COACHING TIP: PENALTIES

Aiming: By default, you start aiming at the middle of the goal. From the moment you start powering up for a shot, you can move to aim anywhere inside the goal. The longer you hold in any particular direction, the farther your shot goes in that direction. Be careful with how long you hold , as letting go too soon results in a shot closer to the middle of the goal, and holding it for too long causes you to miss the goal.

Saving: Committing to a save direction early allows you to reach farther and save shots close to the corner of the goals. However, diving farther to the side makes it more difficult to save shots aimed toward the middle of the goal.

If you think the kick taker is going for placement rather than power, you can try to react to the shot by holding in any direction after the ball has been kicked.

SKILL MOVES

Skills moves can be performed by all players. The type of skill your player can execute depends on his skill level. A player with the highest skill level can perform the most difficult and effective skills in the game, whereas a player with a lower skill level will attempt a simpler version of a trick or may altogether fail in his attempt of that skill. The speed at which a skill move is executed depends on your player's agility attribute. For example, an agile player like Cristiano Ronaldo can perform skills at a much quicker pace than a player with lower agility.

All of the skills are broken down into five levels of difficulty. One-star moves are the most basic and can be performed by all players in the game. Two-, three-, and four-star moves can be done by players who are relatively skillful in real life. Five-star moves can only be performed by the most skilled footballers such as Cristiano Ronaldo and Neymar. These players are able to do the most impressive skills and tricks in *FIFA 13*.

NOTE: The controls listed below assume that the controlled player is moving vertically upwards and should be amended depending on your player's direction.

GAMEPLAY: TIPS AND TRICKS

NEW COMPLETE DRIBBLING

While facing up to an opponent, you can make precise dribble touches with 360° directional mobility. Your player contextually faces up while dribbling in order to keep you better oriented to take on defenders in one-on-one battles. To manually face up while dribbling, hold **LT** and **RT** to make your player face up to the nearest goal-side defender. Performing the action manually allows you to change direction quicker at lower speeds and explode past defenders.

NEW 1ST TOUCH CONTROL

With more realistic control over difficult passes, your player's first touch is now more important than ever. Opponent pressure, incoming ball speed, player skill, and many other factors, all contribute to the success of your player's first touch. Control the ball while moving at slower speeds to keep the first touch closer. For an even more refined touch, hold **LT** as your player receives a difficult pass to control the ball at a slow speed.

NEW TACTICAL FREE KICKS

You can now call a second and third kick taker during a free kick. Each kick taker can pass, shoot, or run over the ball. Utilize dummy runs and lay off passes to create dangerous and unpredictable free kicks. Opponents can counter by adding or subtracting players to the wall, creeping the wall forward, or sending a bullet man to intercept the pass or block the shot. For free kicks that are farther away, you also have the ability to call a second player to come short by pressing **RT**.

NEW LATERAL CONTAIN

You now have more freedom and lateral mobility while containing an opponent. Use Contain to place your defender in front of the opposing team's attacker by holding **A**. Move your defender left or right while containing in order to shepherd an opponent to less dangerous areas of the field or onto his weaker foot.

NEW SEAL OUTS

While defending, you now have the ability to dispossess an opponent by using your defender's body to win back possession of the ball. With good anticipation, you can use your defender's size and strength to seal out an opponent who attempts to dribble past him. In situations where there is separation between the dribbler and the ball, press **B** to launch a Seal Out and use your player's body to step in front of your opponent.

SETTING UP THE GAME

Before heading out onto the pitch, set up an Xbox 360 gamer profile along with a *FIFA 13* profile to save all of your memorable achievements and accomplishments to the Xbox 360 Hard Drive or Xbox 360 Memory Unit. Create an Origin Account (EA) to enjoy the online features in *FIFA 13*.

NEW FIFA ULTIMATE TEAM

Join the millions of fans who have built their club in FIFA Ultimate Team. FIFA Ultimate Team is a massive online community of football fans from around the globe, building their own dream squads and competing in Tournaments, Seasons, and in our global Auction Market for players.

GETTING STARTED

When you first start FIFA Ultimate Team (FUT) you are given a starter pack of players. This pack contains everything you need to start playing in Tournaments and earning coins. You'll receive 22 players from various leagues around the world, a manager, and some player contracts.

BUILDING CHEMISTRY

Having a team of star players is great, but having a team with excellent chemistry is what you're after. A squad with good team chemistry can play above their ratings, while great players with poor chemistry won't be at their best. To build chemistry, look at the links between players on the pitch.

BUILDING CHEMISTRY LINKS

Players gain chemistry when playing in the correct formation, playing in a position that they prefer, and linking to other players who come from the same country, league, or club.

