Important Health Warning About Playing Video Games

Photosensitive Seizures

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people who have no history of seizures or epilepsy may have an undiagnosed condition that can cause these "photosensitive epileptic seizures" while watching video games.

These seizures may have a variety of symptoms, including lightheadedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, or momentary loss of awareness. Seizures may also cause loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects.

Immediately stop playing and consult a doctor if you experience any of these symptoms. Parents should watch for or ask their children about the above symptoms—children and teenagers are more likely than adults to experience these seizures. The risk of photosensitive epileptic seizures may be reduced by taking the following precautions:

- Sit farther from the television screen.
- Use a smaller television screen.
- Play in a well-lit room.
- Do not play when you are drowsy or fatigued.

If you or any of your relatives have a history of seizures or epilepsy, consult a doctor before playing.

Tips & Tricks

-  Try to match gems from the top down rather than from the bottom up.

GEOMETRY WARS RETRO EVOLVED

Piloting your craft alone through deep space, you're suddenly, mercilessly attacked by strange... *shapes*?! Though the diamonds and pinwheels seem easy enough to defeat, the threat increases as wily, aggressive squares appear.

- Green squares evade your fire.
- Purple squares, when fired upon, divide into smaller clones of themselves.
- Serpentine lines leave venomous trails in their wake and often travel in packs.
- Red circles quickly morph into black holes that can warp the course of your fire, or even consume you.

Luckily, your main weapon is equipped with unlimited ammo. But your ultimate firepower comes in the form of a bomb that instantly destroys all enemies on screen. Unfortunately, bombs are in limited supply.

Geometry Wars became an instant classic when it first appeared in *Project Gotham Racing*® 2. This exclusive Xbox Live® Arcade sequel gives you both the original game and a new, upgraded

version wrapped together in *Geometry Wars Retro Evolved*, featuring ten times more particles, high-definition graphics, digital sound, new enemies, enhanced special effects, and a scrolling play area.

Tips & Tricks

- Stay in the same spot and keep picking off your attackers for as long as you can. Don't move until you have to!
- Only use your bombs as a last resort. You don't earn points for blowing up enemy ships with the bombs, and racking up points is key to success.
- Watch out for the really fast ships, especially when they get close.
- Try to stay in the center of the screen, away from the sides and corners.

The story of Wik is a sad tale, you see,
 Filled with sorrow and loss and grim tragedy.
 We begin with a family cruelly taken...
 A loss that has left poor Wik's heart forsaken.
 Our hero, now seeking the souls of these lost,
 Has yet to fathom the immeasurable cost.
 But wait! Strange creatures called grubs now appear,
 Seeming benign but with motives unclear.
 Could these green worm things be somehow involved?
 Will this great riddle ever be solved?
 Wik is quite clever with his long, sticky tongue.
 From rocks and from mushrooms our hero has swung.
 He sucks up those green grubs and spits out the same.
 With acorns and horde flies has incomparable aim.
 His faithful mule Slotham is loyal but dim.
 If he wanders away, Wik's future looks grim.
 Adventure through more than ten dozen levels
 With goodies and baddies and all sorts of devils.
 Accompany Wik down countless dark roads
 As you play any one of the seven fun modes.
 Now journey with Wik; unravel the mystery
 To reunite the boy with his beloved family.

Tips & Tricks

- To build swing momentum more quickly, try jumping away from the point you want Wik to swing from before you latch his tongue.
- Looping close to scorpions or other players will knock them off their platform.
- Spit acorns at other players for extra points and to prevent people from camping in tall trees.
- Watch for bags of rocks and large berries—if you spit them, they will break into many smaller pieces, which can each take out a bug.

Hardwood Backgammon

Enjoy a game of classic backgammon against in-game opponents, against a friend on the same Xbox 360 console, or against an online opponent on Xbox Live. For centuries, civilizations across the globe have enjoyed backgammon's challenging blend of luck and strategy. So roll the dice and ponder your next move. And should you find your opponent's checker vulnerable, strike fast and send him to the bar! Once you have victory assured, use the doubling cube to bring you even closer to ultimate success!

- Two-player games at home or on Xbox Live.
- Challenging in-game opponents using Neural Net technology.
- Customizable items:
 - Environments (backgrounds, some with sound).
 - Dice.
 - Doubling cube.
 - Checkers.
 - Playing board.
- Fooms™, similar to emoticons, don't affect the game, but they might affect your mood. Send your opponents Fooms—like a Kiss, Fireball, or Lightning—to let them know how you feel.

Tips & Tricks

- Avoid leaving a checker alone on a point and hence open for capture.
- Use a wall of checkers to block a player from getting off the bar. This makes your opponent's rolls worthless—it's like getting extra moves.
