Important Health Warning About Playing Video Games

Photosensitive Seizures

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people who have no history of seizures or epilepsy may have an undiagnosed condition that can cause these "photosensitive epileptic seizures" while watching video games.

These seizures may have a variety of symptoms, including lightheadedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, or momentary loss of awareness. Seizures may also cause loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects.

Immediately stop playing and consult a doctor if you experience any of these symptoms. Parents should watch for or ask their children about the above symptoms–children and teenagers are more likely than adults to experience these seizures. The risk of photosensitive epileptic seizures may be reduced by taking the following precautions:

- Sit farther from the television screen.
- Use a smaller television screen.
- Play in a well-lit room.
- Do not play when you are drowsy or fatigued.

If you or any of your relatives have a history of seizures or epilepsy, consult a doctor before playing.

Action Gauge
Level Indicator

■ ACTION GAUGE

The Action Gauge indicates the amount of special power the character holds.
This power is required to use Sonic's Custom Actions (P.13), activate Shadow's Chaos Boost (P.14), and use Silver's telekinetic powers (P.16). Using such actions will deplete the Action Gauge, but all three characters can refill their power by collecting Chaos Drives and Light Cores (P.10). Note that Sonic's and Silver's gauges are also gradually restored by time.

The Level Indicator is the 3-light display located in the right portion of the Action Gauge. The number lit is the level of the currently selected Custom Action (Sonic), or Shadow's Chaos Boost.

If you are playing as Sonic, there is another gauge below the Action Gauge which will display the maturity of the Custom Action's Level.

TOWN STAGE

There are two main objectives during the Town Stage. One is to seek where the next Action Stage begins, and the other is to increase your character's ability by purchasing enhancement items which will allow you to use the Power-Up moves (check P.12, 14, and 16 for their moves).

■ INFORMATION

Walk toward anyone with an icon above their head and press the X Button to hear what the folks in Soleanna have to say. Information from them will usually give you a better idea as to what you should do and where to go in the Town Stage.

■ EVENT

At various times during the game such as finding an Action Stage entrance, completing an Action Stage, or meeting a special character, a cinematic presentation of the event will automatically play.

■ MISSION

You will encounter various missions while you are in the Town Stage. These may be in the form of a trial, a task, or a battle. Complete each Mission as it's presented to advance your story.

■ SHOP

Go to the Shop to purchase various items that will enhance your main character's skills. Shop items are purchased with money you've earned mainly by clearing the Action Stages. Items sold will change according to your game progress, so browse in the nearest Shop if you have a chance.

Note: Some character moves must be purchased in order to advance your story.

BOSS STAGE

After clearing certain Action Stages, your character must battle the Boss to advance the story. Bosses are stronger than regular enemies and will require more skill to overcome.

Most Bosses will need to be attacked in a specific way, so find the most efficient attack by locating their weaknesses. The Boss will finally be defeated when their Life Gauge (displayed in the top right) is empty.

PAUSE MENU

Press the START button to pause the game and display the Pause Menu. During the pause, select CONTINUE to resume gameplay or QUIT to exist the game.

Additionally, the START OVER option will allow you to start over the current Stage/Mission from the beginning, with the cost of one life. During the Town Stage, there will also be an option to freely save your game progress to a designated storage device.

ITEMS / OBJECTS

The following items and objects found throughout the environments can help your character in the Action Stages.

Hint Ring
Touch and receive helpful information to assist your gameplay.

Item Box
Touch to receive one of a variety of Power-up Items (see P.11).

Ring

POWER-UP ITEMS

The following items are the Power-Ups you can receive by breaking open the Items Boxes within the Stages.

Rings
Ring (Money) count increases by 5, 10 or 20.

Invincible
Become invincible for a limited time.

Shield
Protects your character from an attack.

High Speed
Increases running speed to the maximum.

Gauge Up
Replenishes the Action Gauge.