Formation bonuses are added when a player is in a formation they like. For example, a striker with a 4-4-2 preference gets the best bonus for playing in a 4-4-2, but if you put them in any formation with two strikers, such as a 5-3-2, they'll receive a partial bonus.

A position bonus is earned by playing a player in the correct position on the pitch. Playing a center midfielder in a CM spot in a formation grants a full position bonus to a player. However, putting a center midfielder into a CDM (center defensive midfielder) or CAM (center attacking midfielder) spot yields a partial bonus. You even get a small bonus by playing them in LM (left midfielder) and RM (right midfielder) spots.

Linking to other players is the way to get your team chemistry to maximum. Links between players are made by connecting players with the same nationality, players who play in the same league, and players who play at the same club. For example, if you put an Italian striker from the Serie A next to a Spanish striker from the same club, you would get a strong link for having two players who play in the same league and club side by side.

There are many ways to reach high team chemistry, so experiment with different combinations of players and have fun creating unique squads.

TIP: When building your squad, include Bronze players with good chemistry early on. This helps you earn more coins in the early completions and eventually get better players.

MANAGING YOUR SQUADS

The Squad screen is where you manage your players, give players contracts, improve their fitness and morale, and optimize your teams' chemistry.

CONTRACTS

In FIFA Ultimate Team, your players need contracts to play a match. Each player has seven contracts when they're found in a pack. Every time you play a match the contracts remaining for a player is reduced by one. A player loses one contract by coming on the pitch; if the player is in your subs but does not play they keep their contract for the match.

A player contract can be Bronze, Silver, or Gold. Applying a contract to a player with the same quality rating is always the best value. So, when a Bronze player runs out of contracts picking up a Bronze pack or a Bronze contract on the trade market is your best bet. To apply a contract item to a player bring up the Actions menu and select Apply Consumable.

FITNESS

To get the most out of your players in matches, make sure your squad is match fit and ready to play. Check your players for fitness and morale in the Squads screen by moving  and changing to the Status view.

Ideally, fitness for players should be as high as possible (maximum 99) to ensure they can run for the full match. Fitness can be recovered two ways—resting the player for a match or playing a fitness recovery item. Try to keep your players above 75 fitness to get a full 90 minutes from them. To apply fitness items to a player bring up the Actions menu and select APPLY CONSUMABLE. Fitness items can be found in packs or on the Auction market.

MORALE

Morale for a player starts out neutral and goes up or down based on their performance in matches. A player with high morale gains benefits during gameplay, while a player with low morale has a small decrease to their performance during the match.

Aim to keep your player morale at neutral or above when starting a match. A player's morale trends toward neutral naturally. If you find a player is not in good spirits, you can rest him in matches or play a morale training item on that player. To apply a morale item to a player, bring up the Actions menu and select Apply CONSUMABLE. Morale items can be found in packs or on the Auction market.

NEW SEASONS

The most popular mode in FIFA is back for *FIFA 13*! Play with any club you want in 10-game online seasons, with the goal of reaching promotion and climbing up the divisions. Can you reach Division 1? There are now all-new Division Titles, which exist in each division. Not only is promotion a goal, but also the glory of being the best in your division and collecting silverware. What better way to show off your success than your own Trophy Cabinet. The more success you have, the better your cabinet can get.

Also new is the ability to save your team management changes for future Seasons games. In addition, there are more matchmaking options, which give you added customization, so that you can play the way you want against who you want.

Lastly, co-op play is back in FIFA Seasons! Grab a friend for some 2v2 action and work together to glory.

PLAYING IN CUPS

Every few weeks the cup window opens. Based on your current division, you qualify for cups and choose which to enter during the window. Each is a dynamic 16-team tournament. Can you fill up your Trophy Cabinet?

NEW CAREER

Decide how you wish to begin your career—as a player or as a manager. Your success in each mode determines your value in the eyes of the football world!

CHOOSE YOUR JOURNEY

PLAYER CAREER

Take control of a created up-and-coming starlet or choose to be a current professional football player as you embark on your journey in multiple league, cup, continental, and, potentially, international competitions in the hopes of becoming a world-class star.

You can choose two different types of players in your Player Career:

Real Player

Select any real player from any team. You start at whatever the player's status is with the club and country (if applicable).

Create Your Pro

Create your own professional player, starting as a young player for any team. You can select any club, as there are many paths to take in your journey to creating a world-class star. Select a low-tier club and work your way up through leagues to play for the best clubs in the world, or choose to start your journey with one of the best clubs. Be warned, if your player is deemed not to have qualified to make the starting lineup, your club may put him out on loan to build up his skills and experience. Once he has met the requirements, he'll become a regular starter.

CREATE A PRO

Create a player and grow over the seasons with over 500 accomplishments. Each player you create has his own individual journey, enabling you to play multiple player careers in different positions and play for different clubs.

