in the 80th minute, keep an eye out for special player indicators that appear under your players that are proven match winners.

During this time, it's critical to get the ball to these highlighted players. They are given a temporary ratings boost, and possess the superior shot power and finishing ability to save the day and win the match for you.

FORWARD FINDER

When in possession of the ball on your opponent's side of the pitch, press and hold the **L1** button and press **○** button to send long ball towards the left forward. Press and hold the **R1** button and press the **○** button to send long ball towards right forward.

SAVING AND LOADING

Before exiting a game mode or a menu where changes have been made, be sure to save your progress to a memory card (8MB)(for PlayStation®2). All unsaved information will be lost otherwise. You can load files manually by accessing the Load Screen (via the Main menu).