1-Up
Earn an extra life.

SCORES AND RANKS

The Score of this game is increased by grabbing items such as Rings and destroying enemies. Points are also given when you successfully perform a series of great moves or quickly eliminate a group of enemies. On completion of an Action Stage, bonus points (based on Rings and time) will be added to your Total Score.

The Total Score you've earned in the Stage will determine the Rank (S, A, B, C, or D) you receive in the Result screen. The higher the Rank, the more money you are awarded.

GAME OVER

You will lose a life if your character takes damage while not carrying any Rings during the Action Stage. If your characters falls off a cliff, or drowns in the water areas, you will also lose a life. If you lose a life with no remaining lives, you will return to the Episode Select screen.

CHARACTER CONTROLS

Sonic The Hedgehog features three playable characters, each with their own unique moves and techniques, as detailed below. Six additional supporting characters (P.17) can also be controlled as they interact with the three main characters.

SONIC THE HEDGEHOG

Homing Attack — A Button during Jump

Automatically zoom in and strike nearby enemies. If no enemies are within range, use this move to make Sonic perform a "Jump Dash."

Spin Dash — Hold X Button at standstill > Release

Hold the X Button to start Sonic spinning on the spot. Release the button and he will dash off in a burst of speed.

Attack — X Button

Throw a powerful spinning kick at enemies straight ahead.

Light Dash — X Button near a path of Rings   POWER-UP

Send Sonic soaring through a pathway of Rings suspended in mid-air.

Bound Jump — X Button during Jump   POWER-UP

While jumping over an enemy or breakable ground area, press the X Button to attack vertically downward before bouncing even higher. Press the X Button again to repeat this move.

Sliding Attack — Hold X Button > Release   POWER-UP

Slide along a destructive path straight through multiple enemies ahead.

Custom Action — Right Trigger   POWER-UP

Hold down the right trigger to use the currently selected Custom Action for an extended period of time. You are allowed to continually use the action as long as there is enough energy left in the Action Gauge.

Note: Actions listed as a POWER-UP (check to the right of each action command) are available once the enhancement items are purchased from the Shop (P.8).

CUSTOM ACTIONS

Purchasing Gems from the Shop will allow Sonic to perform various specialized actions by pressing the right trigger to leverage your gameplay. Custom Actions you've already gained can be freely selected during the Action Stage by using the D-pad. Note that Custom Actions require power on your Action Gauge, and cannot be used when the gauge is empty.

All Custom Actions are upgradable (up to Level 3) by collecting Chaos Drives (P.10) – leveling up the action will result in more power and/or better mileage from the Action Gauge. Also, leveling up a Custom Action occurs one at a time since only the selected action can absorb the power of the Chaos Drives.

SUPER-SPEED STAGES

There's no stopping Sonic during the Super-Speed Stages. Guide him left and right through the fast-paced course, jumping over obstacles in his way to reach the goal in as short a time as possible, and in one piece. Note that attack moves are not used during these stages.

PRINCESS STAGES

In certain Stages, Sonic must escort the princess to a new destination. During this time, the princess's hidden powers combine with Sonic's allowing them to project an aura that can knock out enemies and provide firm footing on unstable terrain. Hold the right trigger to activate the aura until the Action Gauge runs out. Note that certain skills will not be available to Sonic during these stages.

SHADOW THE HEDGEHOG

The ultimate life form, created by Professor Gerald
On a mission from the Federal Government to rescue Rouge, Shadow encounters a mysterious enemy, Mephiles. During the course of battle, Shadow is hurled into the future.

CHAOS BOOST

When Shadow is in possession of a Memory Shard and the Action Gauge is completely filled, Chaos Boost can be triggered by pressing the right trigger. During this time, Shadow gains more destructive power and is invincible to enemy attacks. Power-Up moves corresponding to the Memory Shards may be used during this time (see below actions). Chaos Boost ends when the Action Gauge reaches zero.
