Important Health Warning About Playing Video Games

Photosensitive seizures

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people who have no history of seizures or epilepsy may have an undiagnosed condition that can cause these "photosensitive epileptic seizures" while watching video games.

These seizures may have a variety of symptoms, including lightheadedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, or momentary loss of awareness. Seizures may also cause loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects.

Immediately stop playing and consult a doctor if you experience any of these symptoms. Parents should watch for or ask their children about the above symptoms—children and teenagers are more likely than adults to experience these seizures. The risk of photosensitive epileptic seizures may be reduced by taking the following precautions: Sit farther from the screen; use a smaller screen; play in a well-lit room; do not play when you are drowsy or fatigued.

If you or any of your relatives have a history of seizures or epilepsy, consult a doctor before playing.

ESRB Game Ratings

The Entertainment Software Rating Board (ESRB) ratings are designed to provide consumers, especially parents, with concise, impartial guidance about the age-appropriateness and content of computer and video games. This information can help consumers make informed purchase decisions about which games they deem suitable for their children and families.

ESRB ratings have two equal parts:

- **Rating Symbols** suggest age appropriateness for the game. These symbols appear on the front of virtually every game box available for retail sale or rental in the United States and Canada.
- **Content Descriptors** indicate elements in a game that may have triggered a particular rating and/or may be of interest or concern. The descriptors appear on the back of the box next to the rating symbol.

For more information, visit www.ESRB.org.

SERVICE

Toss the ball by pressing **(A)** (flat shot serve), **(B)** (top spin serve) or **(X)** (slice serve) depending on the type of serve you want. The duration of your button press varies the power of the swing. Release the button to deliver the serve.

NORMAL SERVE Tap **(A)**, **(B)**, or **(X)**.

POWER SERVE Press and hold **(A)**, **(B)**, or **(X)** until the ball is at the top of the toss, then release.

As you hit the ball, use **(L)** to aim the serve. Learn to control how long you hold **(L)** in the aimed direction to avoid hitting out or into the net.

ADVANCED SERVE

1. Pull **(R)** to toss the ball.
2. Wait to time your shot with the top of the toss, then push **(R)** for a flat serve, **(R)** for a slice serve and **(R)** for a top spin serve.

TIMING DISPLAY: SERVICE

When you perform a Power serve or an Advanced serve, the timing of the release is very important. The perfect timing is when the ball is at the peak of its trajectory. The timing display helps you deliver accurate serves. When activated, it appears after you toss the ball for the serve, and grades your swing. Check your grade after a serve to get a feel for what timing constitutes a perfect serve. To activate the timing display, select **IN-GAME HELPERS** from the Main Menu's Options menu or the in-game Pause menu, and set the **TIMING DISPLAY** option to **ACTIVATE**.

SHOT BASICS

BASELINE SHOTS

FLAT SHOT (A) Use the flat shot to perform powerful, straight swings. The longer you press and hold **(A)**, the more powerful the swing.

TOP SPIN (B) The top spin shot produces fast, precise balls. Use it to cross the ball very wide, or push your opponent back behind the baseline.

SLICE (X) The slice delivers slow, precise balls. Use it when defending or when you want to rush the net, as it gives you time to get into position.

SPECIAL SHOTS

LOB (Y) When you catch an opponent close to the net, use a lob shot to send the ball over his or her head. Be watchful, because your opponent may get behind this shot and return it as an overhand smash.

DROP SHOT (RT + X) The drop shot delivers the ball close to the net, forcing your opponent to dash from the baseline to attempt a return.

PRO TIP To rush the net, hold **(X)** to prepare a slice shot, hold **(RB)**, use **(L)** to aim, then release **(X)**. Your slice gives you time to reposition, and **(RB)** moves you toward the net quickly, ready to meet your opponent's return shot.

SWING

1. Use **(L)** to position your player for the shot.
2. Press and hold **(A)**, **(B)**, **(X)** or **(Y)**.
3. Release the shot button to swing while aiming your shot with **(L)**.

Button press duration affects the power of the swing:

NORMAL SHOT Normal shots are the basic shots a player can perform. They don't have any particular strength or weakness.

CONTROL SHOT To finesse a shot for precision placement, tap a shot button. Power is sacrificed for precision.

POWER SHOT A long press and hold delivers a powerful shot. This shot is more susceptible to going out or into the net if you have bad timing.

PRO TIP When pressing and holding your shot, release the shot button at the moment when your player should begin his or her swing for the best timing. Sooner is always better than later!

VOLLEY

1. Use **(L)** to aim.
2. Quickly press and release a shot button: **(A)** (normal volley), **(B)** (power volley) or **(X)** (control volley). The press and hold duration doesn't matter when performing a volley; only timing does.

TIMING DISPLAY: BASELINE & SPECIAL SHOTS

Shot quality is based on button release timing. Wait too long to release a shot button and quality suffers. When activated, the timing display appears as you press a shot button to grade your swing. Check the timing display to learn to adjust your timing for perfect shots.