Player Objectives

In your Player Career, keep track of manager-assigned objectives. These objectives, completed in your league, include goal-scoring targets, chances created, winning tackles, and passing efficiency.

Your player is also given short-term targets, which are pulled from the league objectives given by his manager. These targets are based on the skill level of your player's opposition and whether the team is home or away.

Request Transfer or Loans

If you feel it's time for a change or want more playing time to build up your player's skills, you can request your club for a transfer or go out on loan for a season. To do this, go to My Actions and select any of the options. Be warned, your club ultimately decides what they want to do, so you may not get what you wish for.

MANAGER CAREER

You are in control of the team's finances and must manage the budget, including transfers, negotiations, and player contracts. Play as a manager and reach ultimate glory at the domestic and international level. Rise to prominence and keep the board pleased by winning prestigious cups, winning your league, and managing a national team to win major tournaments.

MANAGEMENT TIPS!

- ▶ Be sure to review your line-up before playing a game! Every player can make a difference to the outcome.
- ▶ Use all the search options to find the right player to complete your squad, and listen to feedback that your negotiator provides for a successful signing.
- ▶ Take notice of your assistant coach's player assessment. His analysis of every player's talent lets you know which young players deserve more time on the pitch.

TAKE CONTROL

INTERNATIONALS

Whether you're a player or a manager, you may be eligible to participate in international competition with your national team. As a player, you have to put in strong performances with your club to get noticed by your national team's manager. As a manager, offers to coach national teams are based on how well you are performing at the club level.

CAPTAIN/FITNESS/FORM/MORALE

The decisions you make in Career Mode can have a direct affect on the morale of your players, leading to a change in their performance on the pitch. Form and energy also play a big part in your team's performance, so view the Squad Report and Squad Ranking screen to stay up to date on everyone's key indicators. Players can go beyond good or bad form into extreme good or bad form if key statistical indicators such as goals, assists, or clean sheets per game also support their match ratings. The captain you choose affects on the organization of your team on the pitch, so ensure you select a wise head to lead your team once they cross the white line.

EUROPEAN COMPETITION IN THE FIRST SEASON

Start the Champions Cup and Euro League right away in the first season. To enable this, select the option in the Career Mode introduction flow and decide what clubs you want to have participating in either competition.

PLAYER ACTION POPUP

In your Player Career, use the Action Popup to submit transfer/loan requests or decide to retire. In your Manager Career, use the Action Popup to view more information about a player, or quickly submit enquiries or transfer bids. Use this as your hub to take actions on players you hear about or transfer targets that you have.

REQUEST FUNDS

If you need more money to make a big signing to improve your squad, submit a proposal to the board. Be careful, as you may need to promise a better season end result to have the board accept the request.

TRANSFER SHORTLIST

Shortlist any transfer targets that you have and compare their attributes in the Transfer Shortlist screen.

YOUTH ACADEMY

Build up your club's youth system so you can grow from within and find the best young talent to set you up for the future. Having a healthy youth squad is integral to building a strong team. Send scouting agents to locales all over the world to discover and hire new players.

TALK TO PRESS

A good manager takes care of his team on every level. Before games, you have a chance to speak to the press. Use this time to make statements about individuals, teams, or the opposing team or manager and affect their performance in the next game.

TRANSFER DEADLINE DAY

Expect to see major transfers and a lot of excitement as star players shift teams as the clock counts down each hour. Use this day to make last minute transfer improvements to your squad.

NEW SKILL GAMES

Skill games are all about learning football skills of from beginner to expert level. There are eight skills to master, each with Bronze, Silver, Gold, and Skill Challenge levels. Can you become legendary in all the skills? Compare your high scores with those of your friends and the world to see who is the best.

Your default player in Skill Games is your Arena player (in the main menu). Before each match, you can choose him or another player from that team's starting 11. If you want to try a different team, choose SELECT TEAM/PLAYER from the Skill Games menu and pick a different player on a new team.

In the hub, see all your friends and their status, invite who you want to play, and try to get a win for three points. Earn the most points in five games to hoist the trophy, and then start all over again the next season to try to defend your title.

NOTE: In order to play online, you must read and accept the EA SPORTS Privacy Policy and Terms of Service. You are asked to read and accept these documents when playing for the first time. You may choose not to accept, but this will bar use of *FIFA 13*'s online features.

NOTE: An Online Pass is required to access all online features. When playing for the first time, you are asked to input the Online Pass found on the back of the manual. If you don't have an access code, or it has already been redeemed, you can purchase the Online Pass or begin a free limited trial. Online Pass is the EA SPORTS Premium Online experience, included with all new copies of any EA SPORTS game.
